SITE NAME: Marengo Oil
BRRTS #: 03-02-000444 FID # (if appropriate):
COMMERCE # (if appropriate): 54855-9999-22
CLOSURE DATE: 3/25/04
STREET ADDRESS: STH 13 & Poynette St.
CITY: Marengo

SOURCE PROPERTY GPS COORDINATES (meters in WTM91 projection):
x= 457114 y= 6661338

CONTAMINATED MEDIA: Groundwater Soil Both

OFF-SOURCE GW CONTAMINATION >ES: Yes No

IF YES, STREET ADDRESS 1: 245 Poynette St. Marengo
GPS COORDINATES (meters in WTM91 projection): x= 457158 y= 6661345

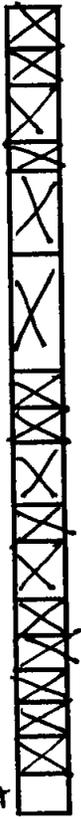

OFF-SOURCE SOIL CONTAMINATION >Generic or Site-Specific RCL (SSRCL): Yes No

IF YES, STREET ADDRESS 1: STH 13
GPS COORDINATES (meters in WTM91 projection): x= 457094 y= 6661381

CONTAMINATION IN RIGHT OF WAY: Yes No

DOCUMENTS NEEDED:

- Closure Letter, and any conditional closure letter issued
- Copy of most recent deed, including legal description, for all affected properties
- Certified survey map or relevant portion of the recorded plat map (if referenced in the legal description) for all affected properties
- County Parcel ID number, if used for county, for all affected properties *on deed copies*
- Location Map which outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy). If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site.
- Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy) This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs.
- Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)
- Tables of Latest Soil Analytical Results (no shading or cross-hatching)
- Isoconcentration map(s), if required for site investigation (SI) (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of groundwater contamination defined. If not available, include the latest extent of contaminant plume map.
- GW: Table of water level elevations, with sampling dates, and free product noted if present
- GW: Latest groundwater flow direction/monitoring well location map (should be 2 maps if maximum variation in flow direction is greater than 20 degrees)
- SOIL: Latest horizontal extent of contamination exceeding generic or SSRCLs, with one contour
- Geologic cross-sections, if required for SI. (8.5x14" if paper copy)
- RP certified statement that legal descriptions are complete and accurate
- Copies of off-source notification letters (if applicable)
- Letter informing ROW owner of residual contamination (if applicable)(public, highway or railroad ROW)
- Copy of (soil or land use) deed restriction(s) or deed notice if any required as a condition of closure

SUBJECT: Final Case Closure By Closure Committee
Marengo Oil, STH 13 & Poynette St, Marengo, WI
WDNR BRRTS #:03-02-000444
PECFA #54855-999-22

Dear Mr. Eid:

On January 15, 2004, your site as described above was reviewed for closure by the Northern Closure Committee. This committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On January 20, 2004, you were notified that the Closure Committee had granted conditional closure to this case.

On March 25, 2004, the Department received correspondence indicating that you have complied with the conditions of closure, specifically, final documents required for the GIS Registry. Based on the correspondence and data provided, it appears that your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation, remediation or other action is required at this time.

Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the registry. To review the sites on the GIS Registry web page, visit <http://gomapout.dnr.state.wi.us/org/at/et/geo/gwur/index.htm> If your property is listed on the GIS Registry due to groundwater contamination exceeding ch. NR 140 standards at the time of closure, and you intend to construct or reconstruct a well, you will need Department approval. Department approval is required before construction or reconstruction of a well on a property listed on the GIS Registry, in accordance with s. NR 812.09(4)(w). To obtain approval, Form 3300-254 needs to be completed and submitted to the DNR Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line at the web address listed above.

Please be aware that this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at 715-365-8990.

