This Adobe Fillable form is intended to provide a list of information that is required for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request. The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

BRRTS #: PARCEL ID #:

ACTIVITY NAME: WTM COORDINATES: X: Y:

CLOSURE DOCUMENTS (the Department adds these items to the final GIS packet for posting on the Registry)

- Closure Letter**
- Maintenance Plan** (if activity is closed with a land use limitation or condition (land use control) under s. 292.12, Wis. Stats.)
- Conditional Closure Letter**
- Certificate of Completion (COC)** for VPLE sites

SOURCE LEGAL DOCUMENTS

- Deed:** The most recent deed as well as legal descriptions, for the **Source Property** (where the contamination originated). Deeds for other, off-source (off-site) properties are located in the **Notification** section.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Certified Survey Map:** A copy of the certified survey map or the relevant section of the recorded plat map for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map. (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).
Figure #: **Title:**
- Signed Statement:** A statement signed by the Responsible Party (RP), which states that he or she believes that the attached legal description accurately describes the correct contaminated property.

MAPS (meeting the visual aid requirements of s. NR 716.15(2)(h))

- Maps must be no larger than 8.5 x 14 inches unless the map is submitted electronically.
- Location Map:** A map outlining all properties within the contaminated site boundaries on a U.S.G.S. topographic map or plat map in sufficient detail to permit easy location of all parcels. If groundwater standards are exceeded, include the location of all potable wells within 1200 feet of the site.
Note: Due to security reasons municipal wells are not identified on GIS Packet maps. However, the locations of these municipal wells must be identified on Case Closure Request maps.
Figure #: 1 **Title: Site Location**
 - Detailed Site Map:** A map that shows all relevant features (buildings, roads, individual property boundaries, contaminant sources, utility lines, monitoring wells and potable wells) within the contaminated area. This map is to show the location of all contaminated public streets, and highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding a ch. NR 140 Enforcement Standard (ES), and/or in relation to the boundaries of soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Levels (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: 2 **Title: Excavated Areas/Extent of Chloride Contamination in Groundwater**
 - Soil Contamination Contour Map:** For sites closing with residual soil contamination, this map is to show the location of all contaminated soil and a single contour showing the horizontal extent of each area of contiguous residual soil contamination that exceeds a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: **Title:**

BRRTS #: 02-45-000165

ACTIVITY NAME: Van Straten Property

MAPS (continued)

Geologic Cross-Section Map: A map showing the source location and vertical extent of residual soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL). If groundwater contamination exceeds a ch. NR 140 Enforcement Standard (ES) when closure is requested, show the source location and vertical extent, water table and piezometric elevations, and locations and elevations of geologic units, bedrock and confining units, if any.

Figure #: **Title:**

Figure #: **Title:**

Groundwater Isoconcentration Map: For sites closing with residual groundwater contamination, this map shows the horizontal extent of all groundwater contamination exceeding a ch. NR140 Preventive Action Limit (PAL) and an Enforcement Standard (ES). Indicate the direction and date of groundwater flow, based on the most recent sampling data.

Note: This is intended to show the total area of contaminated groundwater.

Figure #: 2 **Title: Excavated Areas/Extent of Chloride Contamination in Groundwater**

Groundwater Flow Direction Map: A map that represents groundwater movement at the site. If the flow direction varies by more than 20° over the history of the site, submit 2 groundwater flow maps showing the maximum variation in flow direction.

Figure #: 4 **Title: Groundwater Contour Map 10/31/07**

Figure #: **Title:**

TABLES (meeting the requirements of s. NR 716.15(2)(h)(3))

Tables must be no larger than 8.5 x 14 inches unless the table is submitted electronically. Tables must not contain shading and/or cross-hatching. The use of **BOLD** or *ITALICS* is acceptable.

Soil Analytical Table: A table showing remaining soil contamination with analytical results and collection dates.
Note: This is one table of results for the contaminants of concern. Contaminants of concern are those that were found during the site investigation, that remain after remediation. It may be necessary to create a new table to meet this requirement.

Table #: **Title:**

Groundwater Analytical Table: Table(s) that show the most recent analytical results and collection dates, for all monitoring wells and any potable wells for which samples have been collected.

Table #: 6,7,8,9 **Title: Pre-Rem Na/Cl Levels (#6), Post-Rem NA levels (#7), Post-Rem Cl levels (#8), Cyanide (#9)**

Water Level Elevations: Table(s) that show the previous four (at minimum) water level elevation measurements/dates from all monitoring wells. If present, free product is to be noted on the table.

