This Adobe Fillable form is intended to provide a list of information that is required for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request. The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

BRRTS #:
 PARCEL ID #:

ACTIVITY NAME: WTM COORDINATES: X: Y:

CLOSURE DOCUMENTS (the Department adds these items to the final GIS packet for posting on the Registry)

- Closure Letter
- Maintenance Plan (if activity is closed with a land use limitation or condition (land use control) under s. 292.12, Wis. Stats.)
- Conditional Closure Letter
- Certificate of Completion (COC) for VPLE sites

SOURCE LEGAL DOCUMENTS

- Deed:** The most recent deed as well as legal descriptions, for the **Source Property** (where the contamination originated). Deeds for other, off-source (off-site) properties are located in the **Notification** section.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Certified Survey Map:** A copy of the certified survey map or the relevant section of the recorded plat map for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map. (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).
Figure #: **Title:**
- Signed Statement:** A statement signed by the Responsible Party (RP), which states that he or she believes that the attached legal description accurately describes the correct contaminated property.

MAPS (meeting the visual aid requirements of s. NR 716.15(2)(h))

- Maps must be no larger than 8.5 x 14 inches unless the map is submitted electronically.
- Location Map:** A map outlining all properties within the contaminated site boundaries on a U.S.G.S. topographic map or plat map in sufficient detail to permit easy location of all parcels. If groundwater standards are exceeded, include the location of all potable wells within 1200 feet of the site.
Note: Due to security reasons municipal wells are not identified on GIS Packet maps. However, the locations of these municipal wells must be identified on Case Closure Request maps.
Figure #: FIGURE 1 **Title:** SITE LOCATION DIAGRAM
 - Detailed Site Map:** A map that shows all relevant features (buildings, roads, individual property boundaries, contaminant sources, utility lines, monitoring wells and potable wells) within the contaminated area. This map is to show the location of all contaminated public streets, and highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding a ch. NR 140 Enforcement Standard (ES), and/or in relation to the boundaries of soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Levels (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: FIG 2 **Title:** SITE FEATURES AND BOREHOLE/WELL LOCATIONS DIAGRAM
 - Soil Contamination Contour Map:** For sites closing with residual soil contamination, this map is to show the location of all contaminated soil and a single contour showing the horizontal extent of each area of contiguous residual soil contamination that exceeds a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: FIG 3 **Title:** SOIL ANALYTICAL RESULTS ABOVE RCLs DIAGRAM
FIG 4 EXCAVATION LIMITS, SAMPLE LOCATIONS, AND SOIL ANALYTICAL RESULTS ABOVE RCLs DIAGRAM

BRRTS #: 03-41-546829
02-41-552223

ACTIVITY NAME: Reberky Auto Property

MAPS (continued)

Geologic Cross-Section Map: A map showing the source location and vertical extent of residual soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL). If groundwater contamination exceeds a ch. NR 140 Enforcement Standard (ES) when closure is requested, show the source location and vertical extent, water table and piezometric elevations, and locations and elevations of geologic units, bedrock and confining units, if any.

Figure #: Title:

Figure #: Title:

Groundwater Isoconcentration Map: For sites closing with residual groundwater contamination, this map shows the horizontal extent of all groundwater contamination exceeding a ch. NR140 Preventive Action Limit (PAL) and an Enforcement Standard (ES). Indicate the direction and date of groundwater flow, based on the most recent sampling data.

Note: This is intended to show the total area of contaminated groundwater.

Figure #: F165 Title: GROUNDWATER ANALYTICAL RESULTS ABOVE STANARDS DIAGRAM

Groundwater Flow Direction Map: A map that represents groundwater movement at the site. If the flow direction varies by more than 20° over the history of the site, submit 2 groundwater flow maps showing the maximum variation in flow direction.

Figure #: F166 Title: GROUNDWATER ELEVATION CROSS SECTION DIAGRAM (10-8-07)

Figure #: Title:

TABLES (meeting the requirements of s. NR 716.15(2)(h)(3))

Tables must be no larger than 8.5 x 14 inches unless the table is submitted electronically. Tables **must not** contain shading and/or cross-hatching. The use of **BOLD** or *ITALICS* is acceptable.

Soil Analytical Table: A table showing remaining soil contamination with analytical results and collection dates.

Note: This is one table of results for the contaminants of concern. Contaminants of concern are those that were found during the site investigation, that remain after remediation. It may be necessary to create a new table to meet this requirement.

