***Site Specific Residual Contaminant Level*

This Adobe Fillable form is intended to provide a list of information that is required for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request. The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

BRRTS #: 03-23-217972

Parcel ID #: 2316106330000

ACTIVITY NAME: Zraggen Property

WTM COORDINATES: X: 550080 Y: 260288

CLOSURE DOCUMENTS (the Department add these items to the final GIS packet for posting on the Registry)

Closure Letter

Maintenance Plan (if activity is closed with a land use limitation or condition (land use control) under s. 292.12, Wis. Stats.)

Conditional Closure Letter

Certificate of Completion (COC) for VPLE sites

SOURCE LEGAL DOCUMENTS

Deed: The most recent deed as well as legal descriptions, for the **Source Property** (where the contamination originated). Deeds for other, off-source (off-site) properties are located in the **Notification** section. **Note:** *If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.*

Certified Survey Map: A copy of the certified survey map or the relevant section of the recorded plat map for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map. (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).

Figure #: Title: **Zraggen Property**

Signed Statement: A statement signed by the Responsible Party (RP), which states that he or she believes that the attached legal description accurately describes the correct contaminated property.

MAPS (meeting the visual aid requirements of s. NR 716.15(2)(h))

Maps must be no larger than 8.5 X 14 inches unless the map is submitted electronically.

Location Map: A map outlining all properties within the contaminated site boundaries on a U.S.G.S. topographic map or plat map in sufficient detail to permit easy location of all parcels. If groundwater standards are exceeded, include the location of all potable wells within 1200 feet of the site.

Note: *Due to security reasons municipal wells are not identified on GIS Packet maps. However, the locations of these municipal wells must be identified on Case Closure Request maps.*

Figure #: Title: **Site Location Map**

Detailed Site Map: A map that shows all relevant features (buildings, roads, individual property boundaries, contaminant sources, utility lines, monitoring wells and potable wells) within the contaminated area. This map is to show the location of all contaminated public streets, and highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding a ch. NR 140 Enforcement Standard (ES), and/or in relation to the boundaries of soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Levels (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.

Figure #: Title: **Soil Boring and Monitoring Well Locations**

Soil Contamination Contour Map: For sites closing with residual soil contamination, this map is to show the location of all contaminated soil and a single contour showing the horizontal extent of each area of contiguous residual soil contamination that exceeds a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.

Figure #: Title: **Soil Contamination Map (March 26, 2009)**

BRRTS #: 03-23-217972

ACTIVITY NAME: Zraggen Property

MAPS (continued)

X **Geologic Cross-Section Map:** A map showing the source location and vertical extent of residual soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL). If groundwater contamination exceeds a ch. NR 140 Enforcement Standard (ES) when closure is requested, show the source location and vertical extent, water table and piezometric elevations, and locations and elevations of geologic units, bedrock and confining units, if any.

Figure #: Title: **Hydrogeologic Cross Section A - A'**

Figure #: Title:

X **Groundwater Isoconcentration Map:** For sites closing with residual groundwater contamination, this map shows the horizontal extent of all groundwater contamination exceeding a ch. NR140 Preventive Action Limit (PAL) and an Enforcement Standard (ES). Indicate the direction and date of groundwater flow, based on the most recent sampling data. Note: This is intended to show the total area of contaminated groundwater.

Figure #: Title: **Groundwater Contamination Map (March 26, 2009)**

X **Groundwater Flow Direction Map:** A map that represents groundwater movement at the site. If the flow direction varies by more than 20° over the history of the site, submit 2 groundwater flow maps showing the maximum variation in flow direction.

Figure #: Title: **Groundwater Contour Map (3/26/2009)**

Figure #: Title: **Groundwater Flow Direction (March 4, 2005)**

TABLES (meeting the requirements of s. NR 716.15(2)(h))

Tables must be no larger than 8.5 x 14 inches unless the table is submitted electronically. Tables must not contain shading and/or cross-hatching. The use of **BOLD** or *ITALICS* is acceptable.

X **Soil Analytical Table:** A table showing remaining soil contamination with analytical results and collection dates. Note: This is one table of results for the contaminants of concern. Contaminants of concern are those that were found during the site investigation, that remain after remediation. It may be necessary to create a new table to meet this requirement.

Figure #: Title: **Soil Sample Analytical Results and Soil Excavation Data Table**

X **Groundwater Analytical Table:** Table(s) that show the most recent analytical results and collection dates, for all monitoring wells and any potable wells for which samples have been collected.

Figure #: Title: **Groundwater Analytical Results Summary**

X **Water Level Elevations:** Table(s) that show the previous four (at minimum) water level elevation measurements/dates from all monitoring wells. If present, free product is to be noted on the table.