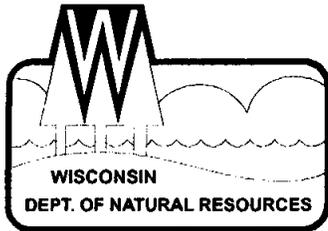

Sincerely,
NORTHERN REGION

Subject: Conditional Case Closure
Marengo Oil, STH 13 & Poynette St, Marengo, Wisconsin
WDNR BRRTS # 03-02-000444
PECFA #54855-999-22

Dear Mr. Eid:

On January 15, 2004, your request for closure of the case described above was reviewed by the Northern Region Closure Committee. The Closure Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of the closure request, the Closure Committee has determined that the petroleum contamination on the site appears to have been investigated and remediated to the extent practicable under site conditions. Your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code and will be closed if the following conditions are satisfied:

1. The monitoring wells at the site must be properly abandoned in compliance with ch. NR 141, Wis. Adm. Code. Documentation of well abandonment must be submitted to me on Form 3300-5B found at www.dnr.state.wi.us/org/water/dgw/gw/ or provided by the Department of Natural Resources.
2. The following materials and information were missing from those submitted for the GIS Registry: A. A copy of the Land Contract between Chambers and Eid. B. County Tax Parcel ID numbers for all affected properties. C. A diagram showing the latest horizontal extent of groundwater contamination. These materials should be submitted to me at the above address.

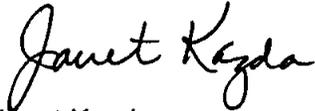

When the above conditions have been satisfied, please submit a letter to let me know that applicable conditions have been met, and your case will be closed. Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the registry. To review the sites on the GIS Registry web page, visit <http://gomapout.dnr.state.wi.us/org/at/et/geo/gwur/index.htm>.

If this is a PECFA site, section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at 715-365-8990.

Sincerely,
NORTHERN REGION

Re: Residual Ground Water Contamination
Marengo Oil
S.T.H. 13 and Poynette Street
Marengo, WI 54855
WDNR BRRTS No. 03-02-000444
COMM PECFA No. 54855-999-22

Dear Mr. Adler:

Ground water contamination that appears to have originated from the Marengo Oil site located along S.T.H 13 and Poynette Street, Marengo, Wisconsin, has migrated onto your property. The levels of petroleum contamination in the ground water on your property are above the state ground water enforcement standards found in chapter NR 140, Wisconsin Administrative Code. However, the environmental consultants who investigated this contamination informed me that this ground water contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the cleanup at this site will meet the requirements for case closure that are found in chapter NR 726 and Comm 46, Wisconsin Administrative Code. I will be requesting that the Wisconsin Department of Natural Resources accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the Department will not be requiring any further investigation or cleanup action to be taken, other than the reliance on natural attenuation. A copy of a "Fact Sheet" prepared by the Wisconsin Department of Natural Resources (WDNR) pertaining to natural attenuation is enclosed along with a map showing the extent of contamination and a copy of the legal descriptions for the affected properties.

Because you are not the responsible party for the cleanup of this contamination, neither you nor any subsequent owner of your property will be held responsible for investigation or cleanup of this ground water contamination, as long as you and any subsequent owners comply with the requirements of section 292.13, Wisconsin Statutes, including allowing access to your property for environmental investigation or cleanup if access is required. For further information on the requirements of section 292.13, Wisconsin Statutes, you may call 1-800-367-6076 for calls originating in Wisconsin, or 608-264-6020 if you are calling from out of state or within the Madison area, to obtain a copy of the Department of Natural Resources' publication #RR-589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination.

The Department of Natural Resources will not review my closure request for at least 30 days after the date of this letter. As an affected property owner, you have a right to contact the Department to provide any technical information you may have that indicates closure should not

Mr. Neil Adler
November 12, 2003
Page 2 of 2

be granted for this site. If you would like to submit any information to the Department of Natural Resources relevant to this closure request, you should mail that information to:

Mr. Chris Saari
Wisconsin Department of Natural Resources
2501 Golf Road
Ashland, WI 54806

If this case is closed, all properties within the site boundaries where ground water contamination exceeds chapter NR 140 ground water enforcement standards will be listed on the Department of Natural Resources' Geographic Information System (GIS) Registry of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where ground water contamination above chapter NR 140 enforcement standards was found at the time the case was closed. This GIS Registry will be available to the general public on the Department of Natural Resources' Internet website. Please review the enclosed legal description of your property and notify me within the next 30 days if the legal description is incorrect.

Should you or any subsequent property owner wish to construct or reconstruct a well on your property, special well construction standards may be necessary to protect the well from the residual ground water contamination. Any well driller who proposes to construct a well on your property in the future will first need to call Digger's Hotline (1-800-242-8511) if your property is located outside the service area of a municipally owned water system, or contact the Drinking Water program within the Department of Natural Resources if your property is located within the designated service area of a municipally owned water system, to determine if there is a need for special well construction standards.

