This Adobe Fillable form is intended to provide a list of information that is required for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request. The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

BRRTS #: 03-13-220609

PARCEL ID #: 225/0609-164-8410-1

ACTIVITY NAME: DRS Limited

WTM COORDINATES: X: 566663 Y: 280120

CLOSURE DOCUMENTS (the Department adds these items to the final GIS packet for posting on the Registry)

- Closure Letter**
- Maintenance Plan** (if activity is closed with a land use limitation or condition (land use control) under s. 292.12, Wis. Stats.)
- Conditional Closure Letter**
- Certificate of Completion (COC)** for VPLE sites

SOURCE LEGAL DOCUMENTS

- Deed:** The most recent deed as well as legal descriptions, for the **Source Property** (where the contamination originated). Deeds for other, off-source (off-site) properties are located in the **Notification** section.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Certified Survey Map:** A copy of the certified survey map or the relevant section of the recorded plat map for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map. (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).
Figure #: **Title:**
- Signed Statement:** A statement signed by the Responsible Party (RP), which states that he or she believes that the attached legal description accurately describes the correct contaminated property.

MAPS (meeting the visual aid requirements of s. NR 716.15(2)(h))

Maps must be no larger than 8.5 x 14 inches unless the map is submitted electronically.

- Location Map:** A map outlining all properties within the contaminated site boundaries on a U.S.G.S. topographic map or plat map in sufficient detail to permit easy location of all parcels. If groundwater standards are exceeded, include the location of all potable wells within 1200 feet of the site.
Note: Due to security reasons municipal wells are not identified on GIS Packet maps. However, the locations of these municipal wells must be identified on Case Closure Request maps.
Figure #: 1 **Title:** Site Location Map
- Detailed Site Map:** A map that shows all relevant features (buildings, roads, individual property boundaries, contaminant sources, utility lines, monitoring wells and potable wells) within the contaminated area. This map is to show the location of all contaminated public streets, and highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding a ch. NR 140 Enforcement Standard (ES), and/or in relation to the boundaries of soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Levels (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: 2 **Title:** Site Layout/Residual Contamination
- Soil Contamination Contour Map:** For sites closing with residual soil contamination, this map is to show the location of all contaminated soil and a single contour showing the horizontal extent of each area of contiguous residual soil contamination that exceeds a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: 3 **Title:** Soil Contamination and Sample Locations

BRRTS #: 03-13-220609

ACTIVITY NAME: DRS Limited

MAPS (continued)

- Geologic Cross-Section Map:** A map showing the source location and vertical extent of residual soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL). If groundwater contamination exceeds a ch. NR 140 Enforcement Standard (ES) when closure is requested, show the source location and vertical extent, water table and piezometric elevations, and locations and elevations of geologic units, bedrock and confining units, if any.

Figure #: 4 Title: Cross-Section

Figure #: Title:

- Groundwater Isoconcentration Map:** For sites closing with residual groundwater contamination, this map shows the horizontal extent of all groundwater contamination exceeding a ch. NR140 Preventive Action Limit (PAL) and an Enforcement Standard (ES). Indicate the direction and date of groundwater flow, based on the most recent sampling data.

Note: This is intended to show the total area of contaminated groundwater.

Figure #: Title:

- Groundwater Flow Direction Map:** A map that represents groundwater movement at the site. If the flow direction varies by more than 20° over the history of the site, submit 2 groundwater flow maps showing the maximum variation in flow direction.

Figure #: Title:

Figure #: Title:

TABLES (meeting the requirements of s. NR 716.15(2)(h)(3))

Tables must be no larger than 8.5 x 14 inches unless the table is submitted electronically. Tables must not contain shading and/or cross-hatching. The use of **BOLD** or *ITALICS* is acceptable.

- Soil Analytical Table:** A table showing remaining soil contamination with analytical results and collection dates.
Note: This is one table of results for the contaminants of concern. Contaminants of concern are those that were found during the site investigation, that remain after remediation. It may be necessary to create a new table to meet this requirement.

Table #: 1 Title: Summary of Soil Analytical Data

- Groundwater Analytical Table:** Table(s) that show the most recent analytical results and collection dates, for all monitoring wells and any potable wells for which samples have been collected.

Table #: Title:

- Water Level Elevations:** Table(s) that show the previous four (at minimum) water level elevation measurements/dates from all monitoring wells. If present, free product is to be noted on the table.

Table #: Title:

IMPROPERLY ABANDONED MONITORING WELLS

For each monitoring well not properly abandoned according to requirements of s. NR 141.25 include the following documents.