Figure #: Title: **Watertable Elevations Table**

IMPROPERLY ABANDONED MONITORING WELLS

For each monitoring well not properly abandoned according to requirements of s. NR 141.25 include the following documents.

Note: *If the site is being listed on the GIS Registry for only an improperly abandoned monitoring well you will only need to submit the documents in this section for the GIS Registry Packet.*

X **Not Applicable**

_____ **Site Location Map:** A map showing all surveyed monitoring wells with specific identification of the monitoring wells which have not been properly abandoned.

Note: If the applicable monitoring wells are distinctly identified on the Detailed Site Map this Site Location Map is not needed.

Figure #: Title:

_____ **Well Construction Report:** Form 4440-113A for the applicable monitoring wells.

_____ **Deed:** The most recent deed as well as legal descriptions for each property where a monitoring well was not properly abandoned.

_____ **Notification Letter:** Copy of the notification letter to the affected property owner(s).

BRRTS #: 03-23-217972

ACTIVITY NAME: Zraggen Property

NOTIFICATIONS

Source Property

N/A Letter To Current Source Property Owner: If the source property is owned by someone other than the person who is applying for case closure, include a copy of the letter notifying the current owner of the source property that case closure has been requested.

N/A Return Receipt/Signature Confirmation: Written proof of date on which confirmation was received for notifying current source property owner.

Off-Source Property

Group the following information per individual property and label each group according to alphabetic listing on the "Impacted Off-Source Property" attachment.

N/A Letter To "Off-Source" Property Owners: Copies of all letters sent by the Responsible Party (RP) to owners of properties with groundwater exceeding an Enforcement Standard (ES), and to owners of properties that will be affected by a land use control under s. 292.12, Wis. Stats.

Note: Letters sent to off-source properties regarding residual contamination must contain standard provisions in Appendix A of ch. NR 726.

Number of "Off-Source" Letters:

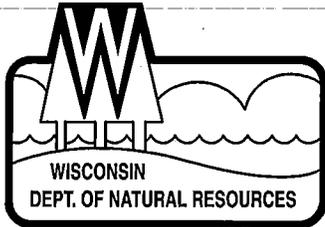

N/A Return Receipt/Signature Confirmation: Written proof of date on which confirmation was received for notifying any off-source property owner.

N/A Deed of "Off-Source" Property: The most recent deed(s) as well as legal descriptions, for all affected deeded **off-source** property(ies). This does not apply to right-of-ways.

Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.

X Letter To "Governmental Unit/Right-Of-Way" Owners: Copies of all letters sent by the Responsible Party (RP) to a city, village, municipality, state agency or any other entity responsible for maintenance of a public street, highway, or railroad right-of-way, within or partially within the contaminated area, for contamination exceeding a groundwater Enforcement Standard (ES) and/or soil exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL).

Number of "Governmental Unit/Right-Of-Way Owner" Letters: Two (2)

New Glarus, WI 53574

SUBJECT: Final Case Closure with Continuing Obligations
Zraggen Property, 2 Sixth Avenue, New Glarus, WI
WDNR BRRTS Activity #: 03-23-217972

Dear Mr. Zraggen:

On December 18, 2009, the South Central Regional Closure Committee reviewed the above referenced case for closure. This committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On December 22, 2009, you were notified that the Closure Committee had granted conditional closure to this case.

On February 17, 2010 the Department received well abandonment documentation indicating that you have complied with the requirements for final closure.

Based on the correspondence and data provided, it appears that your case meets the closure requirements in ch. NR 726, Wisconsin Administrative Code. The Department considers this case closed and no further investigation or remediation is required at this time, however, you and future property owners must comply with certain continuing obligations as explained in this letter.

GIS Registry

This site will be listed on the Remediation and Redevelopment Program's GIS Registry. The specific reasons are summarized below:

- Residual soil contamination exists that must be properly managed should it be excavated or removed
- Groundwater contamination is present above Chapter NR 140 enforcement standards

This letter and information that was submitted with your closure request application will be included on the GIS Registry. To review the sites on the GIS Registry web page, visit the RR Sites Map page at <http://dnr.wi.gov/org/aw/rr/gis/index.htm>. If the property is listed on the GIS Registry because of remaining contamination and you intend to construct or reconstruct a well, you will need prior Department approval in accordance with s. NR 812.09(4)(w), Wis. Adm. Code. To obtain approval,

Form 3300-254 needs to be completed and submitted to the DNR Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line <http://dnr.wi.gov/org/water/dwg/3300254.pdf> or at the web address listed above for the GIS Registry.

Closure Conditions

Please be aware that pursuant to s. 292.12 Wisconsin Statutes, compliance with the requirements of this letter is a responsibility to which you and any subsequent property owners must adhere. You must pass on the information about these continuing obligations to the next property owner or owners. If these requirements are not followed or if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, welfare, or the environment, the Department may take enforcement action under s. 292.11 Wisconsin Statutes to ensure compliance with the specified requirements, limitations or other conditions related to the property or this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code. The Department intends to conduct inspections in the future to ensure that the conditions included in this letter are carried out.