Table #: 5 **Title: Groundwater Elevations**

IMPROPERLY ABANDONED MONITORING WELLS

For each monitoring well not properly abandoned according to requirements of s. NR 141.25 include the following documents.

Note: If the site is being listed on the GIS Registry for only an improperly abandoned monitoring well you will only need to submit the documents in this section for the GIS Registry Packet.

Not Applicable

Site Location Map: A map showing all surveyed monitoring wells with specific identification of the monitoring wells which have not been properly abandoned.

Note: If the applicable monitoring wells are distinctly identified on the Detailed Site Map this Site Location Map is not needed.

Figure #: **Title:**

Well Construction Report: Form 4440-113A for the applicable monitoring wells.

Deed: The most recent deed as well as legal descriptions for each property where a monitoring well was not properly abandoned.

Notification Letter: Copy of the notification letter to the affected property owner(s).

BRRTS #: 02-45-000165

ACTIVITY NAME: Van Straten Property

NOTIFICATIONS

Source Property

- Letter To Current Source Property Owner:** If the source property is owned by someone other than the person who is applying for case closure, include a copy of the letter notifying the current owner of the source property that case closure has been requested.
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying current source property owner.

Off-Source Property

Group the following information per individual property and label each group according to alphabetic listing on the "Impacted Off-Source Property" attachment.

- Letter To "Off-Source" Property Owners:** Copies of all letters sent by the Responsible Party (RP) to owners of properties with groundwater exceeding an Enforcement Standard (ES), and to owners of properties that will be affected by a land use control under s. 292.12, Wis. Stats.

Note: Letters sent to off-source properties regarding residual contamination must contain standard provisions in Appendix A of ch. NR 726.

Number of "Off-Source" Letters:

- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying any off-source property owner.
- Deed of "Off-Source" Property:** The most recent deed(s) as well as legal descriptions, for all affected deeded **off-source property(ies)**. This does not apply to right-of-ways.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.

- Letter To "Governmental Unit/Right-Of-Way" Owners:** Copies of all letters sent by the Responsible Party (RP) to a city, village, municipality, state agency or any other entity responsible for maintenance of a public street, highway, or railroad right-of-way, within or partially within the contaminated area, for contamination exceeding a groundwater Enforcement Standard (ES) and/or soil exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL).

Number of "Governmental Unit/Right-Of-Way Owner" Letters: 1

Impacted Off-Source Property Information

Form 4400-246 (R 3/08)

This fillable form is intended to provide a list of information that must be submitted for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request (Section H). The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

April 21, 2009

BRIAN MARGAN
OUTAGAMIE COUNTY
410 S WALNUT ST
APPLETON WI 54911

SUBJECT: Final Closure Decision with continuing obligations
Van Straten Property (Outagamie County Salt Shed), STH 76, Shiocton
WDNR BRRTS ID # 02-45-000165

Dear Mr. Margan:

On March 23, 2009, the Northeast Region (NER) Closure Committee reviewed the above referenced case for closure. This committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On March 25, 2009, you were notified that the Closure Committee had granted conditional closure to this case.

On April 20, 2009 the Department received information or documentation indicating that you have complied with the requirements for final closure. All monitoring wells have been properly abandoned, and your site received closure approval with groundwater exceedances of Chapter NR 140 Enforcement Standards for chlorides.

Based on the correspondence and data provided, it appears that your case meets the closure requirements in ch. NR 726, Wisconsin Administrative Code. The Department considers this case closed and no further investigation or remediation is required at this time, however, you and future property owners must comply with certain continuing obligations as explained in this letter.

GIS Registry

This site will be listed on the Remediation and Redevelopment Program's GIS Registry. The specific reasons are summarized below:

- Residual soil contamination (containing sodium and chlorides) exists that must be properly managed should it be excavated or removed.
- Groundwater contamination is present above Chapter NR 140 enforcement standards.

This letter and information that was submitted with your closure request application will be included on the GIS Registry. To review the sites on the GIS Registry web page, visit the RR Sites Map page at <http://dnr.wi.gov/org/aw/rr/gis/index.htm>. If the property is listed on the GIS Registry because of remaining contamination and you intend to construct or reconstruct a well, you will need prior Department approval in accordance with s. NR 812.09(4)(w), Wis. Adm. Code. To obtain approval, Form 3300-254 needs to be completed and submitted to the DNR Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line <http://dnr.wi.gov/org/water/dwg/3300254.pdf> or at the web address listed above for the GIS Registry.