Table #: TABLE 2 Title: METALS AND VOC ANALYTICAL RESULTS - INVESTIGATION SOIL SAMPLES
TABLE 3 Title: PAH ANALYTICAL RESULTS - INVESTIGATION SOIL SAMPLES
TABLE 4 Title: VOC ANALYTICAL RESULTS - EXCAVATION SOIL SAMPLES

Groundwater Analytical Table: Table(s) that show the most recent analytical results and collection dates, for all monitoring wells and any potable wells for which samples have been collected.

Table #: TABLE 5 Title: VOC ANALYTICAL RESULTS - GROUNDWATER SAMPLES

Water Level Elevations: Table(s) that show the previous four (at minimum) water level elevation measurements/dates from all monitoring wells. If present, free product is to be noted on the table.

Table #: TABLE 6 Title: GROUNDWATER ELEVATION MEASUREMENTS

IMPROPERLY ABANDONED MONITORING WELLS

For each monitoring well not properly abandoned according to requirements of s. NR 141.25 include the following documents.

Note: If the site is being listed on the GIS Registry for only an improperly abandoned monitoring well you will only need to submit the documents in this section for the GIS Registry Packet.

Not Applicable

Site Location Map: A map showing all surveyed monitoring wells with specific identification of the monitoring wells which have not been properly abandoned.

Note: If the applicable monitoring wells are distinctly identified on the Detailed Site Map this Site Location Map is not needed.

Figure #: Title:

Well Construction Report: Form 4440-113A for the applicable monitoring wells.

Deed: The most recent deed as well as legal descriptions for each property where a monitoring well was not properly abandoned.

Notification Letter: Copy of the notification letter to the affected property owner(s).

BRRTS #: 03-41-546-029
02-41-552223

ACTIVITY NAME: Rezonancy Auto Property

NOTIFICATIONS

Source Property (NA)

- NA **Letter To Current Source Property Owner:** If the source property is owned by someone other than the person who is applying for case closure, include a copy of the letter notifying the current owner of the source property that case closure has been requested.
- NA **Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying current source property owner.

Off-Source Property

Group the following information per individual property and label each group according to alphabetic listing on the "Impacted Off-Source Property" attachment.

- NA **Letter To "Off-Source" Property Owners:** Copies of all letters sent by the Responsible Party (RP) to owners of properties with groundwater exceeding an Enforcement Standard (ES), and to owners of properties that will be affected by a land use control under s. 292.12, Wis. Stats.
Note: Letters sent to off-source properties regarding residual contamination must contain standard provisions in Appendix A of ch. NR 726.
Number of "Off-Source" Letters:
- NA **Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying any off-source property owner.
- NA **Deed of "Off-Source" Property:** The most recent deed(s) as well as legal descriptions, for all affected deeded **off-source property(ies)**. This does not apply to right-of-ways.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Letter To "Governmental Unit/Right-Of-Way" Owners:** Copies of all letters sent by the Responsible Party (RP) to a city, village, municipality, state agency or any other entity responsible for maintenance of a public street, highway, or railroad right-of-way, within or partially within the contaminated area, for contamination exceeding a groundwater Enforcement Standard (ES) and/or soil exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL).

February 10, 2009

4800 North 76th, LLC
Attn: Jeffery Reimer
N178 W9358 Water Tower Place
Menomonee Falls, WI 53051

Subject: Final Case Closure with Land Use Limitations or Conditions for Regency Auto Mart,
4800 North 76th Street, Milwaukee, WI

FID: 341127710
BRRTS: 03-41-546829 & 02-41-552223
PECFA: 53218-3825-00

Dear Mr. Reimer:

On January 8, 2009 the Wisconsin Department of Natural Resources ("the Department") Regional Closure Committee reviewed the above referenced case for closure. This committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On January 8, 2009, you were notified that the Closure Committee had granted conditional closure to this case.

On February 10, 2009, the Department received correspondence indicating that you have compiled with the requirements of closure. The Department received the groundwater monitoring well abandonment and revised Cap Maintenance Plan.

Based on the correspondence and data provided, it appears that your case meets the requirements of ch. NR 726, Wisconsin Administrative Code. The Department considers this case closed and no further investigation or remediation at this time.

GIS Registry

The conditions of case closure set out below in this letter require that your site be listed on the Remediation and Redevelopment Program's GIS Registry. The specific reasons are summarized below:

- Residual soil contamination exists that must be properly managed should it be excavated or removed.
- If a structural impediment (building) that obstructs a complete site investigation or cleanup is removed or modified, additional environmental work must be completed.
- Pavement, an engineered cover or a soil barrier must be maintained over contaminated soil and the state must approve any changes to this barrier.
- Groundwater contamination is present Above Chapter NR 140 enforcement standards.

