DOCUMENTS NEEDED:

Closure Letter, and any conditional closure letter issued	X
Copy of most recent deed, including legal description, for all affected properties	X
Certified survey map or relevant portion of the recorded plat map (if referenced in the legal description) for all affected properties	X
County Parcel ID number, if used for county, for all affected properties	X
Location Map which outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy). If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site.	X
Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy) This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs.	X
Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)	NA
Tables of Latest Soil Analytical Results (no shading or cross-hatching)	X
Isoconcentration map(s), if required for site investigation (SI) (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of groundwater contamination defined. If not available, include the latest extent of contaminant plume map.	NA
GW: Table of water level elevations, with sampling dates, and free product noted if present	NA
GW: Latest groundwater flow direction/monitoring well location map (should be 2 maps if maximum variation in flow direction is greater than 20 degrees)	NA
SOIL: Latest horizontal extent of contamination exceeding generic or SSRCLs, with one contour	X
Geologic cross-sections, if required for SI. (8.5x14" if paper copy)	X
RP certified statement that legal descriptions are complete and accurate	X
Copies of off-source notification letters (if applicable)	NA
Letter informing ROW owner of residual contamination (if applicable)(public, highway or railroad ROW)	NA
Copy of (soil or land use) deed restriction(s) or deed notice if any required as a condition of closure	NA

SUBJECT: Final Case Closure By Closure Committee With Conditions Met
Former Ramco Super Service
1160 Highway 21, Friendship, Wisconsin

Dear Mr. Madden:

On October 6, 2000, the Wisconsin Department of Natural Resources Westcentral Region Closure Committee reviewed the above referenced case for closure. This committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On October 6, 2000, you were notified that the Closure Committee had granted conditional closure to this case.

On August 12, 2005, the Department received correspondence indicating that you have complied with the requirements of closure. The conditions for closure included monitoring well abandonment and recording a notice on the property deed notifying all potential purchasers of the property that contaminated soil remains on the property. On November 30, 2000, your consultant submitted the monitoring well abandonment forms to the Department. In light of an administrative rule revision you were given the option to have the property placed on the Geographic Information Systems (GIS) Registry of Closed Remediation Sites with the State. On July 19, 2005 you sold the property to Pursuit Paintball, LLC, and on August 12, 2005, Pursuit Paintball, LLC, submitted the GIS fee and packet to satisfy the conditions for closure. Based on the correspondence and data provided, it appears that your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation, remediation or other action is required at this time.

FUTURE EXCAVATION OF RESIDUAL CONTAMINATED SOIL

Residual soil contamination remains along the east wall of the gasoline pump island excavation as indicated in the information submitted to the Department of Natural Resources. If soil in this specific location is excavated in the future, the property owner at the time of excavation will be required to sample and analyze the excavated soil to determine whether the contamination still remains. If contamination remains, all current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard at the time of excavation. **Special precautions may need to be taken during excavation activities to prevent a direct contact health threat to humans.** Based upon the results of sample analysis, the current owner will also have to properly store, treat, or dispose of any excavated materials, in accordance with state and federal laws.

August 12, 2005
Mr. Joseph Madden - Madden Petro, Inc.
Page 2

BRRTS #03-01-107343

In addition, depending on site-specific conditions, construction over contaminated materials may result in vapor migration into enclosed structures or migration along newly placed underground utility lines. The potential for vapor inhalation and mitigation should be evaluated when planning any future redevelopment, and measures should be taken to ensure the continued protection of public health, safety, welfare and the environment at the site.

Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the GIS Registry. To review the sites on the GIS Registry web page, visit <http://dnr.wi.gov/org/aw/rr/gis/index.htm>.

If this is a PECFA site, section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

If there is equipment purchased with PECFA funds remaining at the site, contact the Commerce PECFA Program to determine the method for salvaging the equipment.

Please be aware that this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.

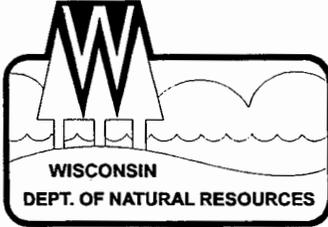

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at (715) 421-7850.

Sincerely,

Tom Hvizdak
Hydrogeologist

FILE COPY

SUBJECT: Ramco Super Service, 1160 Highway 21, Friendship, Wisconsin.