Residual Groundwater Contamination

Groundwater impacted by chloride contamination greater than enforcement standards set forth in ch. NR140, Wis. Adm. Code, is present both on this contaminated property and off this contaminated property. Off-property owners have been notified of the presence of groundwater contamination. For more detailed information regarding the locations where groundwater samples have been collected (i.e., monitoring well locations) and the associated contaminant concentrations, refer to the Remediation and Redevelopment Program's GIS Registry at the RR Sites Map page at <http://dnr.wi.gov/org/aw/rr/gis/index.htm>.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at (920) 424-0399.

Sincerely,

Kathleen M. Sylvester, Hydrogeologist
Remediation & Redevelopment Program

SUBJECT: Conditional Closure Decision, With Requirements to Achieve Final Closure
Van Straten Property (Outagamie County Salt Shed), STH 76, Shiocton
WDNR BRRTS ID # 02-45-000165

Dear Mr. Margan:

On March 23, 2009, the Wisconsin Department of Natural Resources Northeast Region (NER) Closure Committee reviewed your request for closure of the case described above. The NER Closure Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of the closure request, the NER Closure Committee has determined that the chloride contamination on the site from the former salt piles appears to have been investigated and remediated to the extent practicable under site conditions. Your case meets the screening criteria of s. NR 746.07 or s. NR 746.08, Wis. Adm. Code, and the requirements of ch. NR 726, Wis. Adm. Code and will be closed if the following conditions are satisfied:

MONITORING WELL ABANDONMENT

All monitoring wells at the site must be properly abandoned in compliance with ch. NR 141, Wis. Adm. Code. Documentation of well abandonment must be submitted to Kathleen M. Sylvester on Form 3300-005 found at <http://dnr.wi.gov/org/water/dwg/gw/> or provided by the Department of Natural Resources.

PURGE WATER, WASTE AND SOIL PILE REMOVAL

Any remaining purge water, waste and/or soil piles generated as part of site investigation or remediation activities must be removed from the site and disposed of or treated in accordance with Department of Natural Resources' rules. Once that work is completed, please send appropriate documentation regarding the treatment or disposal of the remaining purge water, waste and/or soil piles.

RIGHT-OF-WAY SOIL AND/OR GROUNDWATER CONTAMINATION

There is residual soil and/or groundwater contamination in a public street or highway right-of-way at this site – Morgan Road and STH 76. Section NR 726.05(2)(a)4, Wis. Adm. Code, requires you to provide written notification of the presence of residual soil and groundwater to the clerk of the town and county or municipality where the right-of-way is located and to the municipal department or state agency that maintains the right-of-way. These notifications must include warnings that excavation of potentially contaminated soil or groundwater may pose inhalation or other direct contact hazards and will require soil and groundwater sampling and analysis, as well as proper storage, treatment, or disposal of any excavated materials, based upon the results of the analysis. Please provide me with copies of the additional written notifications that are sent.

GIS REGISTRY

When the above conditions have been satisfied, please submit the appropriate documentation (for example, well abandonment forms, disposal receipts, copies of correspondence, etc.) to verify that applicable conditions have been met, and your case will be closed. Your site will be listed on the DNR Remediation and Redevelopment GIS Registry. Information that was submitted with your closure request application will be included on the GIS Registry. If possible, please submit an electronic version of your GIS Registry packet (Attachment H in your closure package) on a compact disc. To review the site on the GIS Registry web page, visit the RR Sites Map page at: <http://dnr.wi.gov/org/aw/rr/gis/index.htm>.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at (920) 424-0399.

Sincerely,

Kathleen M. Sylvester, Hydrogeologist
Remediation & Redevelopment Program

RETURN TO
JAMES LONG, ATTORNEY

Tax Parcel No: 28-0-0508-00

This Deed, made between Outagamie County, a municipal corporation, Grantor, and Thomas M. VanStraten, Grantee, Witnesseth, That the said Grantor, for a valuable consideration, conveys to Grantee the following described real estate in Outagamie County, State of Wisconsin:

A parcel of land in the SE 1/4 of the SW 1/4 of Section 20, Township 23 North, Range 16 East, Village of Shiocton, Outagamie County, Wisconsin, described as follows: Commencing at the Southeast corner of the SW 1/4 of said Section 20; thence west, along the south line of Section 20, 33.0 feet to the west line of S.T.H. "76" as the point of beginning; thence continuing west, along the south line of Section 20, 347.0 feet; thence North, parallel with the east line of the SW 1/4 of Section 20, 264.0 feet; thence East, parallel with the south line of Section 20, 347.0 feet to the west line of S.T.H. "76"; thence South, along the west line of S.T.H. "76", 264.0 feet to the point of beginning and containing 2.410 acres of land more or less.

