

GIS Registry Disclaimer

This case was closed by the DNR prior to August 1, 2002, when DNR began adding approved cleanups with residual soil contamination into the GIS Registry. Certain documents that are currently required by ch. NR 726, Wis. Adm. Code may therefore not be included in this packet as they were unavailable at the time the original case was closed.

The information contained in this document was assembled by DNR from a previously closed case file, and added to the GIS Registry to provide the public with information on closed sites with residual soil and/or groundwater contamination remaining above applicable state standards.

MAPS (continued)

- Geologic Cross-Section Map:** A map showing the source location and vertical extent of residual soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL). If groundwater contamination exceeds a ch. NR 140 Enforcement Standard (ES) when closure is requested, show the source location and vertical extent, water table and piezometric elevations, and locations and elevations of geologic units, bedrock and confining units, if any.

Figure #: **Title:**

Figure #: **Title:**

- Groundwater Isoconcentration Map:** For sites closing with residual groundwater contamination, this map shows the horizontal extent of all groundwater contamination exceeding a ch. NR140 Preventive Action Limit (PAL) and an Enforcement Standard (ES). Indicate the direction and date of groundwater flow, based on the most recent sampling data.

Note: This is intended to show the total area of contaminated groundwater.

Figure #: **Title:**

- Groundwater Flow Direction Map:** A map that represents groundwater movement at the site. If the flow direction varies by more than 20° over the history of the site, submit 2 groundwater flow maps showing the maximum variation in flow direction.

Figure #: **Title:**

Figure #: **Title:**

TABLES (meeting the requirements of s. NR 716.15(2)(h)(3))

Tables must be no larger than 11 x 17 inches unless the table is submitted electronically. Tables must not contain shading and/or cross-hatching. The use of **BOLD** or *ITALICS* is acceptable.

- Soil Analytical Table:** A table showing remaining soil contamination with analytical results and collection dates.
Note: This is one table of results for the contaminants of concern. Contaminants of concern are those that were found during the site investigation, that remain after remediation. It may be necessary to create a new table to meet this requirement.

Table #: 1 Title: Analytical Results - Soil

- Groundwater Analytical Table:** Table(s) that show the most recent analytical results and collection dates, for all monitoring wells and any potable wells for which samples have been collected.

Table #: Title:

- Water Level Elevations:** Table(s) that show the previous four (at minimum) water level elevation measurements/dates from all monitoring wells. If present, free product is to be noted on the table.

Table #: Title:

IMPROPERLY ABANDONED MONITORING WELLS

For each monitoring well not properly abandoned according to requirements of s. NR 141.25 include the following documents.

Note: If the site is being listed on the GIS Registry for only an improperly abandoned monitoring well you will only need to submit the documents in this section for the GIS Registry Packet.

- Not Applicable**

- Site Location Map:** A map showing all surveyed monitoring wells with specific identification of the monitoring wells which have not been properly abandoned.

Note: If the applicable monitoring wells are distinctly identified on the Detailed Site Map this Site Location Map is not needed.

Figure #: **Title:**

- Well Construction Report:** Form 4440-113A for the applicable monitoring wells.

- Deed:** The most recent deed as well as legal descriptions for each property where a monitoring well was not properly abandoned.

- Notification Letter:** Copy of the notification letter to the affected property owner(s).

BRRTS #: 03-41-003553

ACTIVITY NAME: SOUTHBOUND TAVERN

NOTIFICATIONS

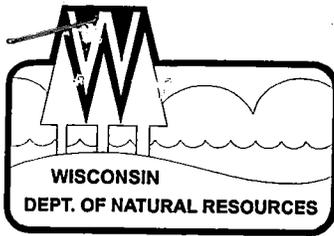

Source Property

- Not Applicable**
- Letter To Current Source Property Owner:** If the source property is owned by someone other than the person who is applying for case closure, include a copy of the letter notifying the current owner of the source property that case closure has been requested.
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying current source property owner.

Off-Source Property

Group the following information per individual property and label each group according to alphabetic listing on the "Impacted Off-Source Property" attachment.

