Dear Ms. Rehor:

On August 15, 2000 your site as described above was reviewed for closure by the Department of Natural Resources. The Department reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On 08/15/2000 this site was granted conditional closure.

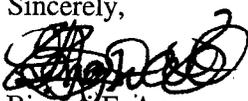

On Jan 12, 2004 the Department received correspondence indicating that you have complied with the conditions of closure. The conditions of closure were: to record a deed and groundwater use restriction, abandoning the monitoring wells on this site and submitting the well abandonment forms according to NR 141. Based on the correspondence and data provided, it appears that your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation or other action is required at this time.

Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Sites. Information that was submitted with your closure request application will be included on the registry. To review the sites on the GIS Registry web page, visit <http://gomapout.dnr.state.wi.us/org/at/et/geo/gwur/index.htm>.

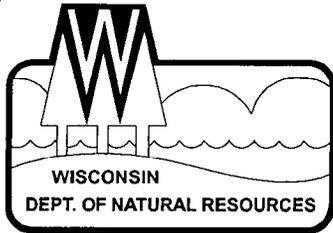

Please be aware that this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at (414) 263-8607.

Sincerely,

Binyoti F. Amungwafor

Subject: Request for Case Closure
OMC, 6101N. 64th Street, Milwaukee, WI 53218
FID #: 241006590, BRRTS #: 02-41-206114

Dear Mr. Rehor:

The Department of Natural Resources has received and reviewed your case closure request for the above-referenced site. The case was reviewed to determine whether or not the site qualified for close out under ch. NR 726, Wis. Adm. Code.

We are unable to grant case closure for the site until the following actions are taken at your property:

1. Site closure is conditioned upon the recording of a soil contamination deed restriction at the County Register of Deeds. The deed restriction is required to address residual soil contamination at the site that may pose a threat to human health by direct contact and/or a threat to groundwater quality. To that end, please submit a draft deed restriction that requires maintenance of the institutional control as required by s. NR 724.13(2), Wis. Adm. Code. A draft copy of the deed restriction that includes a certified survey map or a legal description of the location of soil contamination and institutional control as an attachment, along with a copy of the original property deed, should be sent to the Department for our review and approval prior to recording with the County Register of Deeds. The deed restriction should include reference to residual soil contamination potentially beneath the building and require that an investigation of contaminated soils be conducted and appropriate remedial action be taken **if** the soils become accessible in the future. The location and concentration of residual soil contamination should be included on the site map. The institutional control maintenance clause should include an inspection schedule, which requires repair, if necessary, to ensure that the institutional control acts as a barrier to direct contact and limits infiltration. You can download a model deed restriction at our website at www.dnr.state.wi.us/org/aw/rr/ to aid you in drafting the deed restriction. The model deed restriction can be found at the R&R Publications List under Technical Information for Cleanup menu under the title "Closure

Out Guidance on the Use of Deed and Groundwater Use Restrictions and Deed Notices (PUBL RR-606)".

2. Site closure is also conditioned upon the recording of a groundwater use restriction at the County Register of Deeds as required by s. NR 726.05(8), Wis. Adm. Code. The groundwater use restriction is a notice that is recorded with the County Register of Deeds informing future property owners that new potable well construction on the property needs the approval of the Department. To that end, please submit a draft groundwater use restriction to the Department for our review and approval prior to recording with the County Register of Deeds. The groundwater use deed restriction should include the location, type and concentration of contaminants and include a statement regarding natural attenuation of the plume. If at a later time you demonstrate that contaminant levels have fallen below the ch. NR 140, Wis. Adm. Code, groundwater quality standards, you may ask the Department to issue a written determination that you may file with the County Register of Deeds giving notice that the previously recorded groundwater use restriction is no longer required. As stated, above, you can download a model groundwater use restriction at our website to aid you in drafting the groundwater use restriction. The soil deed restriction and groundwater use restriction may be combined as one document.
3. Since your proposed remedial action relies on a performance standard for the final remedy, you will need to publish a class I public notice in a local paper, in accordance with s. NR 714.07(5), Wis. Adm. Code. Prior to publishing the class I notice, a draft copy of the public notice should be sent to the Department for our review and approval. Thereafter, proof of publication that includes an affidavit of printing and a copy of the dated tear sheet of the public notice should be submitted to the Department.
4. After you receive Department approval on the draft contaminated soil deed restriction and draft groundwater use restriction, you will need to send a copy of the recorded deed to the Department. To document that this condition is complied with, you will need to submit to the Department a copy of the recorded deed restriction and groundwater use restriction, with the recording information stamped on it, within 15 days after the County Register of Deeds returns the deed restriction to the property owner. The deed restriction may be amended in the future with the approval of the Department if conditions change at the site and the residual contamination has been remediated.
5. A final condition of closure is that the groundwater monitoring wells be abandoned in accordance with ch. NR 141, Wis. Adm. Code, and the completed abandonment forms are submitted to the Department.