When the Department makes a decision on my closure request, it will be documented in a letter. If the Department grants closure, you may obtain a copy of this letter by requesting a copy from me, by writing to the agency address given above, or by accessing the DNR GIS Registry of Closed Remediation Sites on the internet at www.dnr.state.wi.us/org/at/et/geo/gwur. A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

If you need more information, you may contact me at P.O. Box 68, Marengo, WI 54855, (telephone no. 715-278-3231), or you may contact Chris Saari at the address shown above (telephone no. 715-685-2900).

Sincerely,

A handwritten signature in black ink, appearing to read "Jeff Eid". The signature is stylized and includes a small arrow pointing to the right.

Page 2 of 2

be granted for this site. If you would like to submit any information to the Department of Natural Resources relevant to this closure request, you should mail that information to:

Mr. Chris Saari
Wisconsin Department of Natural Resources
2501 Golf Road
Ashland, WI 54806

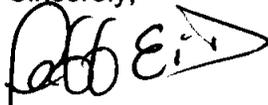

If this case is closed, all properties within the site boundaries where ground water contamination exceeds chapter NR 140 ground water enforcement standards will be listed on the Department of Natural Resources' Geographic Information System (GIS) Registry of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where ground water contamination above chapter NR 140 enforcement standards was found at the time the case was closed. This GIS Registry will be available to the general public on the Department of Natural Resources' Internet website. Please review the enclosed legal description of your property and notify me within the next 30 days if the legal description is incorrect.

Should you or any subsequent property owner wish to construct or reconstruct a well on your property, special well construction standards may be necessary to protect the well from the residual ground water contamination. Any well driller who proposes to construct a well on your property in the future will first need to call Digger's Hotline (1-800-242-8511) if your property is located outside the service area of a municipally owned water system, or contact the Drinking Water program within the Department of Natural Resources if your property is located within the designated service area of a municipally owned water system, to determine if there is a need for special well construction standards.

When the Department makes a decision on my closure request, it will be documented in a letter. If the Department grants closure, you may obtain a copy of this letter by requesting a copy from me, by writing to the agency address given above, or by accessing the DNR GIS Registry of Closed Remediation Sites on the internet at www.dnr.state.wi.us/org/at/et/geo/gwur. A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

If you need more information, you may contact me at P.O. Box 68, Marengo, WI 54855, (telephone no. 715-278-3231), or you may contact Chris Saari at the address shown above (telephone no. 715-685-2900).

Sincerely,

A handwritten signature in black ink that reads "Jeff Eid". The signature is stylized and includes a large, sweeping flourish that extends to the right.

Re: Residual Soil and Ground Water Contamination
Marengo Oil
S.T.H 13 and Poynette Street
Marengo, WI 54855
WDNR BRRTS No. 03-02-000444
COMM PECFA No. 54855-999-22

Dear Mr. Shields:

Ground water contamination that appears to have originated from the Marengo Oil site located along S.T.H. 13 and Poynette Street, Marengo, Wisconsin, has migrated onto the right-of-way of Poynette Street and under Poynette Street. The levels of benzene contamination in the ground water and soil within the right-of-way and under Poynette Street are above the state ground water and soil standards. The attached figure is an isoconcentration map of benzene (ug/L) concentrations for the Marengo Oil site. However, the environmental consultants who investigated this contamination informed me that this ground water and soil contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the cleanup at this site will meet the requirements for case closure that are found in chapter NR 726 and Comm 46, Wisconsin Administrative Code. I will be requesting that the Wisconsin Department of Natural Resources accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the Department will not be requiring any further investigation or cleanup action to be taken, other than the reliance on natural attenuation

Because the source of contamination is not on your property, neither you nor any subsequent owner of your property will be held responsible for investigation or cleanup of this ground water contamination, as long as you and any subsequent owners comply with the requirements of section 292.13, Wisconsin Statutes, including allowing access to your property for environmental investigation or cleanup if access is required. For further information on the requirements of section 292.13, Wisconsin Statutes, you may call 1-800-367-6076 for calls originating in Wisconsin, or 608-264-6020 if you are calling from out of state or within the Madison area, to obtain a copy of the Department of Natural Resources' publication #RR-589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination.

The Department of Natural Resources will not review my closure request for at least 30 days after the date of this letter. As an affected property owner, you have a right to contact the Department to provide any technical information you may have that indicates closure should not be granted for this site. If you would like to submit any information to the Department of Natural Resources relevant to this closure request, you should mail that information to:
