GIS Registry Checklist

Form 4400-245 (R 3/10)

This Adobe Fillable form is intended to provide a list of information that is required for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request. The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

BRRTS #: 03-10-000949 PARCEL ID #: 261.1357.000 & 261.1355.000

ACTIVITY NAME: NEILLSVILLE 76 STATION WTM COORDINATES: X: 472706 Y: 453411

CLOSURE DOCUMENTS (the Department adds these items to the final GIS packet for posting on the Registry)

- [X] **Closure Letter**
- [ ] **Maintenance Plan** (*if activity is closed with a land use limitation or condition (land use control) under s. 292.12, Wis. Stats.*)
- [ ] **Continuing Obligation Cover Letter** (for property owners affected by residual contamination and/or continuing obligations)
- [X] **Conditional Closure Letter**
- [ ] **Certificate of Completion (COC)** (for VPLE sites)

SOURCE LEGAL DOCUMENTS

- [X] **Deed:** The most recent deed as well as legal descriptions, for the **Source Property** (where the contamination originated). Deeds for other, off-source (off-site) properties are located in the **Notification** section.
  Note: *If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.*
- [X] **Certified Survey Map:** A copy of the certified survey map or the relevant section of the recorded plat map *for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map.* (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).

  Figure #: **Title: Portion of Plat Map**
- [X] **Signed Statement:** A statement signed by the Responsible Party (RP), which states that he or she believes that the attached legal description accurately describes the correct contaminated property.

MAPS (meeting the visual aid requirements of s. NR 716.15(2)(h))

Maps must be no larger than 11 x 17 inches unless the map is submitted electronically.

- [X] **Location Map:** A map outlining all properties within the contaminated site boundaries on a U.S.G.S. topographic map or plat map in sufficient detail to permit easy location of all parcels. If groundwater standards are exceeded, include the location of all potable wells within 1200 feet of the site.
  Note: *Due to security reasons municipal wells are not identified on GIS Packet maps. However, the locations of these municipal wells must be identified on Case Closure Request maps.*

  General Site Location Map

  Figure #: 1 **Title: General Site Location Map**
- [X] **Detailed Site Map:** A map that shows all relevant features (buildings, roads, individual property boundaries, contaminant sources, utility lines, monitoring wells and potable wells) within the contaminated area. This map is to show the location of all contaminated public streets, and highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding a ch. NR 140 Enforcement Standard (ES), and/or in relation to the boundaries of soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Levels (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.

  Figure #: 2 **Title: Site Layout Map**
- [X] **Soil Contamination Contour Map:** For sites closing with residual soil contamination, this map is to show the location of all contaminated soil and a single contour showing the horizontal extent of each area of contiguous residual soil contamination that exceeds a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL)as determined under s. NR 720.09, 720.11 and 720.19.

  Figure #: 9 **Title: Soil Chemistry Results**

BRRTS #: 03-10-000949 ACTIVITY NAME: NEILLSVILLE 76 STATION

MAPS (continued)

☒ **Geologic Cross-Section Map:** A map showing the source location and vertical extent of residual soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL). If groundwater contamination exceeds a ch. NR 140 Enforcement Standard (ES) when closure is requested, show the source location and vertical extent, water table and piezometric elevations, and locations and elevations of geologic units, bedrock and confining units, if any.

Figure #: 10 **Title: Geologic Cross Section A-A**

Figure #: 3 **Title: Geologic Cross Section B-B**

☒ **Groundwater Isoconcentration Map:** For sites closing with residual groundwater contamination, this map shows the horizontal extent of all groundwater contamination exceeding a ch. NR140 Preventive Action Limit (PAL) and an Enforcement Standard (ES). Indicate the direction and date of groundwater flow, based on the most recent sampling data.
Note: *This is intended to show the total area of contaminated groundwater.*

Figure #: 4 **Title: Groundwater Data**

☐ **Groundwater Flow Direction Map:** A map that represents groundwater movement at the site. If the flow direction varies by more then 20° over the history of the site, submit 2 groundwater flow maps showing the maximum variation in flow direction.

Figure #: **Title:**

Figure #: **Title:**

TABLES (meeting the requirements of s. NR 716.15(2)(h)(3))

Tables must be no larger than 11 x 17 inches unless the table is submitted electronically. Tables must not contain shading and/or cross-hatching. The use of **BOLD** or *ITALICS* is acceptable.

☒ **Soil Analytical Table:** A table showing remaining soil contamination with analytical results and collection dates.
Note: This is one table of results for the contaminants of concern. Contaminants of concern are those that were found during the site investigation, that remain after remediation. It may be necessary to create a new table to meet this requirement.

Table #: 3 **Title: Soil Chemistry Data - Laboratory**

☒ **Groundwater Analytical Table:** Table(s) that show the most recent analytical results and collection dates, for all monitoring wells and any potable wells for which samples have been collected.

Table #: 1 **Title: Analytical Results - Groundwater**

☒ **Water Level Elevations:** Table(s) that show the previous four (at minimum) water level elevation measurements/dates from all monitoring wells. If present, free product is to be noted on the table.

Table #: 1 **Title: Analytical Results - Groundwater**

IMPROPERLY ABANDONED MONITORING WELLS

For each monitoring well not properly abandoned according to requirements of s. NR 141.25 include the following documents.
Note: *If the site is being listed on the GIS Registry for only an improperly abandoned monitoring well you will only need to submit the documents in this section for the GIS Registry Packet.*

☒ **Not Applicable**

☐ **Site Location Map:** A map showing all surveyed monitoring wells with specific identification of the monitoring wells which have not been properly abandoned.
Note: *If the applicable monitoring wells are distinctly identified on the Detailed Site Map this Site Location Map is not needed.*

Figure #: **Title:**

☐ **Well Construction Report:** Form 4440-113A for the applicable monitoring wells.

☐ **Deed:** The most recent deed as well as legal descriptions for each property where a monitoring well was not properly abandoned.

☐ **Notification Letter:** Copy of the notification letter to the affected property owner(s).

BRRTS #: 03-10-000949 ACTIVITY NAME: NEILLSVILLE 76 STATION

NOTIFICATIONS

Source Property

☒ **Not Applicable**

☐ **Letter To Current Source Property Owner:** If the source property is owned by someone other than the person who is applying for case closure, include a copy of the letter notifying the current owner of the source property that case closure has been requested.

☐ **Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying current source property owner.

Off-Source Property

Group the following information per individual property and label each group according to alphabetic listing on the "Impacted Off-Source Property" attachment.

☐ **Not Applicable**

☒ **Letter To "Off-Source" Property Owners:** Copies of all letters sent by the Responsible Party (RP) to owners of properties with groundwater exceeding an Enforcement Standard (ES), and to owners of properties that will be affected by a land use control under s. 292.12, Wis. Stats.
Note: *Letters sent to off-source properties regarding residual contamination must contain standard provisions in Appendix A of ch. NR 726.*

Number of "Off-Source" Letters: 8

☒ **Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying any off-source property owner.

☒ **Deed of "Off-Source" Property:** The most recent deed(s) as well as legal descriptions, for all affected deeded **off-source property(ies).** This does not apply to right-of-ways.
Note: *If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.*

☒ **Letter To "Governmental Unit/Right-Of-Way" Owners:** Copies of all letters sent by the Responsible Party (RP) to a city, village, municipality, state agency or any other entity responsible for maintenance of a public street, highway, or railroad right-of-way, within or partially within the contaminated area, for contamination exceeding a groundwater Enforcement Standard (ES) and/or soil exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL).

Number of "Governmental Unit/Right-Of-Way Owner" Letters: 3

Impacted Off-Source Property Information

Form 4400-246 (R 3/08)

This fillable form is intended to provide a list of information that must be submitted for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request (Section H). The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

RE: **Final Closure**

Commerce # 54456-2149-10-A DNR BRRTS # 03-10-000949
Neillsville 76 Station, 110 E Division St, Neillsville

Dear Mr. Baltus:

The Wisconsin Department of Commerce (Commerce) has received all items required as conditions for closure of the site referenced above. This site is now listed as "closed" on the Commerce database and will be included on the Department of Natural Resources (DNR) Geographic Information System (GIS) Registry of Closed Remediation Sites to address residual soil and groundwater contamination. To review all sites on the GIS Registry web page, visit http://dnr.wi.gov/org/aw/rr/gis/index.htm. If you intend to construct or reconstruct a potable well on this property, you must get prior DNR approval.

All current and future owners and occupants of the property need to be aware that excavation of contaminated soil may pose a hazard. Special precautions may be needed to prevent inhalation, ingestion or dermal contact with the residual contamination when it is removed. If soil is excavated, the property owner at the time of excavation must have the soil sampled and analyzed to determine if residual contamination remains. If sampling confirms that contamination is present, the property owner at the time of excavation must determine whether the material would be considered solid or hazardous waste and ensure that any storage, treatment or disposal is in compliance with applicable statutes and rules.

Depending on site-specific conditions, construction over contaminated materials may result in vapor migration into enclosed structures or along newly placed underground utility lines. The potential for vapor inhalation and migration should be evaluated when planning any future redevelopment, and measures should be taken to ensure the continued protection of public health, safety, welfare and the environment at the site.

Costs for sampling and excavation activities conducted after case closure are not eligible for PECFA reimbursement. However, if it is determined that any undisturbed remaining petroleum contamination poses a threat, the case may be reopened and further investigation or remediation may be required. If this case is reopened, any original claim under the PECFA fund would also reopen and you may apply for assistance to the extent of remaining eligibility. It is in your best interest to keep all documentation related to environmental activities at your site.

Thank you for your efforts to bring this case to closure. If you have any questions, please contact me in writing at the letterhead address or by telephone at (608) 266-0593.

Sincerely,

Brian F. Taylor

RE: **Conditional Case Closure**

Commerce # 54456-2149-10-A DNR BRRTS # 03-10-000949
Neillsville 76 Station, 110 E Division St, Neillsville

Dear Mr. Baltus:

The Wisconsin Department of Commerce (Commerce) has reviewed the request for case closure prepared by your consultant, Tetra Tech - Environmental, for the site referenced above. It is understood that residual soil and groundwater contamination remains on site. Commerce has determined that this site does not pose a significant threat to human health and the environment. No further investigation or remedial action is necessary.

Information submitted with your closure request will be included on the Department of Natural Resources (DNR) GIS Registry of Closed Remediation Sites. All sites on the Registry can be viewed via the Remediation and Redevelopment (RR) Sites Map at http://dnr.wi.gov/org/aw/rr/gis/index.htm. Because residual contamination remains at the time of case closure, if you intend to construct or reconstruct a potable well on this property, you must get prior DNR approval.

The following conditions must be satisfied to obtain final closure:

- The GIS Registry packet submitted by your previous consultant, Cedar Corporation, is incomplete. Please submit the following to complete the packet.
  - Obtain the property deed and send certified off-site contamination letter to the current owner of 111 East Division Street (currently known as the Olympic Restaurant).
  - Send certified off-site contamination letter to the current owner of the former Neillsville 76 Station located at 110 East Division Street (currently known as Mary's Mobile).
  - Send certified off-site contamination letter to the current owner of the Auto Stop located at 1 Hewitt Street.

