SUBJECT: Final Case Closure for Neenah City Garage, 333 W. Cecil St., Neenah, WI
WDNR BRRTS # 02-71-343372

Dear Mr. Hamblin:

On December 1, 2003, your request for closure of the case described above was reviewed by the Northeast Regional Closure Committee. The Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases.

After careful review of the closure request, the Committee has determined that the petroleum contamination on the site adjacent to the new water tower foundation appears to have been investigated and remediated to the extent practicable under site conditions. Your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation, remediation or other action is required at this time.

Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites due to benzene remaining in soil above the residual contaminant level at 130 parts per billion (ppb) at former soil sample, S-4. Information that was submitted with your closure request application will be included on the registry. To review the sites on the GIS Registry web page, visit <http://gomapout.dnr.state.wi.us/org/at/et/geo/gwur/index.htm>

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at the number below.

Sincerely,

Jennifer Borski