Residual Soil Contamination

Residual soil contamination remains beneath the southern half of the site property and extends beneath 6th Avenue as indicated on the attached map and in the information submitted to the Department of Natural Resources. If soil in the specific locations described above is excavated in the future, then pursuant to ch. NR 718 or, if applicable, ch. 289, Stats., and chs. 500 to 536, the property owner at the time of excavation must sample and analyze the excavated soil to determine if residual contamination remains. If sampling confirms that contamination is present the property owner at the time of excavation will need to determine whether the material is considered solid or hazardous waste and ensure that any storage, treatment or disposal is in compliance with applicable standards and rules. In addition, all current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard and as a result special precautions may need to be taken to prevent a direct contact health threat to humans.

Soil sampling indicates that polycyclic aromatic hydrocarbon (PAH) contamination exists within four feet of the ground surface in concentrations exceeding suggested generic soil cleanup levels for PAHs (consistent with the methodology used in developing the generic RCLs in ch. NR 720, Wis. Adm. Code, and with the procedures outlined in s. NR 720.19(4)-(5), Wis. Adm. Code.) The Closure Committee is not currently requiring any additional work to address this threat. However, prior to any future redevelopment or land use change at the site, the property owner must provide notification to the Department of Natural Resources and work with the Department to determine what remedial action or land use controls are necessary to meet all applicable soil cleanup standards. In addition, all current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard and as a result special precautions may need to be taken during excavation activities to prevent a health threat to humans

Residual Groundwater Contamination

Groundwater impacted by petroleum contamination greater than enforcement standards set forth in ch. NR140, Wis. Adm. Code, is present both on this contaminated property and off this contaminated property. Off-property owners have been notified of the presence of groundwater contamination. For more detailed information regarding the locations where groundwater samples have been collected (i.e., monitoring well locations) and the associated contaminant concentrations, refer to the Remediation and Redevelopment Program's GIS Registry at the RR Sites Map page at <http://dnr.wi.gov/org/aw/rr/gis/index.htm>.

Dewatering Permits

The Department's Watershed Management Program regulates point source discharges of contaminated water, including discharges to surface waters, storm sewers, pits or to the ground surface. This includes discharges from construction related dewatering activities, including utility and building construction.

Based on the concentrations of contaminants remaining in groundwater at this location, it appears likely that dewatering activities would require a permit from the Watershed Management Program. If you or any other person plan to conduct such activities, you or that person must contact that program, and if necessary, apply for the necessary discharge permit. Additional information regarding discharge permits is available at <http://www.dnr.state.wi.us/org/water/wm/www/>

Post-Closure Notification Requirements

In accordance with ss, 292.12 and 292.13, Wis. Stats., you must notify the Department before making changes that affect or relate to the conditions of closure in this letter. For this case, examples of changed conditions requiring prior notification include, but are not limited to:

- Development, construction or other changes, including zoning changes, that change the land use at the site

Please send written notifications in accordance with the above requirements to the address on this letterhead, to the attention of Wendy Weihemuller, Environmental Program Associate.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this closure decision or anything outlined in this letter, please contact me at 608-275-3220.

Sincerely,

Rachel Greve
Hydrogeologist
South Central Remediation & Redevelopment Program

Subject: Conditional Closure Decision,
With Requirements to Achieve Final Closure
Zraggen Property, 2 Sixth Avenue, New Glarus, Wisconsin
WDNR BRRTS Activity # 03-23-217972

Dear Mr. Zraggen:

On December 18, 2009, the South Central Regional Closure Committee reviewed your request for closure of the case described above. The Closure Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of the closure request, the Closure Committee has determined that the petroleum contamination on the site from the vicinity of the above-ground storage tanks formerly located on the property appears to have been investigated and remediated to the extent practicable under site conditions. Your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code and will be closed if the following conditions are satisfied:

Monitoring Well Abandonment

The monitoring wells at the site must be properly abandoned in compliance with ch. NR 141, Wis. Adm. Code. Documentation of well abandonment must be submitted to Rachel Greve on Form 3300-005 found at <http://dnr.wi.gov/org/water/dwg/gw/> or provided by the Department of Natural Resources.

Purge Water, Waste, and Soil Pile Removal

Any remaining purge water, waste and/or soil piles generated as part of site investigation or remediation activities must be removed from the site and disposed of or treated in accordance with Department of Natural Resources' rules. Once that work is completed, please send appropriate documentation regarding the treatment or disposal of the remaining purge water, waste and/or soil piles.