Dear Mr. Madden:

The additional information submitted at the request of the Wisconsin Department of Natural Resources West (DNR) Central Region closeout committee has been reviewed, along with the data originally submitted to the Department, for a determination as to whether or not the case qualified for close out under Wis. Adm. Code (WAC) ch. NR 726. The data presented to the committee indicates that residual petroleum-related soil contamination remains along the east wall of the gasoline pump island excavation. Due to the presence of residual soil contamination, a clean closure can not be granted in this case at this time. However, based on the investigative and remediation documentation provided to the Department, it appears that the extent of the petroleum contamination at the above-named site has been investigated and remediated to the extent practicable, the location of the potential residual soil contamination does not pose a threat to direct contact under current site conditions, and that natural attenuation will be effective in reducing the mass of residual contamination at this site. Therefore, the Department considers the case "closed," having determined pursuant to WAC NR 726, that no further action is necessary on the site at this time, providing the property owner complies with the following two conditions.

The first condition of the closeout for this case is that a notice be filed on the property deed notifying potential purchasers that residual soil contamination is present along the east wall of the gasoline pump island excavation, that it may represent solid waste should it be excavated in the future, that it may represent a direct contact hazard to workers should they be exposed to the material, and if future excavation exposes impacted material, proper steps should be taken to address the potential risks to workers and make sure the material is properly disposed of as solid waste.

A draft copy of the deed notice and a copy of the most recent deed for the property to verify the property description on the draft deed notice must be submitted to the Department for approval within 30 days, and the deed document must be registered with the County Register of Deeds fifteen days after receiving Department approval of the draft deed notice. To document that this condition has been complied with, the property owner must submit to the Department a copy of

Quality Natural Resources Management
Through Excellent Customer Service

October 6, 2000
Mr. Joseph Madden - Madden Petro, Inc.
Page 2

BRRTS #03-01-107343

the recorded deed notice, with the recording information stamped on it, within 15 days after the County Register of Deeds returns the deed notice to the property owner. The deed notice may be amended in the future with the approval of Department if conditions change at the site such that the residual contamination is completely remediated (if deemed necessary).

The second condition of the closeout of this case is the proper abandonment of the monitoring wells currently at the site (pursuant of WAC NR 141). Documents should be forwarded to me at the WDNR Wisconsin Rapids office that substantiates proper abandonment (Form 3300-5W).

If you have additional relevant information which was not formerly provided to the Department, and which you feel would significantly impact the Department's closure decision, you may submit that information for our re-evaluation of case closure.

You should note that this letter does not constitute Department "certification" under s. 292.15(2)(a)3, Stats., as created by 1993 Wisconsin Act 453 (May 12, 1994). Also, in 1997 Wisconsin Act 27, the legislature amended s. 292.15, Wis. Stats., creating the new "Voluntary Party Remediation and Exemption from Liability" statute. This statute provides liability protection for persons who did not intentionally or recklessly cause the release of a hazardous substance and who conducts an environmental investigation and cleans up property by restoring the environment to the extent practicable and in accordance with rules promulgated by the Department. Upon completion of the cleanup, the person receives a "certificate of completion" that provides an exemption from the "Hazardous Substance Spills" statute and protection from future liability for the past releases. You must apply for the program by filling out an application form and fees are charged to cover administrative costs associated with the program. If you are interested in more information about the program or would like an application package, please call Loren Brumberg at the West Central Region Office in Eau Claire at 715-839-3770.

Once the deed notice, and the monitoring well abandonment forms, have been properly submitted to this office we will issue the final closure letter for this site. Thank you for your efforts to cleanup Wisconsin's environment. If you should have any questions regarding this letter please contact me at (715) 421-7850.

Sincerely,

Tom Hvizdak
Hydrogeologist

"EXHIBIT A"

Mr. Joseph Madden
Madden Petro, Inc.
1160 Hwy. 21
Friendship, WI 53934

SUBJECT: Ramco Super Service, 1160 Highway 21, Friendship, Wisconsin.

