Closure Letter, and any conditional closure letter issued or denial letter issued					X
Copy of any maintenance plan referenced in the final closure letter					NA
Copy of (soil or land use) deed notice <i>if any required as a condition of closure</i>					NA
Copy of most recent deed, including legal description, for all affected properties					X
Certified survey map or relevant portion of the recorded plat map (<i>if referenced in the legal description</i>) for all affected properties					X
County Parcel ID number, <i>if used for county</i> , for all affected properties					X
Location Map that outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily. If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site.					X
Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs.					X
Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)					X
Tables of Latest Soil Analytical Results (no shading or cross-hatching)					X
Isoconcentration map(s), <i>if required for site investigation (SI)</i> . The isoconcentration map should have flow direction and extent of groundwater contamination defined. If not available, include the latest extent of contaminant plume map.					NA
GW: Table of water level elevations, with sampling dates, and free product noted if present					NA
GW: Latest groundwater flow direction/monitoring well location map (should be 2 maps if maximum variation in flow direction is greater than 20 degrees)					NA
SOIL: Latest horizontal extent of contamination exceeding generic or SSRCLs, with one contour					X
Geologic cross-sections, <i>if required for SI</i>					NA
RP certified statement that legal descriptions are complete and accurate					X
Copies of off-source notification letters (if applicable)					NA
Letter informing ROW owner of residual contamination (if applicable) (public, highway or railroad ROW)					X

RE: **Final Closure**

Commerce # 54153-9716-51-A DNR BRRTS # 03-43-543158
Koski Property, 7951 US Highway 41, Oconto

Dear Mr. Koski:

The Wisconsin Department of Commerce (Commerce) has reviewed the request for case closure prepared by your consultant, STS Consultants, Ltd., for the site referenced above. Commerce has determined that this site does not pose a significant threat to the environment and human health. No further investigation or remedial action is necessary.

During the groundwater sampling the preventive action limit (PAL) for naphthalene and trimethylbenzenes was exceeded at temporary monitoring well TMW-1 and in test pit TP-1A. In addition, the PAL for naphthalene was exceeded in the groundwater sample collected from boring B-6. Commerce is issuing a PAL exemption, per NR 140.28(2), Wis. Adm. Code, for naphthalene and trimethylbenzenes at the referenced property.

This case is now listed as "closed" on the Commerce database and will be included on the Department of Natural Resources (DNR) Geographic Information System (GIS) Registry of Closed Remediation Sites to address residual soil contamination. Timely filing of your final PECFA claim (if applicable) is encouraged. If your PECFA claim is not received within 120 days of the date of this letter, interest costs incurred after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

It is in your best interest to keep all documentation related to the environmental activities at your site. If residual contamination is encountered in the future, it must be managed in accordance with all applicable state and federal regulations. If it is determined that any remaining contamination poses a threat, the case may be reopened and further investigation or remediation may be required.

Thank you for your efforts to protect Wisconsin's environment. If you have any questions, please contact me in writing at the letterhead address or by telephone at (920) 303-5410.

Sincerely,