- All monitoring wells groundwater pump and treat system components must be properly abandoned within 60 days and the appropriate documentation forwarded to Commerce at the letterhead address within 120 days of the date of this letter. Noncompliance with the abandonment requirement and deadline can result in enforcement action and financial penalties.

All current and future owners and occupants of the property need to be aware that excavation of contaminated soil may pose a hazard. Special precautions may be needed to prevent inhalation, ingestion or dermal contact with the residual contamination when it is removed. If soil is excavated, the property

owner at the time of excavation must have the soil sampled and analyzed to determine if residual contamination remains. If sampling confirms that contamination is present, the property owner at the time of excavation must determine whether the material would be considered solid or hazardous waste and ensure that any storage, treatment or disposal is in compliance with applicable standards and rules. Costs for sampling and excavation activities conducted after the date of this letter are not eligible for PECFA reimbursement.

Depending on site-specific conditions, construction over contaminated materials may result in vapor migration into enclosed structures or along newly placed underground utility lines. The potential for vapor inhalation and mitigation should be evaluated when planning any future redevelopment, and measures should be taken to ensure the continued protection of public health, safety, welfare and the environment at the site.

Timely filing of your final PECFA claim (if applicable) is encouraged. If your claim is not received within 120 days of the date of this letter, interest costs incurred after 60 days from the date of this letter will not be eligible for PECFA reimbursement.

Thank you for your efforts to protect Wisconsin's environment. If you have any questions, please contact me in writing at the letterhead address or by telephone at (608) 266-0593.

Sincerely,

Brian F. Taylor
Senior Hydrogeologist

Property.

I, John Baltus, in accordance with Ch. 292, Wis. Stats. and Ch. NR726 Wis. Adm. Code, certify the correct legal description for the property located at 110 East Division Street, in the City of Neillsville, Clark County, Wisconsin, is accurately described as 'Commencing at a point 550 feet East of the Northwest corner of Section 23-24-2 West, thence running South 20 rods, thence East 8 rods, thence North 20 rods, thence West 8 rods to the place of beginning, EXCEPTING therefrom the following: Commencing at a point 550 feet East of the Northwest corner of Section 23-24-2 West , thence running South 20 rods from the center of the road, thence East 115 feet, thence North 125 feet, thence West 30 feet, thence North 40 feet, thence West 5 feet, thence North 165 feet, thence West 80 feet to the point of beginning; being part of Assessment Lot 703 of C.S. Stockwell's Plat of 1921 to the City of Neillsville.

I, John Baltus, in accordance with Ch. 292, Wis. Stats. and Ch. NR726 Wis. Adm. Code, certify the correct legal description for the property located at 104 East Division Street, in the City of Neillsville, Clark County, Wisconsin, is accurately described as 'Commencing 682 feet East and 33 feet South of the Northwest corner of the NW ¼ of the NW ¼ of Section 23-24-2 West, thence running South 18 rods, thence East 8 8/9 rods, thence North 18 rods, thence West 8 8/9 rods to the point of beginning; being the East 10 feet of Assessment Lot 703 and all of Assessment Lot 704 of C.S. Stockwell's Plat of 1921 to the City of Neillsville.

Impacted Off-Source Property Information

Form 4400-246 (R 3/08)

This fillable form is intended to provide a list of information that must be submitted for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request (Section H). The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

RE: Notification of Existing Petroleum Contamination
Beneath 100 Division Street,
Neillsville, Clark County, Wisconsin

Dear Witte Properties LLC.:

Baltus Oil Company has completed an environmental investigation and remediation of petroleum contamination at the former Neillsville 76 at 110 East Division Street (STH 10) in Neillsville, WI. In accordance with the conditions for case closure (Wis. Admin. Code NR726), Baltus Oil is required to notify all property owners of the contamination that has migrated under their property as well as the City where City street right of way may be affected.

Ground water contamination originating from petroleum storage and dispensing facilities in the area has migrated beneath the adjacent properties. The levels of petroleum contamination in the ground water beneath the right-of-way are above the State ground water enforcement standards found in Chapter NR140, Wisconsin Administrative Code. However, the environmental consultants who have investigated this contamination have determined that this ground water contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the clean-up at this site will meet the requirements for case closure that are found in Chapter NR726 and Chapter NR746, Wisconsin Administrative Code, and I will be requesting that the Department of Commerce accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the Department will not be requiring any further investigation or clean-up to be taken, other than the reliance on natural attenuation.

Since the source of ground water contamination is not on your property, neither you nor any subsequent owner of your property will be held responsible for investigation or clean-up of this ground water contamination, as long as you and any subsequent owners comply with the requirements of Section 292.13, Wisconsin Statutes, including allowing access to your property for investigation or clean-up if access is required. For further information on the requirements of Section 292.13, Wisconsin Statutes, you may call 800-367-6076 for calls originating in Wisconsin to obtain a copy of the Department of Natural Resources' publication #RR-589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination, a copy of which is attached.

The Department of Commerce will not review my final closure request for at least 30 days after the date of this letter. As an affected property owner, you have the right to contact the Department to provide any technical information that you may have that indicates that closure should not be granted at this site. If you would like to submit any information to the Wisconsin

should not be granted at this site. If you would like to submit any information to the Wisconsin Department of Natural Resources that is relevant to the closure request, you should mail that information to: Wisconsin Department of Natural Resources, Tom Kendzierski 715-839-1604, PO Box 4001, Eau Claire, WI 54702-4001 Thomas.Kendzierski@dnr.state.wi.us.