When the above conditions have been satisfied, please submit the appropriate documentation (for example, well abandonment forms, disposal receipts, copies of correspondence, etc.) to verify that applicable conditions have been met, and your case will be closed. Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the GIS Registry. To review the site on the GIS Registry web page, visit the RR Sites Map page at: <http://dnr.wi.gov/org/aw/rr/gis/index.htm>.

Section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement. If there is equipment purchased with PECFA funds remaining at the site, contact the Commerce PECFA Program to determine the method for salvaging the equipment.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at 608-275-3220.

Sincerely,

Rachel Greve
Hydrogeologist
Bureau for Remediation & Redevelopment

DOCUMENT NO. 318666	STATE BAR OF WISCONSIN FORM 1 + 1982 WARRANTY DEED	THIS SPACE RESERVED FOR RECORDING DATA
-------------------------------	---	---

THIS DEED, made between David A. Husted, Grantor and Tony W. Zraggen, a single person, Grantee
Witnesseth, That the said Grantor, for a valuable consideration convey to Grantee the following described real estate in Green County, State of Wisconsin:

REGISTER OF DEEDS OFFICE }
GREEN COUNTY WISCONSIN } SS
RECORDED April 26 1989
AT 10:30 A.M. VOL 424 Page 793
MARDELL CROTTY REGISTER

A parcel of land 75 feet east and West, more or less by 150 feet north and south, more or less in parallelogramic form, situated in the Southwest Quarter of the Southwest Quarter of the Southeast Quarter of Section 14, Town 4 North, Range 7 East, being a part of Outlot No. 208 of the Assessor's Plat of the Village of New Glarus, Green County, Wisconsin, and lying between the Chicago, Milwaukee, and St. Paul Railway Co. right-of-way on the west and a public highway on the East, bounded on the South by a public highway and extending northerly from the centerline thereof 183 feet, more particularly described as commencing at the corner formed by the east line of the Chicago, Milwaukee and St. Paul Railway Co. right-of-way, as described in the deed recorded in Vol. 64 of Deeds, Page 104 in the Register's office for Green County, Wisconsin, and the north line of the public highway, thence in an easterly direction 75 feet more or less along the right-of-way of the said highway to the west line of the highway bordering said parcel on the east, thence in a northerly direction along the said highway 150 feet more or less to a point that is 183 feet north of the centerline of the public highway bordering said parcel on the south, thence in a westerly direction 75 feet to the said east line of the Chicago, Milwaukee and St. Paul Railway Co. right-of-way and a point which is 183 feet north of the centerline of said public highway bordering said parcel on the south, and thence south 150 feet more or less to the place of beginning.

RETURN TO
Attorney Rex A. Ewald
916 - 17th Avenue
Monroe, WI 53566

This is not homestead property.

NOTES:

- Groundwater samples collected on October 18-19, 2001.
- Less than sign (<) indicates analyte not detected above laboratory level of detection (LOD).
LODs are present in analytical report in Appendix.
- nd = analyte not detected above LOD.
- na = analyte not analyzed.
- PVOC or VOC = petroleum volatile organic compounds or volatile organic compounds.
- PALs/ES = March 2000 Wisconsin Administrative Code NR 140 Groundwater Quality Preventive Action Limits/Enforcement Standards.
BOLD and LARGER FONT = analyte exceeds NR 140 ES.
- ne = PAL/ES not established for this parameter.
- [] = analyte detected above LOD but below LOQ.

New Glarus, WI 53574

Notification: Zraggen Property (BRRTS # 03-23-217972), Conditional Case Closure Notification

To whom it may Concern,

I am writing on behalf of Tony Zraggen to inform you that petroleum contaminated soil and groundwater from the Zraggen Property site, located at 2 Sixth Avenue (Hwy 39), New Glarus, Wisconsin, exists within the right-of-way of 6th Avenue (S.T.H. "39").

A Case Summary and Close Out Request is being submitted to the Wisconsin Department of Natural Resources for the Zraggen Property site. Case closure means that the Wisconsin Department of Natural Resources will not be requiring any further investigation or cleanup action to be taken. As part of the required closure documentation, you are hereby notified that residual petroleum contamination exists in soil and groundwater within the right-of-way of 6th Avenue to the south of the Zraggen site. This soil and groundwater contamination exists from approximately 4 to 8 feet below ground surface. We are enclosing a site map displaying inferred soil and groundwater contamination plumes.

If the contaminated soil or groundwater is encountered during future construction, it may pose inhalation or other direct contact hazards. Any contaminated soil or groundwater encountered will require sampling and analysis, as well as proper storage, treatment, and disposal of any excavated materials. We are enclosing site maps displaying inferred soil and groundwater contamination plumes.

If you have any questions, or require more detailed information, please contact me at METCO's La Crosse office (608-781-8879).

Sincerely,

A handwritten signature in black ink that reads "Jason T. Powell".

Jason T. Powell
Staff Scientist
