Mr. Ted Larson
1900 Kellner Street Unit 602
Manitowoc, WI 54220

SUBJECT: Case Closure with Groundwater Use Restriction for the Former Larson
Chevrolet Site A and Site B, Manitowoc, WI
BRRTS # 03-36-000224 - Site A
BRRTS #03-36-001057 - Site B

Dear Mr. Larson:

On October 11, 1999, the Northeast Region Closeout Committee completed a review of the above referenced contamination cases. Based on the investigative and remedial documentation provided to the Department, it appears that the contamination at the above named sites has been remediated to the extent practicable under current site conditions. The Committee has approved this case for closure pending the filing of a groundwater use restriction due to enforcement standard exceedances at MW-3 for 1,2 dichloropropane and at MW-1 for benzene. Attached is an example of a model restriction.

Please complete the restriction and return a draft to this office for approval with a copy of the deed/legal description, survey map if available and a site map showing the contaminated groundwater locations. Pending Department approval the restrictions can be filed with the Manitowoc Register of Deeds. Only when the Department has received documentation that the restriction has been filed with County Register of Deeds Office and the monitoring wells abandoned according to the requirements of NR 141 Wis. Adm. Code, will the Department consider the site closed.

Thank you for your cooperation in this matter. If you have any question please contact me at 920-492-5864.

Sincerely,

James R. Reyburn
Project Manager
Bureau of Remediation & Redevelopment

STATE OF WISCONSIN)
) ss
COUNTY OF MANITOWOC)

WHEREAS, Theodore Larson and Mary Lou Larson are the owners of the above described property as marital property.

WHEREAS, one or more petroleum discharges have occurred on this property. Petroleum contaminated groundwater above the ch. NR 140, Wis. Adm. Code enforcement standards existed on this property at the following location(s) on the following date(s): on May 19, 1999, at monitoring well MW-1, benzene was detected at 9.4 ppb; on February 10, 1999, at MW-3, 1,2-dichloropropane was detected at 11 ppb. Location of monitoring wells is provided on Figure 1 attached and made a part of this restriction.

WHEREAS, it is the desire and intention of the property owner to impose on the property restrictions which will make it unnecessary to conduct further groundwater or soil remediation activities on the property at the present time.

WHEREAS, natural attenuation has been approved by the Department of Natural Resources to remediate groundwater contamination exceeding ch. NR 140, Wis. Adm. Code groundwater standards within the boundaries of this property.

WHEREAS, construction of wells where the water quality does not comply with drinking water standards in ch. NR 809, Wis. Adm. Code is restricted by chs. NR 811 and NR 812, Wis. Adm. Code. Special well construction standards or water treatment requirements, or both, or well construction prohibitions may apply.

NOW THEREFORE, the owner hereby declares that all of the property described above is held and shall be held, conveyed or encumbered, leased, rented, used, occupied and improved subject to the following limitation and restrictions:

Anyone who proposes to construct or reconstruct a well on this property is required to contact the Department of Natural Resources' Bureau of Drinking Water and Groundwater, or its successor agency, to determine what specific requirements are applicable, prior to constructing or reconstructing a well on this property. No well may be constructed on this property unless applicable requirements are met.

If construction is proposed on this property that will require dewatering, or if groundwater is to be otherwise extracted from this property, while this groundwater use restriction is in effect, the groundwater shall be sampled and analyzed for contaminants that were previously detected on the property and any extracted groundwater shall be managed in compliance with applicable statutes and rules.

This restriction is hereby declared to be a covenant running with the land and shall be fully binding upon all persons acquiring the above-described property whether by descent, devise, purchase or otherwise. This restriction benefits and is enforceable by the Wisconsin Department of Natural Resources, its successors or assigns. The Department, its successors or assigns, may initiate proceedings at law or in equity against any person or persons who violate or are proposing to violate this covenant, to prevent the proposed violation or to recover damages for such violation.

Any person who is or becomes owner of the property described above may request that the Wisconsin Department of Natural Resources or its successor issue a determination that one or more of the restrictions set forth in this covenant is no longer required. Upon the receipt of such a request, the Wisconsin Department of Natural Resources shall determine whether or not the restrictions contained herein can be extinguished. If the Department determines that the restrictions can be extinguished, an affidavit, attached to a copy of the Department's written determination, may be recorded to give notice that this deed restriction, or portions of this deed restriction, are no longer binding.

IN WITNESS WHEREOF, the owner of the property has executed this Declaration of Restrictions, this 14 day of July, 2000.

Ms. Laurie Bruckner, Clerk Treasurer
Village of Valders
P.O. Box 457
Valders, Wisconsin 54245

RE: Former Larson Chevrolet Site, 221 North Liberty Street, Valders, Wisconsin

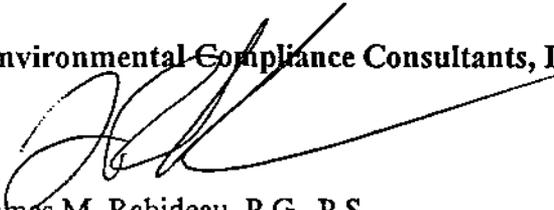

Dear Ms. Bruckner:

As part of final closure for the former Larson Chevrolet property, the Wisconsin Department of Natural Resources is requiring that the Village of Valders be notified that petroleum-related groundwater contamination is present in the North Liberty Street right-of-way, per NR 724. This contamination was the result of leakage/spillage from several underground storage tank systems formerly associated with the above-mentioned property. Based on the results of long term monitoring performed by Environmental Compliance Consultants, Inc. (ECCI), it appears that natural attenuation should be able to remediate any residual contamination on the subject property and within the right-of-way. ECCI would also like to inform you that the site on the east end of the property has not been closed, this notification only deals with the site on the west end of the property.

If you have any questions or concerns about this letter, please feel free to call me at (920) 434-5035.

Sincerely,

Environmental Compliance Consultants, Inc.