If this case is closed, all properties within the site boundaries where ground water contamination exceeds Chapter NR140 ground water enforcement standards will be listed on the Department of Natural Resources' geographic information system (GIS Registry) of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where ground water contamination above Chapter NR140 Enforcement Standards was found at the time that the case was closed. The GIS Registry is available to the general public on the Department of Natural Resources internet web site.

Should you or any subsequent property owner wish to construct or reconstruct a well on your property, special well construction standards may be necessary to protect the well from the residual ground water contamination. Any well driller who proposes to construct the well on your property in the future will first need to call the Digger's Hotline (800-242-8511) if your property is located outside the service area of a municipally owned water system, or contact the Drinking Water program within the designated service area of a municipally owned water system, to determine if there is a need for special well construction standards.

Once the Department makes a decision on my closure request, it will be documented in a letter. If the Department grants closure, you may obtain a copy of this letter by requesting a copy from Baltus Oil Company by writing to us at the address given below or by accessing the DNR GIS Registry of Closed Remediation Sites on the internet at: www.dnr.state.wi.us/org/at/et/geo/gwur. A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

If you need more information, you may contact me at PO Box 1180, Marshfield, WI 54449, 715-384-3178, or my environmental consultant (Scott McCurdy) at Cedar Corporation, 604 Wilson Avenue, Menomonie, WI 54751, 715-235-9081.

Sincerely,

BALTUS OIL COMPANY

John Baltus

Ms. Gail L. Campbell
2 Hewett Street
Neillsville, WI 54456

RE: Notification of Existing Petroleum Contamination
Beneath 2 Hewett Street,
Neillsville, Clark County, Wisconsin

Dear Ms. Campbell:

Baltus Oil Company has completed an environmental investigation and remediation of petroleum contamination at the former Neillsville 76 at 110 East Division Street (STH 10) in Neillsville, WI. In accordance with the conditions for case closure (Wis. Admin. Code NR726), Baltus Oil is required to notify all property owners of the contamination that has migrated under their property as well as the City where City street right of way may be affected.

Ground water contamination originating from petroleum storage and dispensing facilities in the area has migrated beneath the adjacent properties. The levels of petroleum contamination in the ground water beneath the right-of-way are above the State ground water enforcement standards found in Chapter NR140, Wisconsin Administrative Code. However, the environmental consultants who have investigated this contamination have determined that this ground water contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the clean-up at this site will meet the requirements for case closure that are found in Chapter NR726 and Chapter NR746, Wisconsin Administrative Code, and I will be requesting that the Department of Commerce accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the Department will not be requiring any further investigation or clean-up to be taken, other than the reliance on natural attenuation.

Since the source of ground water contamination is not on your property, neither you nor any subsequent owner of your property will be held responsible for investigation or clean-up of this ground water contamination, as long as you and any subsequent owners comply with the requirements of Section 292.13, Wisconsin Statutes, including allowing access to your property for investigation or clean-up if access is required. For further information on the requirements of Section 292.13, Wisconsin Statutes, you may call 800-367-6076 for calls originating in Wisconsin to obtain a copy of the Department of Natural Resources' publication #RR-589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination, a copy of which is attached.

The Department of Commerce will not review my final closure request for at least 30 days after the date of this letter. As an affected property owner, you have the right to contact the Department to provide any technical information that you may have that indicates that closure should not be granted at this site. If you would like to submit any information to the Wisconsin

6 Hewett Street
Neillsville, WI 54456

RE: Notification of Existing Petroleum Contamination
Beneath 6 Hewett Street,
Neillsville, Clark County, Wisconsin

Dear Mr. and Mrs. Quicker:

Baltus Oil Company has completed an environmental investigation and remediation of petroleum contamination at the former Neillsville 76 at 110 East Division Street (STH 10) in Neillsville, WI. In accordance with the conditions for case closure (Wis. Admin. Code NR726), Baltus Oil is required to notify all property owners of the contamination that has migrated under their property as well as the City where City street right of way may be affected.

Ground water contamination originating from petroleum storage and dispensing facilities in the area has migrated beneath the adjacent properties. The levels of petroleum contamination in the ground water beneath the right-of-way are above the State ground water enforcement standards found in Chapter NR140, Wisconsin Administrative Code. However, the environmental consultants who have investigated this contamination have determined that this ground water contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the clean-up at this site will meet the requirements for case closure that are found in Chapter NR726 and Chapter NR746, Wisconsin Administrative Code, and I will be requesting that the Department of Commerce accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the Department will not be requiring any further investigation or clean-up to be taken, other than the reliance on natural attenuation.

Since the source of ground water contamination is not on your property, neither you nor any subsequent owner of your property will be held responsible for investigation or clean-up of this ground water contamination, as long as you and any subsequent owners comply with the requirements of Section 292.13, Wisconsin Statutes, including allowing access to your property for investigation or clean-up if access is required. For further information on the requirements of Section 292.13, Wisconsin Statutes, you may call 800-367-6076 for calls originating in Wisconsin to obtain a copy of the Department of Natural Resources' publication #RR-589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination, a copy of which is attached.

The Department of Commerce will not review my final closure request for at least 30 days after the date of this letter. As an affected property owner, you have the right to contact the Department to provide any technical information that you may have that indicates that closure should not be granted at this site. If you would like to submit any information to the Wisconsin

Re: Groundwater contamination on your property from the Auto Stop Site,
1 Hewett Street, Neillsville, Clark County, Wisconsin.
WDNR BRRTS #03-49-109421. WDCOM #54456-2162-01.
Tetra Tech Project #114-331050.