Dear Mr. Madden:

The additional information submitted at the request of the Wisconsin Department of Natural Resources West (DNR) Central Region closeout committee has been reviewed, along with the data originally submitted to the Department, for a determination as to whether or not the case qualified for close out under Wis. Adm. Code (WAC) ch. NR 726. The data presented to the committee indicates that residual petroleum-related soil contamination remains along the east wall of the gasoline pump island excavation. Due to the presence of residual soil contamination, a clean closure can not be granted in this case at this time. However, based on the investigative and remediation documentation provided to the Department, it appears that the extent of the petroleum contamination at the above-named site has been investigated and remediated to the extent practicable, the location of the potential residual soil contamination does not pose a threat to direct contact under current site conditions, and that natural attenuation will be effective in reducing the mass of residual contamination at this site. Therefore, the Department considers the case "closed," having determined pursuant to WAC NR 726, that no further action is necessary on the site at this time, providing the property owner complies with the following two conditions.

The first condition of the closeout for this case is that a notice be filed on the property deed notifying potential purchasers that residual soil contamination is present along the east wall of the gasoline pump island excavation, that it may represent solid waste should it be excavated in the future, that it may represent a direct contact hazard to workers should they be exposed to the material, and if future excavation exposes impacted material, proper steps should be taken to address the potential risks to workers and make sure the material is properly disposed of as solid waste.

A draft copy of the deed notice and a copy of the most recent deed for the property to verify the property description on the draft deed notice must be submitted to the Department for approval within 30 days, and the deed document must be registered with the County Register of Deeds fifteen days after receiving Department approval of the draft deed notice. To document that this condition has been complied with, the property owner must submit to the Department a copy of

October 6, 2000
Mr. Joseph Madden - Madden Petro, Inc.
Page 2

BRRTS #03-01-107343

the recorded deed notice, with the recording information stamped on it, within 15 days after the County Register of Deeds returns the deed notice to the property owner. The deed notice may be amended in the future with the approval of Department if conditions change at the site such that the residual contamination is completely remediated (if deemed necessary).

The second condition of the closeout of this case is the proper abandonment of the monitoring wells currently at the site (pursuant of WAC NR 141). Documents should be forwarded to me at the WDNR Wisconsin Rapids office that substantiates proper abandonment (Form 3300-5W).

If you have additional relevant information which was not formerly provided to the Department, and which you feel would significantly impact the Department's closure decision, you may submit that information for our re-evaluation of case closure.

You should note that this letter does not constitute Department "certification" under s. 292.15(2)(a)3, Stats., as created by 1993 Wisconsin Act 453 (May 12, 1994). Also, in 1997 Wisconsin Act 27, the legislature amended s. 292.15, Wis. Stats., creating the new "Voluntary Party Remediation and Exemption from Liability" statute. This statute provides liability protection for persons who did not intentionally or recklessly cause the release of a hazardous substance and who conducts an environmental investigation and cleans up property by restoring the environment to the extent practicable and in accordance with rules promulgated by the Department. Upon completion of the cleanup, the person receives a "certificate of completion" that provides an exemption from the "Hazardous Substance Spills" statute and protection from future liability for the past releases. You must apply for the program by filling out an application form and fees are charged to cover administrative costs associated with the program. If you are interested in more information about the program or would like an application package, please call Loren Brumberg at the West Central Region Office in Eau Claire at 715-838-3770.

Once the deed notice, and the monitoring well abandonment forms, have been properly submitted to this office we will issue the final closure letter for this site. Thank you for your efforts to cleanup Wisconsin's environment. If you should have any questions regarding this letter please contact me at (715) 421-7850.

Sincerely,

Tom Hvizdak

Summary of Confirmatory Soil Quality Test Results for Ramco Super Service
1160 Highway 21, Friendship, Wisconsin

Sample No.	Date Collected	PID (Instrument Units)	GRO (ppm)	DRO (ppm)	Benzene (ppb)	Ethylbenzene (ppb)	Toluene (ppb)	Total Xylenes (ppb)	Trimethylbenzenes (ppb)	MTBE (ppb)
A-1W North, 3'	11/8/99	2.2	<5.2	NT	<25	<25	<25	<25	<50	<25
A-1 Bottom, 5.5'	11/8/99	4.6	<5.2	NT	<25	<25	<25	<25	<50	<25
B-1W East, 3'	11/8/99	146	<5.2	NT	370	210	1500	1,100	125	390
B-1 West, 3'	11/8/99	3.2	<5.2	NT	<25	<25	<25	<25	<50	<25
C-1W North, 15'	11/9/99	20	NT	14	<25	<25	<25	<25	<50	<25
C/D-1W West, 15'	11/9/99	10	NT	NT*	<25	88	<25	350	1,550	<25
C/D-1 Bottom, 20'	11/9/99	30	NT	1,000	<25	110	48	500	1,450	<25
D-1W South, 12'	11/9/99	18	NT	<5.9	<25	<25	<25	<25	<50	<25
D-2W East, 16'	11/9/99	18	NT	74	<25	<25	<25	<25	50 ₁₂₀	<25
Staged Soil Stockpile	11/9/99	7	NT	150	<25	<25	<25	<25	<50	<25