FEE 2
EXEMPT

This is not homestead property. (If not) Together with all and singular the hereditaments and appurtenances thereunto belonging; And Grantor warrants that the title is good, indefeasible in fee simple and free and clear of encumbrances except easements and restrictions of record and will warrant and defend the same.

Dated this 13th day of December, 1990. Outagamie County, Wisconsin, by John R. Schraiter (SEAL) County Executive, James P. Schuetz (SEAL) County Board Chairman, James D. Hensel (SEAL) County Clerk.

AUTHENTICATION
Signature(s)
authenticated this 13th day of December, 1990.
TITLE MEMBER STATE BAR OF WISCONSIN (If not, authorized by § 708.06, Wis. Stats.)

ACKNOWLEDGMENT
STATE OF WISCONSIN
Outagamie County, ss.
Personally came before me this 13th day of December, 1990 the above named John R. Schraiter, James P. Schuetz, James D. Hensel to me known to be the persons who executed the foregoing instrument and acknowledged the same.

THIS INSTRUMENT WAS DRAFTED BY Attorney James R. Long 5735 W. Spencer, Appleton, WI 54915 (Signatures may be authenticated or acknowledged. Both are not necessary.)

Notary Public Outagamie County, Wis. My Commission is permanent. (If not, state expiration date: 19)

*Names of persons signing in any capacity should be typed or printed below their signatures.