Once the above-cited requirements have been satisfactorily met, the Department will concur with your consultant's recommendation that no further action is necessary at the site. However, the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare, or the environment.

Should you or your consultant have any questions, please feel free to call me at (414) 229-0849.
Thank you for the steps you are taking to restore the environment at this site.

Sincerely,

Checklist of Documents for GIS Registry Packet

WI DNR, Bureau for Remediation and Redevelopment, PUB-RR-688

(Include with closure request – please assemble in this order. *This checklist applies to closure requests for sites with groundwater exceeding ch. NR 140 standards and/or soil contamination exceeding ch. NR 720 generic or site specific residual contaminant levels (RCLs).*)

- ✓ One-time fee of \$250.00 for groundwater, and/or
 \$200 for soil, for each case closed, for maintenance of the registry.
- ✓ Copies of the most recent deed including legal descriptions, for all properties within or partially within the contaminated site boundaries. (Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.)
- ✓ A copy of the certified surveyed map or the relevant section of the recorded plat map for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map. (lots on subdivided or platted property (e.g. lot2 of xyz subdivision))
- ✓ Parcel identification number for each property, if the county in which the property is located uses parcel identification numbers. *on deed*
- ✓ Geographic position of all properties within or partially within the contaminated site boundaries. The coordinates need to be for a spot located at least 40 feet inside the property boundary. Refer to NR 716.15(2)(d)7, and (k). The coordinates must be in WTM91 projection. See the following WDNR website address for assistance: www.dnr.state.wi.us/org/at/et/geo/gwur/index.htm. *683147, 296964*
- ✓ A location map which outlines all properties within the contaminated site boundaries on a U.S.G.S. topographic map or plat map in sufficient detail to permit the easy location of all parcels. If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200 feet of the site. (If only one parcel, combine with next item.)
- ✓ A map of all contaminated properties within site boundaries, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. This map shall also show the location of all contaminated public streets, and highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 enforcement standards, and/or in relation to the boundaries of soil contamination exceeding generic or site-specific residual contaminant levels as determined under s. NR 720.09, 720.11 and 720.19.
- ✓ A table of the most recent analytical results, with sample collection dates: from all monitoring wells, and any potable wells for which samples have been collected for groundwater, and/or showing results for all contaminants found in pre-remedial sampling and in the most recent soil sampling event, for soils (without shading/crosshatching).
- ✓ An isoconcentration map, if required as part of the site investigation (SI), of the contaminated properties within the site boundaries. The map should include the areal extent of groundwater contamination exceeding PALs and ESs, groundwater flow directions based on the most recent data, and sample collection dates. If an isoconcentration map was not required as part of the SI, substitute a map showing the horizontal extent of contamination, based on the most recent data.
- ✓ A table of the previous 4 water level elevation measurements from all monitoring wells, at a minimum, with the date measurements were made, is to be included. If present, free product is to be noted on the table. In addition, a groundwater flow direction map, representative of groundwater movement at the site. If the flow direction varies by more than 20° over the history of the site, 2 groundwater flow maps showing the maximum variation in flow direction are to be submitted.
- NA For sites closing with residual soil contamination, include a map showing the location of all soil samples and a single contour showing the horizontal extent of each area of contiguous residual soil contamination that exceeds generic or site specific residual contaminant levels.
- ✓ A geologic cross section, if required as part of the SI, showing vertical extent and location of residual soil contamination exceeding generic or site specific RCLs and residual groundwater contamination, source extent and location; isoconcentrations for all groundwater contaminants that exceed PALs that remain when closure is requested; water table and piezometric elevations, and the location and elevation of geologic units, bedrock, and confining units, if any.
- ✓ A statement signed by the responsible party, which states that he or she believes that the legal descriptions attached to the statement are complete and accurate. (The point here is that the legal descriptions are describing the correct (i.e. contaminated) properties.)
- NA A copy of the letters sent by the RP to all owners of properties with groundwater exceeding ESs (including the current source-property owner, if the RP is not the current source-property owner.) (Off source properties are listed separately with a link to the source property.)
- NA A copy of all written notifications provided (to City/village/municipality/state agency or other responsible for maintenance) of a public street or highway or railroad right-of-way, within or partially within the boundaries of the contaminated site, for contamination exceeding groundwater ESs and/or soil exceeding generic or site specific RCLs.

EASEMENT

In consideration of One Dollar, the receipt whereof is hereby acknowledged, the undersigned, Outboard Marine Corporation, a Delaware corporation,

does hereby grant and convey to Milwaukee Gas Light Company, a Wisconsin corporation, its successors and assigns, hereinafter called grantee, a perpetual easement or right-of-way in, through, upon and over a strip of land 20 feet in width, for the purpose of laying, maintaining, operating, repairing and removing pipes for the transmission of gas in, through, upon and over said strip of land, the center line of which strip of land is described as follows:

Beginning at a point on the South line of the Northeast Quarter (NE 1/4) of Section numbered Twenty-seven (27), Township numbered Eight (8) North, Range numbered Twenty-one (21) East, said point being located Ten (10) feet East of the West line of said Quarter Section; thence running North and parallel to the West line of said Quarter Section to a point in the South line of the Chicago and North Western Railway Company right-of-way, this latter point being the end of this herein described center line;

All of the above described strip of land being a part of and contained within the boundaries of the following described parcel of land:

That part of the West Eighty (80) acres of the Northeast Quarter (NE 1/4) of Section numbered Twenty-seven (27), Township numbered Eight (8) North, Range numbered Twenty-one (21) East, which lies South of the right-of-way conveyed to Milwaukee, Sparta and Northwestern Railway Company by deed recorded in Volume 600, page 76, and containing Fifty-one (51) acres.

The grantee shall have the right at any and all times to go upon said strip of land for the purpose of laying, relaying, maintaining, operating, inspecting, repairing or removing said pipes.

The grantee after doing any of such work shall restore the surface of the ground as nearly as possible to the condition as existing immediately prior to the commencement of such work.

The agreement shall bind the heirs, successors and assigns of all parties named. IN WITNESS WHEREOF, the grantor has caused these presents to be signed by its respective officers and its corporate seal to be affixed this 24th day of September, 1956.

Easement, granted by Auguste Giesfeldt (widow) owner, Augusta Frentz (widow) mortgagee, to Wisconsin Electric Power Company by an instrument dated November 20, 1942 and recorded in said Register's office on November 30, 1942 in Volume 1868 of Deeds at page 668, as Document No. 2403567, wherein the first parties grant to the second party, the right, permission and authority to construct, maintain, operate and replace two steel transmission line structures together with the necessary stub supports, anchors and guy wires, and underground accessories, in such locations as may be from time to time selected by said Company upon and along the hereinafter described strip of land 31 feet in width over the premises of the undersigned described as all that part of the North East 1/4 of Section 27-8-22, in the Town of Granville, that lies West of the Center of the public highway running North and South through said North East 1/4 Section, except the right of way of Chicago and North Western Railway Company, the center line of said strip of land being described as follows:

Commencing at a point on the West line of said North East 1/4 of Section 27, which point is 151.1 feet South, measured along the 1/4 line of said Section, from the center line between the two main tracks of the Chicago and North Western Railway Company, as said railway is now surveyed and located; thence North 76° 03' East 109.7 feet to a point; thence North 77° 57' East 694 feet to a point; thence North 83° 58' East 588.3 feet to a point in the center line of that certain public highway known as North 64th Street; running North and South through said North East 1/4 Section, which point is 151.1 feet South from the center line between the two main tracks of said Chicago and North Western Railway Company.

Also the right, permission and authority is granted to said Company to string, operate, maintain and replace wires and cables on said transmission line structures, supported by the necessary crossarms and appliances, over a strip of land 70 feet in width, being 35 feet in width on either side of said above-described line, for the purpose of transmitting electrical energy. Said wires and cables shall be strung not less than 23 feet above the ground at all points.

Also the right, permission and authority is granted said Electric Company to cut down and remove all trees and overhanging branches on a strip of land 90 feet in width, being 45 feet in width on either side of said above-described center line, and to cut down and remove such trees now or hereafter on the premises of the undersigned, located outside of said 90 foot strip, which in falling, may interfere with or endanger said electric line.

The undersigned covenant and agree that no structure will be erected or hay, grain or straw stack, or other inflammable material placed, or trees planted on said 90 foot strip of land.

The right, permission and authority is also granted said Electric Company to construct, maintain, operate and replace a line of poles, together with the necessary anchors and guy wires, and to string and maintain wires thereon for the purpose of supplying light, heat, power and signals, or for such other purpose as electric current is now or may hereafter be used upon and along a strip of land 16 feet in width lying South of and adjoining the South line of the right of way of Chicago and North Western Railway Company as said right of way is now surveyed and located, in said North East 1/4 of Section 27.

Permission and authority is also granted said Electric Company to trim and keep trimmed all trees along the line upon the premises of the undersigned so that they will clear wires strung not less than 22 feet above ground by as much as 5 feet, and so that the trees will not be liable to interfere with the transmission of electricity over said pole line.

The said Electric Company shall have the right to enter upon the premises of the undersigned for the purpose of erecting, patrolling and maintaining said steel tower transmission line and said pole line, but payment shall be made by it for damage to growing crops, fences or live stock.

This agreement shall bind the heirs, successors and assigns of all the parties hereto.

Declaration of Abandonment executed by Wisconsin Electric Power Company, dated March 26, 1946 and recorded in said Register's office on April 15, 1946 in Volume 2224 of Deeds at page 114, as Document No. 2620405, providing as follows:

This Declaration, made this 26th day of March 1946, wherein Wisconsin Electric Power Company, a corporation duly organized and existing under and by virtue of the laws of the State of Wisconsin, located at Milwaukee, Wisconsin, hereby declares that it has abandoned possession of and does not claim title to that part of that certain transmission line easement executed by Auguste Giesfeldt, dated November 20, 1942, and recorded in Volume 1803 of Deeds at page 668, as Document No. 2403587, the part of the said transmission line easement which it has abandoned and to which it does not claim title is as follows:

The right, permission and authority to construct, maintain, operate and replace 2 steel transmission line structures, together with the necessary stub supports, anchors and guy wires, underground accessories in such locations as may be from time to time selected by said Company upon and along the hereinafter described strip of land 31 feet in width over the premises of the said Auguste Giesfeldt, together with the right, permission and authority to string, operate, maintain and replace wires and cables on said transmission line structures, supported by the necessary crossarms and appliances over a strip of land 70 feet in width, and to cut down and remove all trees and overhanging branches on a strip of land 90 feet in width, including such trees now or hereafter on the premises of said Auguste Giesfeldt, located outside of said 90 foot strip which in falling may interfere with or endanger said electric line, together with the covenant that no structure will be erected, or hay, grain or straw stack or other inflammable material placed, or trees planted on said 90 foot strip of land, the center line of said strip or strips of land described as follows:

Commencing at a point on the West line of said North East 1/4 of Section 27, which point is 151.1 feet South, measured along the 1/4 line of said Section, from the center line between the two main tracks of the Chicago and North Western Railway Company, as said railway is now surveyed and located; thence North 76° 08' East 109.7 feet to a point; thence North 77° 57' East 684 feet to a point; thence North 83° 58' East 528.3 feet to a point in the center line of that certain public highway known as North 64th street running North and South through said North East 1/4, which point is 151.1 feet South from the center line between the two main tracks of said Chicago and North Western Railway Company.