MTBE = Methyl-tertiary-butyl ether

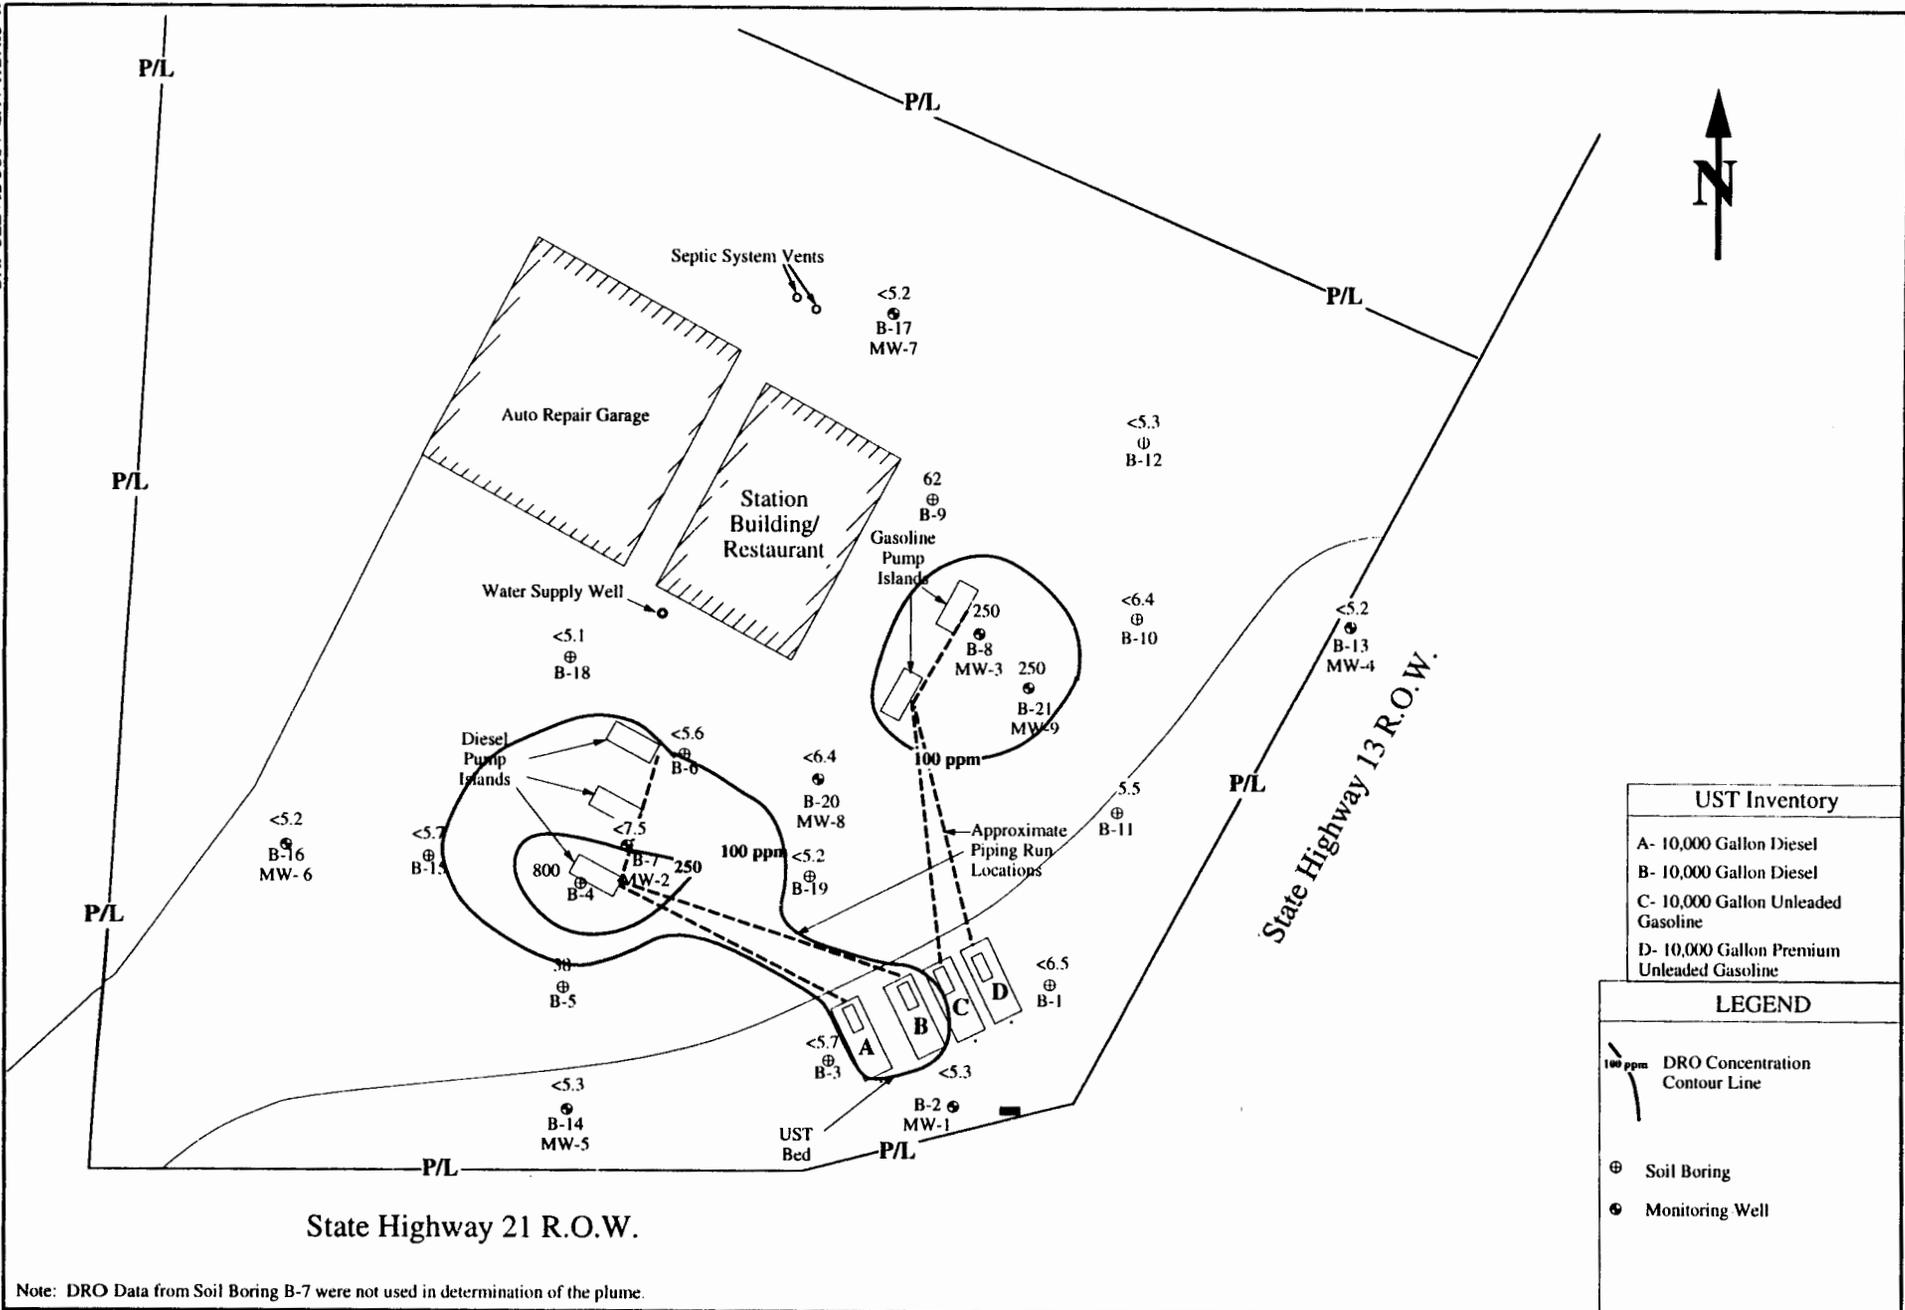

NT = Not tested for this parameter.