Note: If the site is being listed on the GIS Registry for only an improperly abandoned monitoring well you will only need to submit the documents in this section for the GIS Registry Packet.

- Not Applicable**
- Site Location Map:** A map showing all surveyed monitoring wells with specific identification of the monitoring wells which have not been properly abandoned.
Note: If the applicable monitoring wells are distinctly identified on the Detailed Site Map this Site Location Map is not needed.
- Figure #: Title:**
- Well Construction Report:** Form 4440-113A for the applicable monitoring wells.
- Deed:** The most recent deed as well as legal descriptions for each property where a monitoring well was not properly abandoned.
- Notification Letter:** Copy of the notification letter to the affected property owner(s).

BRRTS #: 03-13-220609

ACTIVITY NAME: DRS Limited

NOTIFICATIONS

Source Property

- Letter To Current Source Property Owner:** If the source property is owned by someone other than the person who is applying for case closure, include a copy of the letter notifying the current owner of the source property that case closure has been requested.
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying current source property owner.

Off-Source Property

Group the following information per individual property and label each group according to alphabetic listing on the "Impacted Off-Source Property" attachment.

- Letter To "Off-Source" Property Owners:** Copies of all letters sent by the Responsible Party (RP) to owners of properties with groundwater exceeding an Enforcement Standard (ES), and to owners of properties that will be affected by a land use control under s. 292.12, Wis. Stats.
Note: Letters sent to off-source properties regarding residual contamination must contain standard provisions in Appendix A of ch. NR 726.
Number of "Off-Source" Letters:
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying any off-source property owner.
- Deed of "Off-Source" Property:** The most recent deed(s) as well as legal descriptions, for all affected deeded **off-source property(ies)**. This does not apply to right-of-ways.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Letter To "Governmental Unit/Right-Of-Way" Owners:** Copies of all letters sent by the Responsible Party (RP) to a city, village, municipality, state agency or any other entity responsible for maintenance of a public street, highway, or railroad right-of-way, within or partially within the contaminated area, for contamination exceeding a groundwater Enforcement Standard (ES) and/or soil exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL).
Number of "Governmental Unit/Right-Of-Way Owner" Letters:

RE: **Final Closure**
Commerce # 53711-5404-34-A DNR BRRTS # 03-13-220609
DRS Ltd., 2534 South Fish Hatchery Road, Fitchburg

Dear Mr. Strassman:

The Wisconsin Department of Commerce (Commerce) has received all items required as conditions for closure of the site referenced above. This site is now listed as "closed" on the Commerce database and will be included on the Department of Natural Resources (DNR) Geographic Information System (GIS) Registry of Closed Remediation Sites to address residual soil and groundwater contamination. To review all sites on the GIS Registry web page, visit <http://dnr.wi.gov/org/aw/rr/gis/index.htm>. If you intend to construct or reconstruct a potable well on this property, you must get prior DNR approval.

All current and future owners and occupants of the property need to be aware that excavation of contaminated soil may pose a hazard. Special precautions may be needed to prevent inhalation, ingestion or dermal contact with the residual contamination when it is removed. If soil is excavated, the property owner at the time of excavation must have the soil sampled and analyzed to determine if residual contamination remains. If sampling confirms that contamination is present, the property owner at the time of excavation must determine whether the material would be considered solid or hazardous waste and ensure that any storage, treatment or disposal is in compliance with applicable State and federal regulations.

Depending on site-specific conditions, construction over contaminated materials may result in vapor migration into enclosed structures or along newly placed underground utility lines. The potential for vapor inhalation and mitigation should be evaluated when planning any future redevelopment, and measures should be taken to ensure the continued protection of public health, safety, welfare and the environment at the site.

Costs for sampling and excavation activities conducted after case closure are not eligible for PECFA reimbursement. However, if it is determined that any undisturbed remaining petroleum contamination poses a threat, the case may be reopened and further investigation or remediation may be required. If this case is reopened, any original claim under the PECFA fund would also reopen and you may apply for assistance to the extent of remaining eligibility. It is in your best interest to keep all documentation related to environmental activities at your site.

Thank you for your efforts to bring this case to closure. If you have any questions, please contact me in writing at the letterhead address or by telephone at (608) 261-5405.

