

GRCRS Package Cover Sheet

Site Name Necedah Airport

Site Address 410 W. Middle St., Necedah, WI 54646

BRRTS # 03-29-001116 Date of Closure Decision 7/12/01

Closure letter(s)

Groundwater Use Restriction/Warranty Deed

Yes  No  Off-site contamination present? (Include related documents)

Yes  No  Right-of-way contamination present? (Include related documents)

General location map

513364 GPS x-coordinate

395558 GPS y-coordinate

Detailed site map(s)

Groundwater flow map(s)

Latest map(s) showing extent or outline of plume

Latest table(s) of analytical results (soil results included only if soil deed restriction is incorporated into groundwater use restriction document)

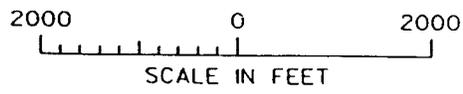

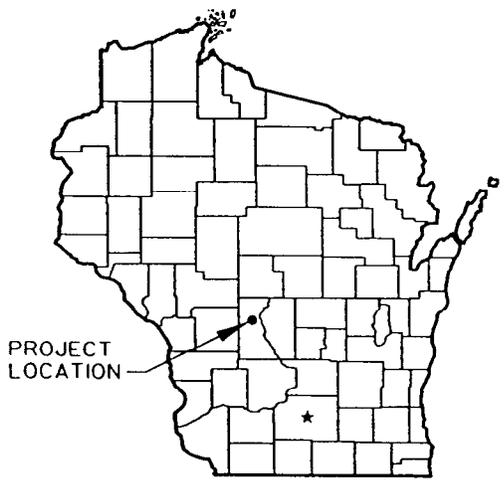

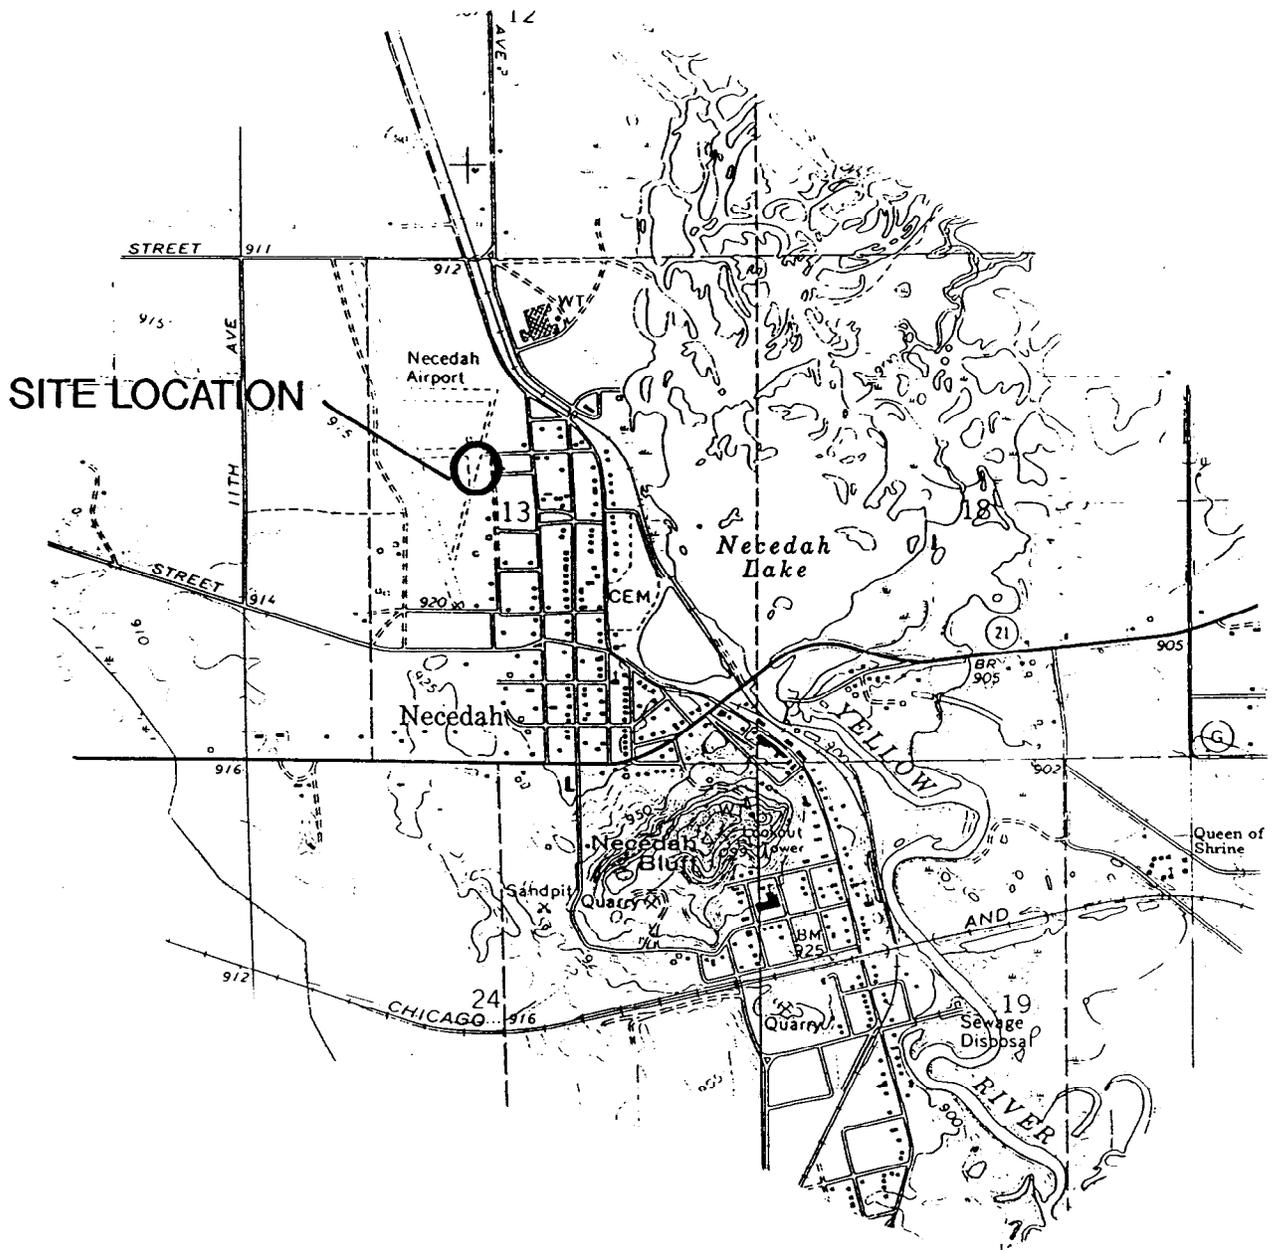

If available:

All concentrations are in ug/L

Only those PAH compounds detected in at least one well in one round are included in the Table.

For a complete list of compounds analyzed, please see the laboratory report.

ES = Wisconsin Administrative Code NR 140 enforcement standard

PAL = Wisconsin Administrative Code NR 140 preventive action limit

Anyone who proposes to construct or reconstruct a well on this property is required to contact the Department of Natural Resources' Bureau of Drinking Water and Groundwater, or its successor agency, to determine what specific requirements are applicable, prior to constructing or reconstructing a well on this property. No well may be constructed on this property unless applicable requirements are met.

If construction is proposed on this property that will require dewatering, or if groundwater is to be otherwise extracted from this property, while this groundwater use restriction is in effect, the groundwater shall be sampled and analyzed for contaminants that were previously detected on the property and any extracted groundwater shall be managed in compliance with applicable statutes and rules.

This restriction is hereby declared to be a covenant running with the land and shall be fully binding upon all persons acquiring the above-described property whether by descent, devise, purchase or otherwise. This restriction benefits and is enforceable by the Wisconsin Department of Natural Resources, its successors or assigns. The Department, its successors or assigns, may initiate proceedings at law or in equity against any person or persons who violate or are proposing to violate this covenant, to prevent the proposed violation or to recover damages for such violation.