Said Wisconsin Electric Power Company expressly reserves unto itself, its successors and assigns, the wood pole line now constructed on a strip of land 16 feet in width, South of and adjacent to the railway right of way of Chicago and North Western Railway Company, together with all rights, permissions and authorities granted by said easement of Auguste Giesfeldt, dated November 20, 1942.

This abandonment is made by Wisconsin Electric Power Company for the reason that it has concluded to relocate the steel tower transmission line and an additional easement for such relocated line has been secured some distance to the South of the above described easement.

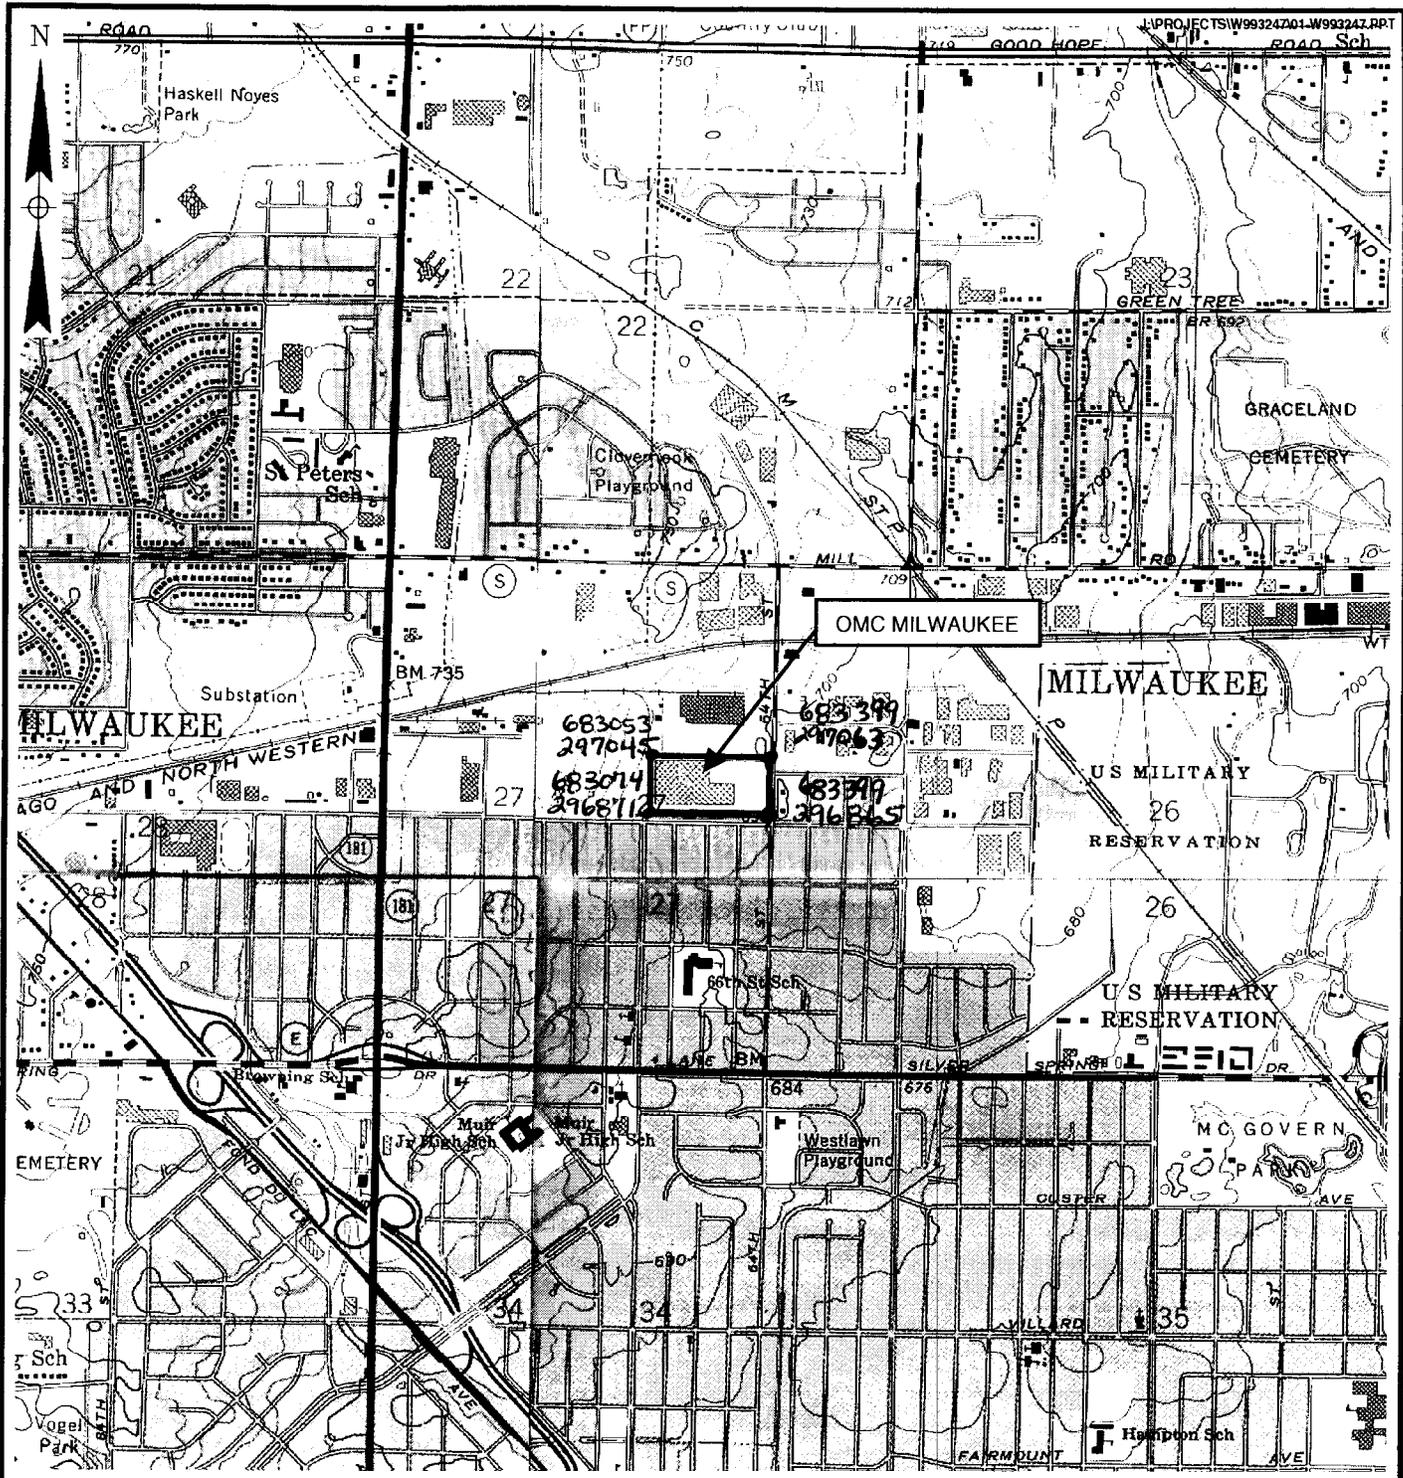

Easement, granted by Auguste Giesfeldt (widow) to Wisconsin Electric Power Company by an instrument dated March 7, 1946 and recorded in said Register's office on April 15, 1946 in Volume 2224 of Deeds at page 269, as Document No. 2626407, wherein the first party grants to the second party the right, permission and authority to construct, maintain, operate and replace 2 steel transmission line structures, together with the necessary stub supports, anchors and guy wires and underground accessories, in