Information that was submitted with your closure request application will be included on the GIS Registry. To review the sites on the GIS Registry web page, visit the RR Sites Map page at: <http://dnr.wi.gov/org/aw/rr/gis/index.htm>

If your property is listed on the GIS Registry because of remaining contamination and you intend to construct or reconstruct a well, you will need prior Department approval in accordance with s. NR 812.09(4)(w), Wis. Adm. Code. To obtain approval, Form 3300-254 needs to be completed and submitted to the DNR Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line at <http://dnr.wi.gov/org/water/dwg/3300254.pdf> or at the web address listed above for the GIS Registry.

Closure Conditions

Please be aware that pursuant to s. 292.12 Wisconsin Statutes, compliance with the requirements of this letter is a responsibility to which you and any subsequent property owners must adhere. If these requirements are not followed or if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, welfare, or the environment, the Department may take enforcement action under s. 292.11 Wisconsin Statutes to ensure compliance with the specified requirements, limitations or other conditions related to the property or this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code. It is the Department's intent to conduct inspections in the future to ensure that the conditions included in this letter including compliance with referenced maintenance plans are met.

Structural Impediments

Structural impediments existing at the time of cleanup, a building, made complete investigation and remediation of the soil contamination on this property impracticable. Pursuant to s. 292.12(2)(b), Wis. Stats., if the structural impediments on this property that are described above are removed, the property owner shall conduct an investigation of the degree and extent of the petroleum and chlorinated solvent contamination. . If contamination is found at that time, the Wisconsin Department of Natural Resources shall be immediately notified and the contamination shall be properly remediated in accordance with applicable statutes and rules. If soil in the specific locations described above is excavated, the property owner at the time of excavation must sample and analyze the excavated soil to determine if residual contamination remains. If sampling confirms that contamination is present the property owner at the time of excavation will need to determine whether the material would be considered solid or hazardous waste and ensure that any storage, treatment or disposal is in compliance with applicable statutes and rules. In addition, all current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard and as a result special precautions may need to be taken during excavation activities to prevent a health threat to humans.

Cover or Barrier

Pursuant to s. 292.12(2)(a), Wis. Stats., the building and asphalt parking areas that currently exists in the location shown on the attached map shall be maintained in compliance with **the attached maintenance plan** in order to prevent direct contact with residual soil contamination that might otherwise pose a threat to human health. If soil in the specific locations described above is excavated in the future, the property owner at the time of excavation must sample and analyze the excavated soil to determine if residual contamination remains. If sampling confirms that contamination is present the property owner at the time of excavation will need to determine whether the material would be

considered solid or hazardous waste and ensure that any storage, treatment or disposal is in compliance with applicable statutes and rules. In addition, all current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard and as a result special precautions may need to be taken during excavation activities to prevent a health threat to humans.

Pursuant to s. 292.12(2)(a), Wis. Stats., the pavement and building cap that currently exists in the location shown on the attached map shall be maintained in compliance with the **attached maintenance plan** in order to minimize the infiltration of water and prevent additional groundwater contamination that would violate the groundwater quality standards in ch. NR 140, Wis. Adm. Code, and to prevent direct contact with residual soil contamination that might otherwise pose a threat to human health. If soil in the specific locations described above is excavated in the future, the property owner at the time of excavation must sample and analyze the excavated soil to determine if residual contamination remains. If sampling confirms that contamination is present the property owner at the time of excavation will need to determine whether the material would be considered solid or hazardous waste and ensure that any storage, treatment or disposal is in compliance with applicable statutes and rules. In addition, all current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard and as a result special precautions may need to be taken during excavation activities to prevent a health threat to humans.

The attached maintenance plan and inspection log are to be kept up-to-date and on-site, and the inspection log need only be submitted to the Department upon request.

Prohibited Activities

The following activities are prohibited on any portion of the property where [pavement, a building foundation, soil cover, engineered cap or other barrier] is required as shown on the attached map, unless prior written approval has been obtained from the Wisconsin Department of Natural Resources: 1) removal of the existing barrier; 2) replacement with another barrier; 3) excavating or grading of the land surface; 4) filling on capped or paved areas; 5) plowing for agricultural cultivation; or 6) construction or placement of a building or other structure.

Remaining Residual Groundwater Contamination

Groundwater impacted by petroleum and chlorinated solvents contamination greater than enforcement standards set forth in ch. NR140, Wis. Adm. Code, is present on the contaminated property. For more detailed information regarding the locations where groundwater samples have been collected (i.e., monitoring well locations) and the associated contaminant concentrations, refer to the Remediation and Redevelopment Program's GIS Registry at the RR Sites Map page at <http://dnr.wi.gov/org/aw/rr/qis/index.htm>.