- Not Applicable**
- Letter To "Off-Source" Property Owners:** Copies of all letters sent by the Responsible Party (RP) to owners of properties with groundwater exceeding an Enforcement Standard (ES), and to owners of properties that will be affected by a land use control under s. 292.12, Wis. Stats.
Note: Letters sent to off-source properties regarding residual contamination must contain standard provisions in Appendix A of ch. NR 726.
- Number of "Off-Source" Letters:**
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying any off-source property owner.
- Deed of "Off-Source" Property:** The most recent deed(s) as well as legal descriptions, for all affected deeded **off-source property(ies)**. This does not apply to right-of-ways.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Letter To "Governmental Unit/Right-Of-Way" Owners:** Copies of all letters sent by the Responsible Party (RP) to a city, village, municipality, state agency or any other entity responsible for maintenance of a public street, highway, or railroad right-of-way, within or partially within the contaminated area, for contamination exceeding a groundwater Enforcement Standard (ES) and/or soil exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL).
- Number of "Governmental Unit/Right-Of-Way Owner" Letters: 1**

Subject: Case Closure, Southbound Tavern, 9504 South Chicago Road, Oak Creek, WI
FID: 241645580, BRRTS: 03-41-003553

Dear Ms. Sieren:

On March 9, 1999 the Southeast Region Headquarters reviewed the Case Summary and Close Out Form 4400-202 and associated file information pertaining to the above-named site for case closure submitted by your consultant Advent Environmental Services, Inc. (Advent). Based on the investigative and remedial documentation provided to the Department, it appears that the soil and groundwater contamination has been investigated and remediated to the extent practicable under current site conditions. Therefore, the Department considers the case "conditionally closed," having determined that no further action is necessary at the site at this time. The site will not be formally closed until receipt of the following documentation for this site:

1. Due to structural impediments (building and sidewalk, see enclosed map), the Department requires, as a condition of the close out of the case, the property owner sign and record a deed restriction under s. NR 726.05 (8). Structural impediments exist which currently prevents access to known, significant soil contamination that is likely to cause a direct contact threat and require remediation after the impediments are removed. The deed restriction must be filed at the County register of Deeds office for the property, giving notice of the full extent and degree of residual contamination remaining on the property, a requirement that an assessment of contaminated soils be completed at such time that soils become accessible, and notification to future landowners or occupants of the existence of the residual contamination.
2. Additionally, because there is soil contamination in a public right-of-way (East Ryan Road, see enclosed map), the Department requires, as a condition of the close out of the case, an agreement between the property owner and the party responsible for maintaining the right-of-way (i.e., the municipality or DOT) that states when or under what conditions future access will be provided and who will pay for the remediation at the time.

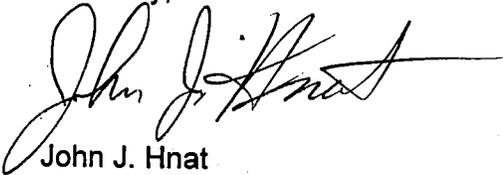

To document these two conditions, the deed restriction and agreement must be complied with within 30 days after receipt of this letter. The property owner must submit to the Department a copy of the recorded affidavit, with the recording information stamped on it, within 15 days after the County Register of Deeds returns the affidavit to

the property owner. The affidavit may be amended in the future if conditions change at the site and the residual contamination is defined or remediated. The municipality or DOT agreement must be submitted to the Department 15 days after the agreement has been signed.

3. Within 60 days all of the groundwater monitoring wells at the site must be abandoned in accordance with s. NR 141.25 (1)(b), and the completed abandonment forms must be submitted to the department. Once the Department receives the abandonment forms, this case will be tracked as closed on our computer tracking system.

The Department appreciates the actions you have taken to investigate and remediate the contamination at this site. If you have any questions or comments, please feel free to contact me at the above address or at (414) 263-8644. Please refer to the FID number at the top of this letter in any future correspondence. Future correspondence should be sent directly to the Remediation and Redevelopment program assistant at the above address.