such locations as may be from time to time selected by said Company upon and along the hereinafter described strip of land 31 feet in width over the premises of the undersigned described as all that part of the North East 1/4 of Section 27-8-21 in the Town of Granville, that lies West of the center of the public highway running North and South Through said North East 1/4 Section, except the right of way of Chicago and North Western Railway Company, the center line of said strip of land being described as follows:

Commencing at a point on the West line of said North East 1/4 of Section 27, which point is 151.1 feet South measured along the 1/4 line of said Section, from the center line between the two main tracks, of the Chicago and North Western Railway Company, as said railway is now surveyed and located; thence North $76^{\circ} 08'$ East 109.7 feet to a point; thence North $84^{\circ} 46'$ East 1239.6 feet to a point in the center line of that certain public highway known as North 64th Street running North and South through said North East 1/4 Section 27, which point is 238.4 feet South from the center line between the two main tracks of said Chicago and North Western Railway Company.

Also the right, permission and authority is granted to said Company to string, operate, maintain and replace wires and cables on said transmission line structures, supported by the necessary crossarms and appliances, over a strip of land 70 feet in width, being 35 feet in width on either side of said above-described center line.

Also the right, permission and authority is granted said Electric Company to cut down and remove all trees and overhanging branches on a strip of land 90 feet in width, being 45 feet in width on either side of said above-described center line and to cut down and remove such trees now or hereafter on the premises of the undersigned located outside of said 90 foot strip which in falling may interfere with or endanger said electric line.

NOTES: Water levels are measured from the top of casing (TOC).

ft. above msl - feet above mean sea level.

MW-5 and RW-1 are sites where active (MW-5) and passive (RW-1) free product recovery efforts, respectively, are occurring.

* December 1999 and March 2000 water levels at MW-5 are estimated pumping levels.

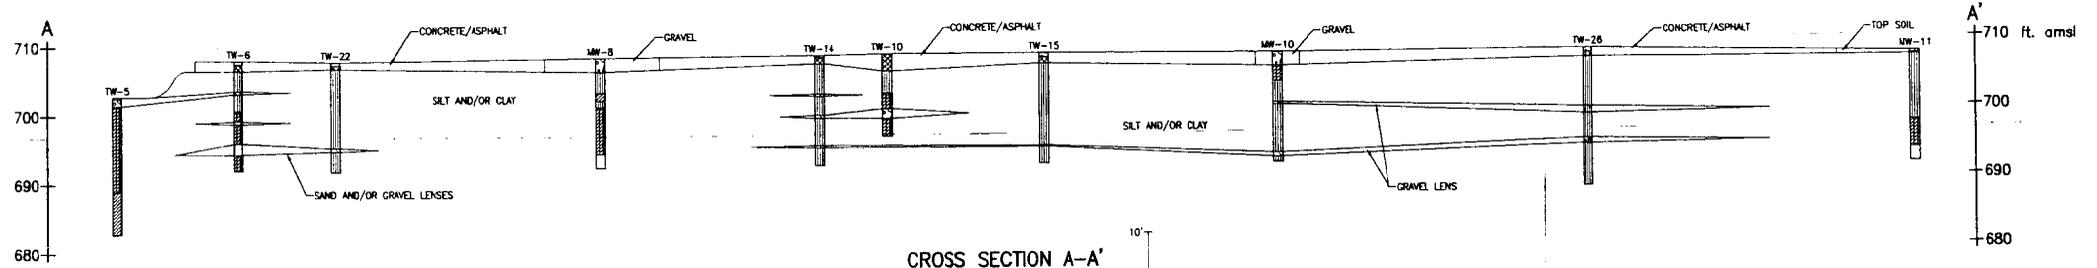

The water level measurement for RW-1 under the 3/13/00 column was actually taken on 4/4/00.