Tetra Tech has completed groundwater monitoring at the Auto Stop site. We are required to notify off site property owners that groundwater contamination is present on your property at 11 Hewett Street in Neillsville, Wisconsin. Petroleum contaminated groundwater is present in the area north of the Auto Stop property. Groundwater contamination on your property is part of plume that extents for approximately 550 feet in a southeast to northwest direction. Groundwater contamination originating from the Auto Stop property has comingled with groundwater contamination from the former Neillsville 76 site (WDNR BRRTS #03-49-000949). Petroleum contaminated groundwater is present in the area of monitoring well ASMW-3. See enclosed figures and tables.

Groundwater contamination has originated from the properties located at 1 Hewett and 110 E. Division Streets. The levels of petroleum contamination in the groundwater on your property are above the state groundwater enforcement standards found in chapter NR 140, Wisconsin Administrative Code. However, this groundwater contaminant plume is decreasing and will naturally degrade over time. We believe that allowing natural attenuation to complete the cleanup at this site will meet the requirements for case closure that are found in chapter NR 72 and chapter Comm 46, Wisconsin Administrative Code, and we are requesting that the Wisconsin Department of Commerce (WDCOM) accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the WDCOM will not be requiring any further investigation or cleanup action to be taken, other than the reliance on natural attenuation.

Since the source of the groundwater contamination is not on your property, neither you nor any subsequent owner of your property will be held responsible for investigation or cleanup of this contamination, as long as you and any subsequent owners comply with the requirements of section 292.13, Wisconsin Statutes, including allowing access to your property for environmental investigation or cleanup if access is required. To obtain a copy of the WDNRs' publication #RR–589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off–Site Contamination, you may visit http://www.dnr.state.wi.us/org/aw/rr/archives/pubs/RR589.pdf or call 608–267–3859.

The WDCOM will not review our closure request for at least 30 days after the date of this letter. As an affected property owner, you have a right to contact the WDCOM to provide any technical information that you may have that indicates that closure should not be granted for this site. If you would like to submit any information to the WDCOM that is relevant to this closure request, you should mail that information to: Brian F. Taylor, WDCOM, P.O. Box 8044, Madison, WI 53708-8044, 608-266-0593.

OFF-SOURCE
E
PROPERTY

TETRA TECH

If this case is closed, all properties within the site boundaries where groundwater contamination exceeds chapter NR 140 groundwater enforcement standards will be listed on the WDNRs' GIS Registry of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where groundwater contamination above chapter NR 140 enforcement standards was found at the time that the case was closed. This GIS Registry will be available to the general public on the WDNRs' internet web site. Should you or any subsequent property owner wish to construct or reconstruct a potable well on this property, you must get WDNR approval.

Once the Department makes a decision on the closure request, it will be documented in a letter. If the WDCOM grants closure, you may obtain a copy of this letter by requesting a copy from me, by writing to the agency address given above or by accessing the WDNR GIS Registry of Closed Remediation Sites on the internet at http://www.dnr.wi.gov/org/aw/rr/gis/Index.htmhttp://www.dnr.state.wi.us/org/water/dwg/3300254.pdf. A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

I have enclosed figures illustrating the approximate location of the contaminated groundwater and tables presenting the groundwater samples analytical results so you have an idea of the contaminant concentrations below your property.

If you need more information, you may contact me at 715-832-0282 or you may contact Brian Taylor with WDCOM.

Re: Groundwater contamination on your property from the former Neillsville 76 Site, 110 E. Division Street, Neillsville, Clark County, Wisconsin.
WDNR BRRTS #03-49-000949. WDCOM #54456-2149-10.
Tetra Tech Project #114-331049.

Tetra Tech has completed groundwater monitoring at the former Neillsville 76 site. We are required to notify off site property owners that groundwater contamination is present on your property at 111 E. Division Street in Neillsville, Wisconsin. Petroleum contaminated groundwater is present in the area north and west of the former Neillsville 76 property. Groundwater contamination on your property is part of plume that extents for approximately 550 feet in a southeast to northwest direction. Groundwater contamination originating from the former Neillsville 76 property has comingled with groundwater contamination from the Auto Stop site (WDNR BRRTS #03-49-109421). Petroleum contaminated groundwater is present in the area of monitoring wells ORMW-1PP, ORMW-2, and ORMW-2P. See enclosed figures and tables.

Groundwater contamination has originated from the properties located at 1 Hewett and 110 E. Division Streets. The levels of petroleum contamination in the groundwater on your property are above the state groundwater enforcement standards found in chapter NR 140, Wisconsin Administrative Code. However, this groundwater contaminant plume is decreasing and will naturally degrade over time. We believe that allowing natural attenuation to complete the cleanup at this site will meet the requirements for case closure that are found in chapter NR 72 and chapter Comm 46, Wisconsin Administrative Code, and we are requesting that the Wisconsin Department of Commerce (WDCOM) accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the WDCOM will not be requiring any further investigation or cleanup action to be taken, other than the reliance on natural attenuation.

Since the source of the soil and groundwater contamination is not on your property, neither you nor any subsequent owner of your property will be held responsible for investigation or cleanup of this contamination, as long as you and any subsequent owners comply with the requirements of section 292.13, Wisconsin Statutes, including allowing access to your property for environmental investigation or cleanup if access is required. To obtain a copy of the WDNRs' publication #RR–589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off–Site Contamination, you may visit http://www.dnr.state.wi.us/org/aw/rr/archives/pubs/RR589.pdf or call 608–267–3859.

The WDCOM will not review our closure request for at least 30 days after the date of this letter. As an affected property owner, you have a right to contact the WDCOM to provide any technical information that you may have that indicates that closure should not be granted for this site. If you would like to submit any information to the WDCOM that is relevant to this closure request, you should mail that information to: Brian F. Taylor, WDCOM, P.O. Re: Soil and groundwater contamination at the Auto Stop Site,
1 Hewett Street, Neillsville, Clark County, Wisconsin.
WDNR BRRTS #03-49-109421. WDCOM #54456-2162-01.
Tetra Tech Project #114-331050.