Vapor Migration

In addition, depending on site-specific conditions, construction over contaminated materials may result in vapor migration into enclosed structures or migration along newly placed underground utility lines. The potential for vapor inhalation and mitigation should be evaluated when planning any future redevelopment, and measures should be taken to ensure the continued protection of public health, safety, welfare and the environment at the site.

If this a PECFA site, section 101.43, Wis. Stats., requires that PECFA claimants seeking reimbursement of interests costs, for sites with petroleum contamination, submit a final reimbursement

claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest cost after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

The Department appreciates the actions you have taken to investigate and remediate the contamination at this site. If you have any questions or comments, please feel free to contact John J. Hnat at the above address or at (414) 263-8644. Please refer to the FID number at the top of this letter in any future correspondence. Future correspondence should be sent directly to the Remediation and Redevelopment Program Assistant Vicky Stovall (414-263-8688) at the above address.

Sincerely,

James A. Schmidt
Remediation and Redevelopment Team Supervisor

WDNR SER Files

CAP MAINTENANCE PLAN
4800 N. 76th Street,
Milwaukee, Wisconsin
DNR BRRTS Nos. 03-41-546829 and 02-41-552223
November 20, 2008

This Cap Maintenance Plan (the "Plan") has been prepared in accordance with ch. NR 724.13(2) Wis. Adm. Code, and shall be applicable to the Property located at 4800 N. 76th Street in Milwaukee, Wisconsin (the "Property").

A copy of this Plan shall be kept on file with the current Property owner and its successors. This Plan has been developed for the existing post-remediation surface at the Property that is serving as a direct contact barrier ("Cap") for residual soil impacts at the Property.

1. Property Owner. 4800 North 76th Street, LLC, N178 W9358 Water Tower Place, Menomonee Falls, WI 53051. Attn: Mr. Jeffrey Reimer, (262) 532-6102.
2. Consultant. Environmental & Development Solutions, Inc., 6637 North Sidney Place, Milwaukee, Wisconsin 53209. Richard Frieseke, President - (414) 228-9810.
3. Property Information. 4800 N 76th Street, Milwaukee, Wisconsin. The Property location and features are illustrated on the attached Exhibits A and B.
4. Nature and Extent of Contamination. The Property currently contains a used car dealership and associated parking lot. The Property was formerly occupied by a gasoline service station that utilized underground storage tanks (USTs) for gasoline and waste oil storage. The gasoline USTs were removed from the Property in 1979, and the waste oil UST was removed from the Property in 2007. Site investigation (SI) activities have been conducted at the Property. The SI results indicated the presence of volatile organic compounds (VOCs) in the shallow soils within the top 4 feet at the Property, and VOCs within groundwater in the vicinity of the former waste oil UST at concentrations above the DNR enforcement standards (ESs). A limited soil removal was conducted in 2007 in conjunction with the waste oil UST removal to remediate the soil and

perched water impacts in that area. Based on the SI and post-remediation sampling results, the residual soil impacts will be addressed through maintaining the existing building and asphalt parking areas as a direct contact barrier (Exhibit B). The DNR has reviewed the SI and results of the remediation activities and provided conditional closure in a letter dated January 8, 2009. The conditions of closure included maintaining a Cap over the entire site.

5. Normal Operation and Maintenance – Ch. NR 724.13(2)(b). Per a condition of closure, the Cap must be maintained at the Property. The Cap will be inspected once a year, normally in the spring after the snow and ice are melted. The inspection will be documented on the attached inspection log (Exhibit C). Any disturbances of the Cap noted during the inspection, such as significant rutting or significant erosion, burrowing or other damage will be repaired within a reasonable period of time after discovery. Any alterations or repairs to the Cap shall be documented on the attached inspection log, and the documentation shall be kept on file by the Property owner with a copy of this Plan. A copy of this Plan and any additions to the Plan shall be made available for inspection by representatives of the DNR upon reasonable requests during normal business hours of the Property owner.

6. Cap Removal and Replacement. If it becomes necessary or desirable to remove or alter the existing cap, the cap so removed or altered shall be replaced with another equivalent barrier, and shall be maintained on the Property in compliance with this Plan. If impacted materials are excavated from the Property during the cap removal/alteration, they will require proper handling and/or disposal in accordance with applicable State of Wisconsin regulations.

7. Plan Amendment or Withdrawal. This Plan can be amended or withdrawn by the Property owner or its successors with the written approval of the DNR.