Sincerely,

John J. Hnat
Hydrogeologist

Soil Deed Restriction
Southbound Tavern
Oak Creek, Wisconsin

This restriction is hereby declared to be a covenant running with the land and shall be fully binding upon all persons acquiring the above-described property whether by descent, devise, purchase, or otherwise. This restriction inures to the benefit of and is enforceable by the Wisconsin Department of Natural Resources, its successors or assigns. The Department, its successors or assigns, may initiate proceedings at law or in equity against any person or persons who violate or are proposing to violate this covenant, to prevent the proposed violation or to recover damages for such violation.

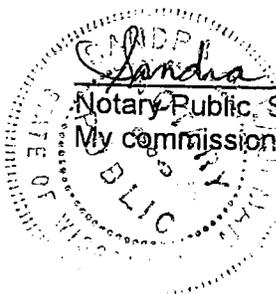

Any person who is or becomes owner of the property described above may request that the Wisconsin Department of Natural Resources or its successor issue a determination that one or more of the restrictions set forth in this covenant is no longer required. Upon the receipt of such a request, the Wisconsin Department of Natural Resources or its successor shall determine whether or not the restrictions contained herein can be extinguished. If the Department or its successor determines that the restrictions can be extinguished, an affidavit, attached to a copy of the Department's written determination, may be recorded by the property owner or other interested party to give notice that this deed restriction, or portions of this deed restriction, are no longer binding.

IN WITNESS WHEREOF, the owners of the property have executed this Declaration of Restrictions, this 30th day of JUNE, 1999.