Sincerely,

Jon Heberer
Senior Hydrogeologist

RE: **GIS Registry Fee Payment and Deed Assurance Statement Required**

Commerce # 53711-5404-34-A DNR BRRTS # 03-13-220609
DRS, Ltd., 2534 South Fish Hatchery Road, Fitchburg

Dear Mr. Strassman:

On November 1, 2001, the Wisconsin Department of Commerce (Commerce) granted conditional closure for the site referenced above. As a condition of closure, a deed notice was to be filed at the County Register of Deeds Office to address residual soil contamination. On March 23, 2009 Commerce PECFA Field Auditor Kramer visited the Dane County Register of Deeds and confirmed that the deed notice had not been filed, as of that date. Due to changes in regulatory requirements, the option of filing a deed notice is no longer available. The state now requires inclusion of sites such as this on the Wisconsin Department of Natural Resource's (DNR's) Geographic Information System (GIS) Registry to address residual contamination. As indicated to you in telephone contacts with Mr. Kramer, Commerce has compiled a majority of the GIS Registry documents (draft packet enclosed for your reference) from information in our case file; however, two items must be provided by you.

- 1) A check in the amount of \$200.00 is required to be sent to the Wisconsin Department of Natural Resources for their maintenance of the Registry database. The check must include the #03-13-220609 in the memo line. A stamped envelope with the DNR's mailing address is provided for your convenience.
- 2) A signed copy of the enclosed deed assurance statement must be returned to Commerce at the letterhead address (A stamped envelope is provided for your convenience). The assurance statement indicates that the deed (a copy of which is enclosed), is accurate to the best of your knowledge.

If you provide the requested items by **October 11, 2009**, a final case closure letter will be issued. If not, Commerce can pursue enforcement actions which could result in substantial financial penalties.

Thank you for your anticipated efforts to move this case to final closure. If you have any questions, please contact me in writing at the letterhead address or by telephone at (414) 357-4701.

Sincerely,

A handwritten signature in black ink that reads "Lee R. Delcore". The signature is written in a cursive, flowing style.

Re: **Case Closure - Conditional**

Commerce # 53711-5404-34-A; WDNR BRRTS: 03-13-220609
DRS, Ltd., 2534 South Fish Hatchery Road, Madison, WI

One 2000 gallon diesel and one 2000 gallon gasoline USTs removed on January 26, 2001

Dear Mr. Strassman:

The Wisconsin Department of Commerce (Commerce) PECFA Site Review staff has reviewed the case file for the above referenced site for case closure. The review was completed in response to the additional information provided by Seymour Environmental Services, Inc. dated October 18, 2001.

Using the standards established in the NR 700 series, Wisconsin Administrative Code (Wis. Adm. Code), Commerce has determined that this site does not pose a significant threat to the environment and human health. It is understood that residual soil contamination remains on the source property. No further investigation or remediation is necessary.

According to the documents reviewed, soil containing elevated concentrations of petroleum compounds above NR 720.09 residual contaminant levels remains at this site, primarily in the former UST area. Soil contamination exists between 9 feet and 29 feet below land surface. Gasoline range organic compounds exist at concentrations of 970 mg/kg. In addition, concentrations of benzene (0.960 mg/kg) and toluene (1.996 mg/kg) exist at the site. If petroleum contaminated subsurface soil is excavated, it would have to be managed according to all applicable regulations and standards.

The following condition must be satisfied in order to obtain final closure:

1. A notification must be placed on the property deed in order to document the existence of petroleum impacted soil at the site. To document that this condition has been met, please submit a copy of the deed notification that contains the County Register of Deeds' recording information to Commerce. An example of a "Notice of Contamination to Property" is enclosed for your use. If you wish to modify the language, a copy must be submitted to this office for approval prior to filing with the county Register of Deeds. If an electronic copy of the "Notice of Contamination to Property" is desired, you may contact Commerce and a copy will be forwarded to you.

The requested information must be submitted by you or your consultant before this case can be officially listed as "closed" on the Wisconsin Department of Commerce and Wisconsin Department of Natural Resources databases.

Mr. David Strassman

Commerce # 53711-5405-34; WDNR BRRTS: 03-13-220609
DRS, Ltd., 2534 South Fish Hatchery Road, Madison, WI

November 1, 2001
Page 2

If, in the future, site conditions indicate that any contamination that remains poses a threat, the need for further investigation and remediation would be determined and required, if necessary. If subsequent information indicates a need to reopen this case, any original claim under the PECFA fund would also reopen and you may apply for assistance to the extent of remaining eligibility.

In the event that any contaminated soil is disturbed, appropriate measures must be implemented to manage any contamination following all applicable regulations and standards.

If you have any questions, please contact me at (608) 261-5405 or in writing at the letterhead address.

Sincerely,

Jon Heberer
Hydrogeologist