STATEMENT OF PROPERTY LEGAL DESCRIPTION

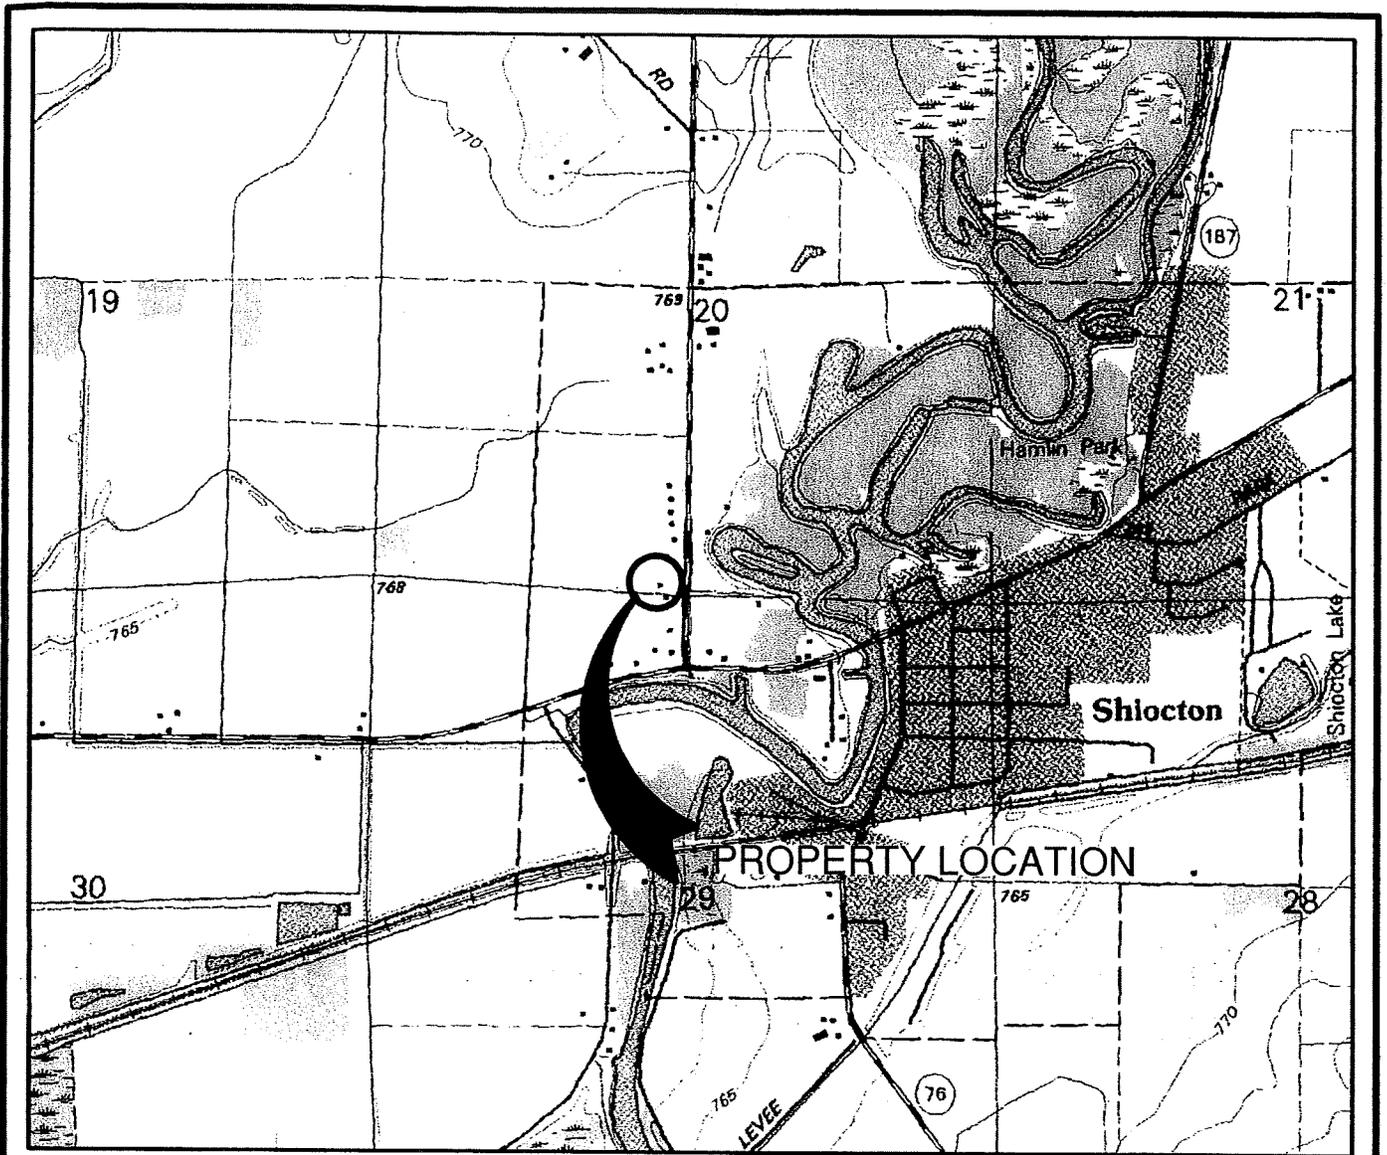

As required by Chapter NR 726.05(g), Wisconsin Administrative Code, I am providing this signed statement that to the best of my knowledge the legal description described on the enclosed property deed is complete and accurate for Former Outagamie County Salt Storage Facility, STH 76, Shiocton, Wisconsin, BRRTS # 02-45-000165.

RE: Notification of Residual Groundwater Contamination and Pending Case Closure Request, Road Salt Contamination, Former Outagamie County Salt Storage Facility, STH 76, Shiocton, Wisconsin, BRRTS # 02-45-000165.

Dear Thomas M. Vanstraten:

On behalf of Outagamie County, Robert E. Lee & Associates, Inc., (REL) is providing you notice that residual groundwater contamination associated with the former Outagamie County Salt Storage Facility (the Site) is present on your property (Parcel ID #280050800). Based on the April 22, 2008 groundwater sampling results, concentrations of chloride in groundwater is above the state groundwater enforcement standards (ES) found in Chapter NR 140, Wisconsin Administrative Code (Wis. Adm. Code). Enclosed is a map showing the estimated extent of chloride levels above the ES.

Many rounds of post source-soil excavation groundwater monitoring have been conducted from the monitoring wells installed at the Site and several nearby properties. The post-excavation monitoring indicates a stable to decreasing chloride concentrations in the wells. Given the primary source of the contamination has been removed, we believe the chloride concentrations in the groundwater will eventually decrease to levels below groundwater standards.

We are in the process of submitting a case closure request to the Wisconsin Department of Natural Resources (WDNR). We believe that allowing natural attenuation to complete the cleanup at the Site will meet the requirements for case closure that are found in Chapter NR 726 and NR 746, Wis. Adm. Code, and we have requested that the WDNR accept natural attenuation as the final remedy for this site and grant case closure. Closure, if granted, means the WDNR will not be requiring any further investigation or cleanup action be taken, other than the reliance on natural attenuation.