Note: *= Soil sample C/D-1W West, 15' was not tested for DRO, due to a laboratory error.

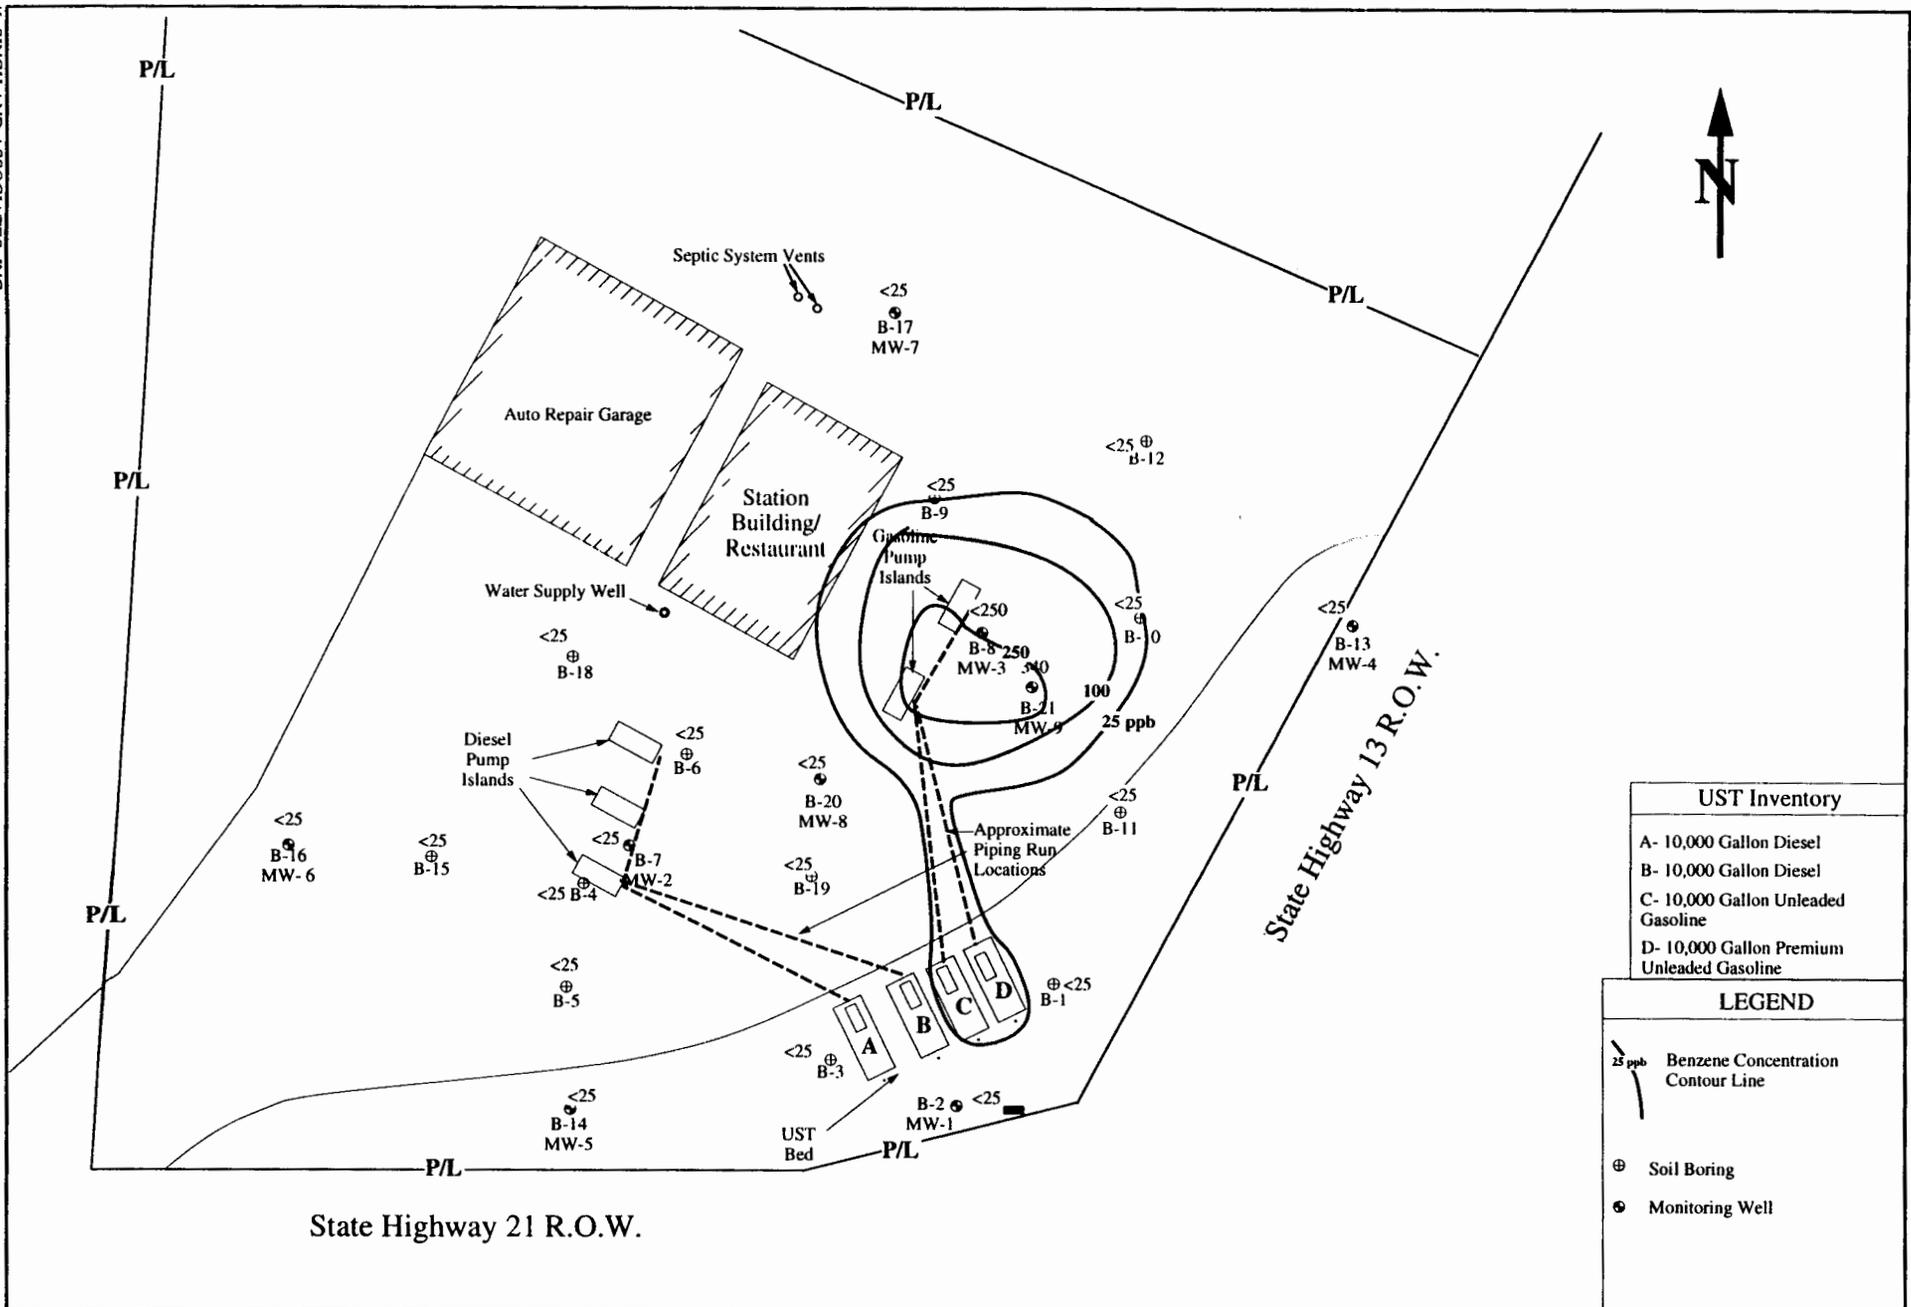

Note: GRO Data from Soil Borings B-6, B-10 and B-19 were not used in determination of the plume
