RE: **Final Closure**

**Commerce # 53105-2064-65**      **WDNR BRRTS # 03-52-223692**  
Kruzan Oil, 365 West Market Street, Burlington

Dear Mr. Kruzan:

The Wisconsin Department of Commerce (Commerce) has received all items required as conditions for closure of the site referenced above. This case is now listed as "closed" on the Commerce database and will be included on the Wisconsin Department of Natural Resources (WDNR) Geographic Information System (GIS) Registry of Closed Remediation Sites to address residual soil and groundwater contamination. It is in your best interest to keep all documentation related to the environmental activities that were conducted.

If residual contamination is encountered in the future, it must be managed in accordance with all applicable state and federal regulations. If it is determined that any remaining contamination poses a threat, the case may be reopened and further investigation or remediation may be required.

Thank you for your efforts to bring this case to closure. If you have any questions, please contact me in writing at the letterhead address or by telephone at (414) 220-5376.

Sincerely,

A handwritten signature in black ink, appearing to read "L.M.", followed by a long, horizontal, slightly wavy line that extends to the right.

RE: **Conditional Case Closure**

**Commerce #53105-2064-65**      WDNR BRRTS #03-52-223692  
Kruzan Oil, 365 West Market Street, Burlington

One 17,000-gallon Gasoline, One 17,000-gallon Diesel and Two 10,000-gallon Fuel Oil Aboveground Storage Tanks

Dear Mr. Kruzan:

On October 22, 2001, the Wisconsin Department of Commerce (Commerce) PECFA Site Review Section received a request for case closure from Envirogen, Inc., for closure consideration. It is understood that residual soil and groundwater contamination remains on-site. Using the standards established in the NR 700 series, Wisconsin Administrative Code (Wis. Adm. Code), Commerce has determined that this site does not pose a significant threat to the environment and human health. No further investigation or remedial action is necessary.

Envirogen requested that this case be granted "unconditional" closure. Because a benzene concentration in shallow soil exceeds its NR 720, Wis. Adm. Code, table value, Commerce is requiring a deed notification as a condition of closure. Higher petroleum concentrations potentially exist beneath the tanks. In addition, lead is present in groundwater at a concentration that exceeds its NR 140, Wis. Adm. Code, enforcement standard; therefore, Commerce is requiring a groundwater use restriction as a condition of closure.

**The following conditions must be satisfied to obtain final closure:**

- A notification must be placed on the property deed addressing residual petroleum impacts to soil and groundwater on the above-referenced property. To verify that this condition has been met, Commerce will need a copy of the "Notice of Contamination to Property" containing the County Register of Deeds' recording information for the residual impacts to soil and groundwater. Enclosed is an example of a "Notice of Contamination to Property" for your use. If you wish to modify the language, submit a copy to me for approval prior to recording.

Attach Figure 4, "Soil Boring/Monitoring Well Configuration," and Tables 3 and 4, soil and groundwater data, from the *Site Investigation/Closure Assessment Report*, dated October 2001, to the "Notice of Contamination to Property".

Page 2

- The three monitoring wells must be properly abandoned. Forward the appropriate documentation to me at the letterhead address.

**Please note:** As of November 1, 2001, you may elect to have this site recorded on the WDNr's Geographic Information System (GIS) Registry of Closed Remediation Sites in lieu of filing a groundwater use restriction. The GIS Registry is a database listing all closed remediation sites and is available to the public via the Internet. For more information regarding the registration process, including fee and documentation requirements, refer to the enclosed GIS Registry information. At this time, the GIS Registry only addresses residual groundwater contamination.

As of August 31, 2001, State Statute 101.143 requires PECFA claimants seeking reimbursement of interest costs to submit a final reimbursement claim within 120 days after they receive written notification that no further action is required with respect to the discharge at their site. This letter serves as your written notice of "no further action". If your claim is not received within 120 days of the date of this letter, interest costs incurred after 60 days of the date of this letter will not be eligible for PECFA reimbursement. Costs associated with filing deed notices or other restrictions are not eligible for PECFA reimbursement, and the filing of these notices should not delay the claim submittal process.

Thank you for your efforts to protect Wisconsin's environment. If you have any questions, please contact me in writing at the letterhead address or by telephone at (414) 220-5376.

Sincerely,

Linda M. Michalets