The WDNR will not review the case closure request for at least 30 days after the date of this letter. As an affected property owner, you have the right to contact the WDNR to provide any technical information that you may have that indicates closure should not be granted for this site. If you would like to submit any information to the WDNR that is relevant to this closure request, you should mail that information to Ms. Kathy Sylvester, 625 East County Road Y, Suite 700, Oshkosh, Wisconsin 54901.

SOURCE
PROPERTY

If this case is closed, the property will be listed on the WDNR's geographic information system (GIS) Registry of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where soil and groundwater contamination are above state standards found at the time the case was closed. This GIS Registry is available to the general public on the WDNR's internet web site. Please review the enclosed deed for your property to verify the correct legal description, and notify our office within the next 30 days if the description is incorrect.

Once the WDNR makes a final decision on the closure request, it will be documented in a letter. If the WDNR grants closure, you may obtain a copy of this letter by requesting a copy from Outagamie County, by writing to the agency address given above or by accessing the WDNR GIS Registry of Closed Remediation Sites on the internet at www.dnr.state.wi.us/org/aw/rr. A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

Should you or any subsequent property owner wish to construct or reconstruct a well on your property, special well construction standards may be necessary to protect the well from the residual groundwater contamination. Any well driller who proposes to construct a well on your property in the future will first need to call Diggers Hotline (1-800-242-8511) if your property is located outside of the services area of a municipally owned water system, or contact the Drinking Water program within the WDNR if your property is located within the designated service area of a municipally owned water system to determine if there is a need for special well construction standards.

Please feel free to contact this office if you have any question or concerns regarding the residual groundwater contamination. In addition, you may contact the WDNR project manager, Ms. Kathy Sylvester at (920) 424-0399.

Sincerely,

ROBERT E. LEE & ASSOCIATES, INC.

Impacted Off-Source Property Information

Form 4400-246 (R 3/08)

This fillable form is intended to provide a list of information that must be submitted for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request (Section H). The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

RE: Residual Groundwater Contamination beneath Morgan Street, adjacent to the Former Outagamie County Salt Storage Facility, STH 76, Shiocton, Wisconsin, BRRTS # 02-45-000165

Dear Mr. Kominowski:

Per Section NR 726.05, Wisconsin Administrative Code (Wis. Adm. Code), Robert E. Lee & Associates, Inc., (REL) is providing notification that chloride contamination exists beneath the Washington Street right-of-way adjacent to the Former Outagamie County Salt Storage Facility, STH 76, Shiocton, Wisconsin, BRRTS # 02-45-000165 (the Site). The chloride contamination was identified in the early 1990s resulting from past salt storage at the Site.

Investigative activities have included the installation of numerous soil borings and the collection of over ten years of water quality samples from monitoring wells. Based on the results of the investigation, it appears that chloride-impacted groundwater is present beneath Morgan Street. The contamination is present between approximately 3 to 8 feet below grade. The horizontal extent of impacted groundwater is depicted on the enclosed map. The groundwater analytical results are summarized on the enclosed tables.

We have submitted a case closure request to the Wisconsin Department of Natural Resources (WDNR) for the Site. As part of the case closure request, the WDNR requires that written notification of the presence of residual contamination be given to the town, county, or municipality where the right-of-way is located, and to the municipal department or state agency that maintains the right-of-way. Please accept this letter as written notification that salt contamination is present beneath Morgan Street.

September 4, 2008

RIGHT-OF-WAY

Responsible Party's Name: Outagamie County
Contact: Mr. Brian Margan, Risk Administrator
Address: 410 South Walnut Street
Appleton, WI 54911

Soil Contamination

Present: No

Groundwater Contamination

Present: Yes
Depth to Water: Approximately 3 to 8 fbg
Contaminants in Excess of the ES: Chloride

Case Summary

The chloride contamination was identified in the early 1990s resulting from past storage and handling of road salt at the Site. Investigative activities have included the installation of numerous soil borings and collection of over ten (10) years of water quality data from monitoring wells and private wells. Based on the results of the investigation, chloride-impacted groundwater in excess of state standards is present beneath STH 76. The horizontal extent of chloride-impacted groundwater is shown on the attached map. The groundwater analytical results are summarized on the attached tables.