Subject: Conditional Closure Decision with Requirements to Achieve Final Closure for Regency Auto Mart, 4800 North 76th Street, Milwaukee, WI 53218

FID: 341127710
BRRTS: 03-41-546829 & 02-41-552223
PECFA: 53218-3825-00

Dear Mr. Reimer:

On January 8, 2009, the Wisconsin Department of Natural Resources ("the Department") Regional Closure Committee reviewed your request for closure of the case described above. The Department reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of the closure request, the Department has determined that the petroleum and chlorinated solvent contamination from the former underground waste oil tank that was located on the property appears to have been investigated and remediated to the extent practicable under site conditions. Your case meets the screening criteria of s. NR 746.07 or s. NR 746.08, Wis. Adm. Code, and the requirements of ch. NR 726, Wis. Adm. Code and will be closed if the following conditions are satisfied:

- The groundwater monitoring wells and any other remediation systems at the site must be properly abandoned in compliance with ch. NR 141, Wis. Admin. Code. Documentation of well abandonment must be submitted to this office on Form 3300-5B found at www.dnr.state.wi.us/org/water/dqw/gw within 60-days on receipt of this letter as required in s. NR 726.05(8)(a)1 and s. NR 141.25 Wis. Admin. Code. The Department requires the abandonment of these wells before issuing a final closure letter.
- Have EDS resubmit the final CAP MAINTENANCE PLAN for the site that includes the date of this closure letter as omitted in Paragraph 1, Page 2 of the draft plan.

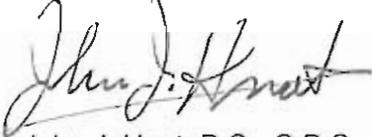

When the above conditions have been satisfied, please submit the appropriate documentation (for example, well abandonment forms, disposal receipts, copies of correspondence, etc.) to verify that applicable conditions have been met, and your case will be closed. Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the GIS Registry. To review the site on the GIS Registry web page, visit <http://maps.dnr.state.wi.us/brts>.

If this is a PECFA site, section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

The Department appreciates the actions you have taken to investigate and remediate the contamination at this site. If you have any questions or comments, please feel free to contact me at the above address or at (414) 263-8644. Please refer to the FID number at the top of this letter in any future correspondence. Future correspondence should be sent directly to the Remediation and Redevelopment Program Assistant Vicky Stovall (414-263-8688) at the above address.

Sincerely,

John J. Hnat, P.G., C.P.G.

Also;

All that part of North 76th Street in said Southwest One-quarter (1/4) and the Southeast One-quarter (1/4) of Section Thirty-three (33), Township Eight (8) North, Range Twenty-one (21) East, described as follows:

Commencing at the point of intersection of the North line of West Hampton Avenue and the Southwest corner of said Lot 18, running thence North along the West line of said Lot 18, 116.00 feet to the Northwest corner thereof; thence North 89°26'30" West, along the extension of the North line of said Lot 18, 56.74 feet to a point; thence South 13°58'31" West, 27.38 feet to a point of curve; thence Southeasterly 109.25 feet along the arc of said curve, whose center lies to the Southeast with a radius 72.00 feet and whose chord bears South 29°29'39" East, a distance of 99.07 feet to a point; thence South 75°33'44" East, 15.05 feet to the point of commencement. Excepting therefrom that part thereof in the Southeast 1/4 of said Section 33. *

Together with all appurtenant rights, title and interests.

Grantor warrants that the title to the Property is good, indefeasible in fee simple and free and clear of encumbrances except Municipal and zoning ordinances and agreements entered under them, recorded easements for the distribution of utility and municipal services, recorded building and use restrictions and covenants, general taxes levied in the year of closing.

Dated this 8th day of May, 2006.

Notes:
 1.) *Only the detected compounds are presented.
 2.) Concentrations that exceed their respective PALs are in green cells.
 3.) Concentrations that exceed their respective ESSs are in red bold.

Table 6
Groundwater Elevation Measurements
Regency Auto Property
Milwaukee, Wisconsin

| Well Number | Date | Total Well Depth | Ground Surface Elevation | Top of Casing Elevation | *Depth to Water Below Casing | Depth to Water Below Ground | Groundwater Elevation |
|-------------|-----------|------------------|--------------------------|-------------------------|------------------------------|-----------------------------|-----------------------|
| P-1/W-1 | 8/9/2006 | 12.00 | 99.49 | 99.49 | NM | NM | NM |
| | 5/30/2007 | | | | NM | NM | NM |

| | 1/8/2008 | | | | 1.93 | 1.93 | 98.07 |

Notes:

- 1.) *Measured from the north rim of the top of well casing.
- 2.) All measurements are presented in feet.
- 3.) NM = Not measured

Benchmark: Elevations referenced to a benchmark assigned an arbitrary elevation of 100.00 feet.