Tetra Tech has completed groundwater monitoring at the Auto Stop site. We are required to notify the property owner that groundwater contamination is present on-site. Petroleum contaminated groundwater is present on your property in the area of the underground storage tank basin and pump islands. Groundwater contamination on your property is part of plume that extents for approximately 550 feet in a southeast to northwest direction. Groundwater contamination originating from your property has comingled with groundwater contamination from the former Neillsville 76 site (WDNR BRRTS #03-49-000949). Petroleum contaminated groundwater is present in the area of monitoring well MW-1. See enclosed figures and tables.

Groundwater contamination has originated from the properties located at 1 Hewett and 110 E. Division Streets. The levels of petroleum contamination in the groundwater on your property are above the state groundwater enforcement standards found in chapter NR 140, Wisconsin Administrative Code. However, this groundwater contaminant plume is decreasing and will naturally degrade over time. Likewise it is also concluded that the area of residual soil above the generic residual contaminant levels (RCLs) is not a threat to human health due to its depth greater than four feet below grade. We believe that allowing natural attenuation to complete the cleanup at this site will meet the requirements for case closure that are found in chapter NR 72 and chapter Comm 46, Wisconsin Administrative Code, and we are requesting that the Wisconsin Department of Commerce (WDCOM) accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the WDCOM will not be requiring any further investigation or cleanup action to be taken, other than the reliance on natural attenuation.

The final closure letter, any required maintenance plan and a map of the properties affected will be included in the file attached to the site on the internet accessible Wisconsin Department of Natural Resource's (WDNRs) geographic information system (GIS) Registry of Closed Remediation Sites, at http://maps.dnr.state.wi.us/brrts.

The WDCOM will not review our closure request for at least 30 days after the date of this letter. As an affected property owner, you have a right to contact the WDCOM to provide any technical information that you may have that indicates that closure should not be granted for this site. If you would like to submit any information to the WDCOM that is relevant to this closure request, you should mail that information to: Brian F. Taylor, WDCOM, P.O. Box 8044, Madison, WI 53708-8044, 608-266-0593.

Re: Soil and groundwater contamination at the former Neillsville 76 Site,
110 E. Division Street, Neillsville, Clark County, Wisconsin.
WDNR BRRTS #03-49-000949. WDCOM #54456-2149-10.
Tetra Tech Project #114-331049.

Tetra Tech has completed groundwater monitoring at the former Neillsville 76 site. We are required to notify the property owner that residual soil and groundwater contamination is present on-site. Petroleum contaminated groundwater is present on your property in the area of the underground storage tank basin and pump islands. Groundwater contamination on your property is part of plume that extents for approximately 550 feet in a southeast to northwest direction. Groundwater contamination originating from your property has comingled with groundwater contamination from the Auto Stop site (WDNR BRRTS #03-49-109421). Petroleum contaminated groundwater is present in the area of monitoring wells BMW-1, BMW-1PP, BMW-4, BMW-4P, BMW-4PP, and BMW-5P. See enclosed figures and tables.

Groundwater contamination has originated from the properties located at 1 Hewett and 110 E. Division Streets. The levels of petroleum contamination in the groundwater on your property are above the state groundwater enforcement standards found in chapter NR 140, Wisconsin Administrative Code. However, this groundwater contaminant plume is decreasing and will naturally degrade over time. Likewise it is also concluded that the area of residual soil above the generic residual contaminant levels (RCLs) is not a threat to human health due to its depth greater than four feet below grade. We believe that allowing natural attenuation to complete the cleanup at this site will meet the requirements for case closure that are found in chapter NR 72 and chapter Comm 46, Wisconsin Administrative Code, and we are requesting that the Wisconsin Department of Commerce (WDCOM) accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the WDCOM will not be requiring any further investigation or cleanup action to be taken, other than the reliance on natural attenuation.

The final closure letter, any required maintenance plan and a map of the properties affected will be included in the file attached to the site on the internet accessible Wisconsin Department of Natural Resource's (WDNRs) geographic information system (GIS) Registry of Closed Remediation Sites, at http://maps.dnr.state.wi.us/brrts.

The WDCOM will not review our closure request for at least 30 days after the date of this letter. As an affected property owner, you have a right to contact the WDCOM to provide any technical information that you may have that indicates that closure should not be granted for this site. If you would like to submit any information to the WDCOM that is relevant to this closure request, you should mail that information to: Brian F. Taylor, WDCOM, P.O. Box 8044, Madison, WI 53708-8044, 608-266-0593.

OFF-SOURCE
H
PROPERTY

TETRA TECH

If this case is closed, all properties within the site boundaries where groundwater contamination exceeds chapter NR 140 groundwater enforcement standards will be listed on the WDNRs' GIS Registry of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where groundwater contamination above chapter NR 140 enforcement standards was found at the time that the case was closed. This GIS Registry will be available to the general public on the WDNRs' internet web site. Should you or any subsequent property owner wish to construct or reconstruct a potable well on this property, you must get WDNR approval.

Once the Department makes a decision on the closure request, it will be documented in a letter. If the WDCOM grants closure, you may obtain a copy of this letter by requesting a copy from me, by writing to the agency address given above or by accessing the WDNR GIS Registry of Closed Remediation Sites on the internet at http://www.dnr.wi.gov/org/aw/rr/gis/index.htmhttp://www.dnr.state.wi.us/org/water/dwg/3300254.pdf. A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

I have enclosed figures illustrating the approximate location of the contaminated groundwater and tables presenting the groundwater samples analytical results so you have an idea of the contaminant concentrations below your property.