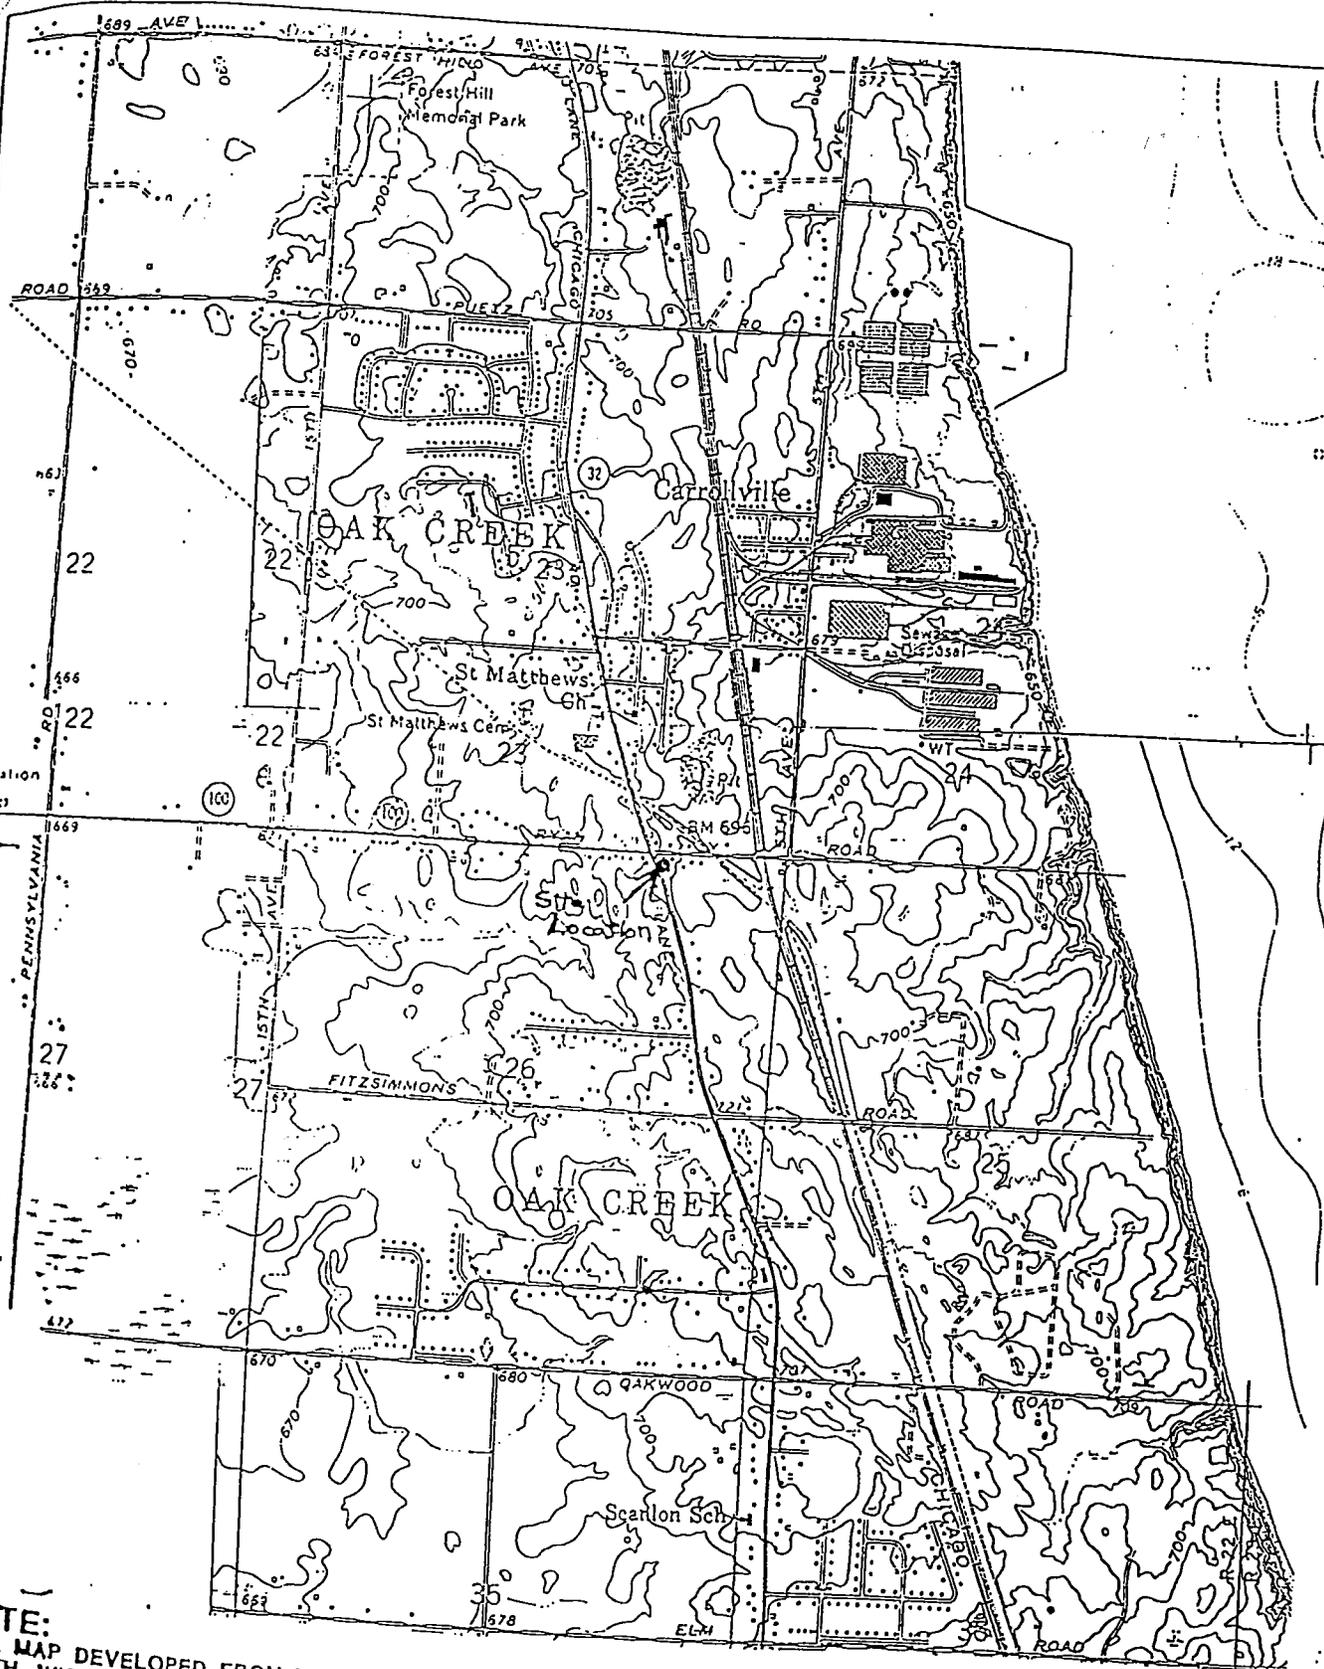

Signature: *Debra Steien*

Southbound Tavern
9504 South Chicago Road
Oak Creek, WI 53154
September 7, 1999

Mr. Wayne St. John
Director of Public Works
City of Oak Creek
8640 South Howell Avenue
Oak Creek, WI 53154

Re: Petroleum-contaminated soil under the road right-of-way of East Ryan Road, north of Southbound Tavern, 9504 South Chicago Road, Oak Creek, WI 53154. Advent Project No. 950196.02. BRRTS # 03-41-003553. PECFA Claim No. 53154-5402-04.

Dear Mr. St. John:

The purpose of this letter is to inform you that petroleum-contaminated soil is present under the road right-of-way of East Ryan Road, north of the Southbound Tavern site, 9504 South Chicago Road, Oak Creek, Wisconsin. This petroleum contamination may have migrated under the right-of-way from the leaking underground storage tanks (LUSTs) previously located at the Southbound Tavern property.

The Wisconsin Department of Natural Resources (WDNR) granted conditional site closure for the Southbound Tavern Site. One of the conditions for closure is that we notify the City of Oak Creek of the presence of petroleum-contaminated soil under the right-of-way of East Ryan Road. The purpose of this notification is to allow you to plan for and protect worker safety in the event that construction activities in this area involve disturbing the contaminated soil. The WDNR also asked us to notify the City of Oak Creek in order to allow us access for remediation of contaminated soil, if encountered.

Advent Environmental Services, Inc., completed the site investigation in August 1996. We also completed an environmental remediation for the site by excavation and off-site bioremediation from May 12 to May 14, 1997.

Advent supervised the excavation of 2,270.41 tons of petroleum-contaminated soil. The soil was transported to the biosite at Superior Emerald Park Landfill, Inc., Muskego, Wisconsin, for bioremediation treatment.

