DOCUMENTS NEEDED:

- Closure Letter, and any conditional closure letter or denial letter issued
- Copy of most recent deed, including legal description, for all affected properties
- Certified survey map or relevant portion of the recorded plat map (*if referenced in the legal description*) for all affected properties
- County Parcel ID number, *if used for county*, for all affected properties
- Location Map which outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy). If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site.
- Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy) This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs.
- Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)
- Tables of Latest Soil Analytical Results (no shading or cross-hatching)
- Isoconcentration map(s), *if required for site investigation (SI)* (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of groundwater contamination defined. **If not available, include the latest extent of contaminant plume map.**
- GW: Table of water level elevations, with sampling dates, and free product noted if present
- GW: Latest groundwater flow direction/monitoring well location map (should be 2 maps if maximum variation in flow direction is greater than 20 degrees)
- SOIL: Latest horizontal extent of contamination exceeding generic or SSRCLs, with one contour
- Geologic cross-sections, *if required for SI*. (8.5x14' if paper copy)
- RP certified statement that legal descriptions are complete and accurate
- Copies of off-source notification letters (if applicable)
- Letter informing ROW owner of residual contamination (if applicable)(public, highway or railroad ROW)
- Copy of (soil or land use) deed restriction(s) or deed notice *if any required as a condition of closure*
- Copy of any maintenance plan referenced in the deed restriction.

Mr. Richard Scheid
Adell Ingredients
627 Main Avenue
Adell, WI 53001

SUBJECT: Final Case Closure for the former Adell corporation LUST site (1-6,700 gallon diesel tank and 1-10,500 gallon diesel tank at 627 Maine Avenue, Adell, WI
WDNR BRRTS#03-60-001255 FID#460032760

Dear Mr. Scheid:

In April your site, as described above, was reviewed for closure by the Department of Natural Resources. The Department reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. In a letter dated April 25, 2006, you were notified that conditional closure was granted to this case.

On June 19, 2006, the Department received a copy of the recorded Deed Notice regarding lost groundwater monitoring wells, which satisfies the outstanding condition for site closure. Based on the correspondence and data provided, it appears that this case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation, remediation or other action is required at this time.

FUTURE EXCAVATION OF RESIDUAL CONTAMINATED SOIL

As indicated in the information submitted to the Department, residual soil contamination remains along the perimeter of the remedial excavation beneath the plant expansion and at soil boring AD-13. If soil in these specific locations is excavated in the future, the property owner at the time of excavation will be required to sample and analyze the excavated soil to determine whether the contamination still remains. All current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard at the time of excavation. Based upon the results of sample analysis, the current owner will also have to properly store, treat, or dispose of any excavated materials, in accordance with state and federal laws.

Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the registry. To review the sites on the GIS Registry web page, visit <http://dnr.wi.gov/org/aw/rr/gis/index.htm>

If this is a PECFA site, section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims

not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

Please be aware that this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at (920) 892-8756 ext. 3025.

Sincerely,

Nancy D. Ryan, Hydrogeologist

COUNTY OF SHEBOYGAN

Mike Drennan, being first duly sworn, on oath deposes and says:

1. That he is an employee of Milk Specialties Company and is authorized to sign this notice on behalf of the owner of the above-described property
2. That approval has been given by the Wisconsin Department of Natural Resources for closure of an environmental contamination case involving the above-described property on the condition that a notification of the existence of lost groundwater monitoring wells on the property is recorded at the Office of the Register of Deeds in the county where the above-described property is located.

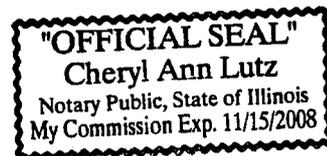

Monitoring wells MW1, MW2, MW3, MW5, MW6, MW7, MW8, MW9, and an excavation sump well were lost. Monitoring well MW4 was located for abandonment. Well locations are shown on attached Figures 1 and 2.

3. That this affidavit is being recorded for the purpose of notifying prospective purchasers and other interested parties that at such time that the lost groundwater monitoring wells are found, the property owner is required to properly abandon the wells in compliance with the requirements in ch. NR 141 Wis. Adm. Code.