If you need more information, you may contact me at 715-832-0282 or you may contact Brian Taylor with WDCOM.

Respectfully,

Michael K. Neal, Professional Hydrologist
Geomorphologist

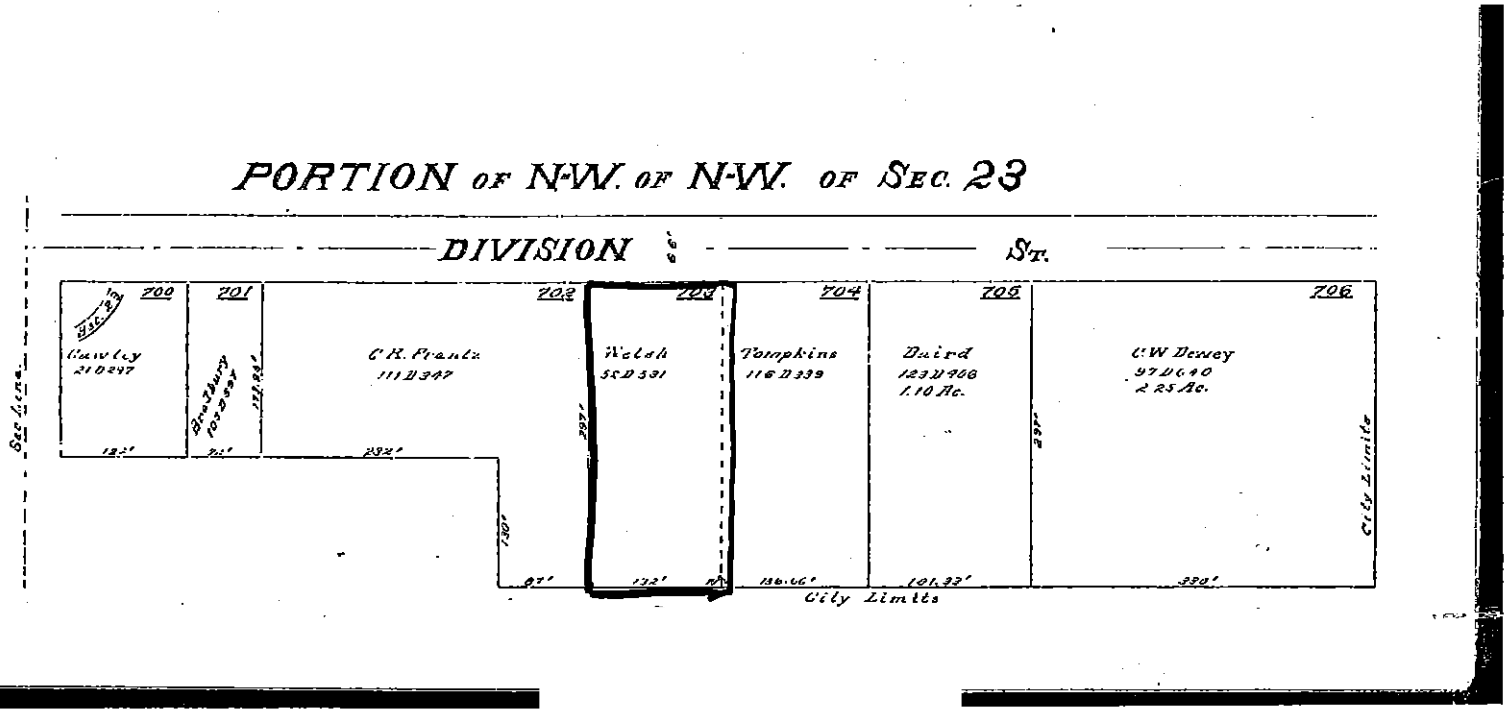
PORTION OF N-W. OF N-W. OF SEC. 23



RIGHT-OF-WAY

November 7, 2005

Mr. Rex R. Roehl
City of Neillsville
118 W. Fifth Street,
Neillsville, WI 54456

RE: Notification of Existing Contamination in the Right-of-Way
Beneath Hewett, and Division Streets,
Neillsville, Clark County, Wisconsin

Dear Mr. Roehl:

Baltus Oil Company has completed an environmental investigation and remediation of petroleum contamination at the former Neillsville 76 at 110 East Division Street (STH 10) in Neillsville, WI. In accordance with the conditions for case closure (Wis. Admin. Code NR726), Baltus Oil is required to notify all property owners of the contamination that has migrated under their property as well as the City where City street right of way may be affected.

Ground water contamination originating from petroleum storage and dispensing facilities in the area has migrated beneath the adjacent properties. The levels of petroleum contamination in the ground water beneath the right-of-way are above the State ground water enforcement standards found in Chapter NR140, Wisconsin Administrative Code. However, the environmental consultants who have investigated this contamination have determined that this ground water contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the clean-up at this site will meet the requirements for case closure that are found in Chapter NR726 and Chapter NR746, Wisconsin Administrative Code, and I will be requesting that the Department of Commerce accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the Department will not be requiring any further investigation or clean-up to be taken, other than the reliance on natural attenuation.

Since the source of ground water contamination is not on your property, neither you nor any subsequent owner of your property will be held responsible for investigation or clean-up of this ground water contamination, as long as you and any subsequent owners comply with the requirements of Section 292.13, Wisconsin Statutes, including allowing access to your property for investigation or clean-up if access is required. For further information on the requirements of Section 292.13, Wisconsin Statutes, you may call 800-367-6076 for calls originating in Wisconsin to obtain a copy of the Department of Natural Resources' publication #RR-589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination, a copy of which is attached.