Because of the excavation constraints, some contaminated soil above the site-specific residual contaminants levels (SSRCLs) was left in-place under the south side of East Ryan Road, north of the Southbound Tavern property. Most of these remaining petroleum constituents seem to be bound to the soil and should not present a significant threat to groundwater in the future. I have enclosed a figure that indicates the approximate extent of remaining soil contamination. The remaining contaminated soil is present at approximately 6 to 8 feet below ground surface (bgs).

Page Two
Southbound Tavern
Oak Creek, Wisconsin

We conducted groundwater monitoring at the site from June 11, 1997, to June 29, 1998, to determine the effects of soil removal and natural attenuation on groundwater quality. Laboratory analyses of groundwater samples indicate that natural aerobic and anaerobic

biodegradation of contaminants is occurring at the site. In the last sampling event, in June 1998, no petroleum volatile organics compounds (PVOCs) were detected at concentrations above the NR 140 PAL in any groundwater samples collected from monitoring wells at the site.

If petroleum-contaminated soil on the south side of East Ryan Road, north of the Southbound Tavern property, is encountered in the event of construction activities, the WDNR must be immediately notified and the contamination treated and disposed of in accordance with applicable laws. In such a case, we request that the City of Oak Creek allow the owner of the Southbound Tavern and his or her heirs to remediate the petroleum-contaminated soil located under the road right-of-way. The City of Oak Creek will have no financial obligations regarding remediation of the petroleum-contaminated soil associated with the former USTs located at the Southbound Tavern property.

If you have any questions, please call me at 414-762-6255.

Sincerely,

Debbie Sieren