The Department of Commerce will not review my final closure request for at least 30 days after the date of this letter. As an affected property owner, you have the right to contact the Department to provide any technical information that you may have that indicates that closure

RIGHT-OF-WAY

Department of Natural Resources that is relevant to the closure request, you should mail that information to: Wisconsin Department of Natural Resources, Tom Kendzierski 715-839-1604, PO Box 4001, Eau Claire, WI 54702-4001 Thomas.Kendzierski@dnr.state.wi.us.

If this case is closed, all properties within the site boundaries where ground water contamination exceeds Chapter NR140 ground water enforcement standards will be listed on the Department of Natural Resources' geographic information system (GIS Registry) of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where ground water contamination above Chapter NR140 Enforcement Standards was found at the time that the case was closed. The GIS Registry is available to the general public on the Department of Natural Resources internet web site.

Should you or any subsequent property owner wish to construct or reconstruct a well on your property, special well construction standards may be necessary to protect the well from the residual ground water contamination. Any well driller who proposes to construct the well on your property in the future will first need to call the Digger's Hotline (800-242-8511) if your property is located outside the service area of a municipally owned water system, or contact the Drinking Water program within the designated service area of a municipally owned water system, to determine if there is a need for special well construction standards.

Once the Department makes a decision on my closure request, it will be documented in a letter. If the Department grants closure, you may obtain a copy of this letter by requesting a copy from Baltus Oil Co. by writing to us at the address given below or by accessing the DNR GIS Registry of Closed Remediation Sites on the internet at: www.dnr.state.wi.us/org/at/et/geo/gwur. A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

If you need more information, you may contact me at PO Box1180, Marshfield, WI 54449, 715-384-4187, or my environmental consultant (Scott McCurdy) at Cedar Corporation, 604 Wilson Avenue, Menomonie, WI 54751, 715-235-9081.

Sincerely,

BALTUS OIL COMPANY

John Baltus

RIGHT-OF-WAY

November 7, 2005

Clark County Highway Department
Attn: Mr. Randy Anderson
801 Clay Street
Neillsville, WI 54456

RE: Notification of Existing Contamination in the Right-of-Way
Beneath HWY 10 and HWY 73,
Neillsville, Clark County, Wisconsin

Dear Mr. Anderson:

Baltus Oil Company has completed an environmental investigation and remediation of petroleum contamination at the former Neillsville 76 at 110 East Division Street (STH 10) in Neillsville, WI. In accordance with the conditions for case closure (Wis. Admin. Code NR726), Baltus Oil is required to notify all property owners of the contamination that has migrated under their property as well as the City where City street right of way may be affected.

Ground water contamination originating from petroleum storage and dispensing facilities in the area has migrated beneath the adjacent properties. The levels of petroleum contamination in the ground water beneath the right-of-way are above the State ground water enforcement standards found in Chapter NR140, Wisconsin Administrative Code. However, the environmental consultants who have investigated this contamination have determined that this ground water contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the clean-up at this site will meet the requirements for case closure that are found in Chapter NR726 and Chapter NR746, Wisconsin Administrative Code, and I will be requesting that the Department of Commerce accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the Department will not be requiring any further investigation or clean-up to be taken, other than the reliance on natural attenuation.

Since the source of ground water contamination is not on your property, neither you nor any subsequent owner of your property will be held responsible for investigation or clean-up of this ground water contamination, as long as you and any subsequent owners comply with the requirements of Section 292.13, Wisconsin Statutes, including allowing access to your property for investigation or clean-up if access is required. For further information on the requirements of Section 292.13, Wisconsin Statutes, you may call 800-367-6076 for calls originating in Wisconsin to obtain a copy of the Department of Natural Resources' publication #RR-589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination, a copy of which is attached.

The Department of Commerce will not review my final closure request for at least 30 days after the date of this letter. As an affected property owner, you have the right to contact the Department to provide any technical information that you may have that indicates that closure

RIGHT-OF-WAY

should not be granted at this site. If you would like to submit any information to the Wisconsin Department of Natural Resources that is relevant to the closure request, you should mail that information to: Wisconsin Department of Natural Resources, Tom Kendzierski 715-839-1604, PO Box 4001, Eau Claire, WI 54702-4001 Thomas.Kendzierski@dnr.state.wi.us.

If this case is closed, all properties within the site boundaries where ground water contamination exceeds Chapter NR140 ground water enforcement standards will be listed on the Department of Natural Resources' geographic information system (GIS Registry) of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where ground water contamination above Chapter NR140 Enforcement Standards was found at the time that the case was closed. The GIS Registry is available to the general public on the Department of Natural Resources internet web site.

Should you or any subsequent property owner wish to construct or reconstruct a well on your property, special well construction standards may be necessary to protect the well from the residual ground water contamination. Any well driller who proposes to construct the well on your property in the future will first need to call the Digger's Hotline (800-242-8511) if your property is located outside the service area of a municipally owned water system, or contact the Drinking Water program within the designated service area of a municipally owned water system, to determine if there is a need for special well construction standards.

Once the Department makes a decision on my closure request, it will be documented in a letter. If the Department grants closure, you may obtain a copy of this letter by requesting a copy from Baltus Oil Company by writing to us at the address given below or by accessing the DNR GIS Registry of Closed Remediation Sites on the internet at: www.dnr.state.wi.us/org/at/et/geo/gwur. A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

If you need more information, you may contact me at PO Box 1180, Marshfield, WI 54449, 715-384-3178, or my environmental consultant (Scott McCurdy) at Cedar Corporation, 604 Wilson Avenue, Menomonie, WI 54751, 715-235-9081.