Any person who is or becomes owner of the property described above may request that the Wisconsin Department of Natural Resources or its successor issue a determination that one or more of the restrictions set forth in this covenant is no longer required. Upon the receipt of such a request, the Wisconsin Department of Natural Resources shall determine whether or not the restrictions contained herein can be extinguished. If the Department determines that the restrictions can be extinguished, an affidavit, attached to a copy of the Department's written determination, may be recorded to give notice that this deed restriction, or portions of this deed restriction, are no longer binding.

By signing this document, Thomas Hubert asserts that he/she is duly authorized to sign this document on behalf of the Village of Necedah.

IN WITNESS WHEREOF, the owner of the property has executed this Declaration of Restrictions, this 15<sup>th</sup> day of OCTOBER, 2001.

Signature: Thomas G. Hubert  
Printed Name: THOMAS G. HUBERT

Subscribed and sworn to before me  
this 15<sup>th</sup> day of October, 2001.

**FILE COPY**

Subject: Conditional Case Closure with Monitoring Well Abandonment,  
Groundwater Use Restriction, and Site Specific Standards,  
Necedah Airport, 410 West Middle Street, Necedah, Wisconsin

Dear Mr. Saunders:

On July 12, 2001, your request for closure of the case described above was reviewed by the Westcentral Region Closure Committee. This committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of the closure request, the Closure Committee has determined that the petroleum contamination on the site from the underground storage tanks formerly located at the above-described location appears to have been investigated and remediated to the extent practicable under current site conditions. Your case will be closed under s. NR 726.05, Wis. Adm. Code, if the following conditions are satisfied:

**MONITORING WELL ABANDONMENT**

The monitoring wells at the site must be properly abandoned in compliance with ch. NR 141, Wis. Adm. Code, unless long term groundwater monitoring is going to be conducted. If monitoring wells will not be immediately abandoned because you do not file a groundwater use restriction and future groundwater monitoring is planned, you will need to notify me of your monitoring plans in order to qualify for case closure. Documentation of well abandonment must be submitted to me on Form 3300-5B found at [www.dnr.state.wi.us/org/water/dgw/gw/](http://www.dnr.state.wi.us/org/water/dgw/gw/) or provided by the Department of Natural Resources.

**GROUNDWATER USE RESTRICTION**

Section NR 726.05(2)(b), Wis. Adm. Code, provides that if groundwater contamination still exceeds NR 140 enforcement standards when a closure request is submitted, a case may only be closed if a groundwater use restriction is recorded for each property where enforcement standards are exceeded. Therefore, recording the required groundwater use restriction is an option that the Department of Natural Resources can offer to you in order to close this case. If you choose not to accept this option, you may be required to conduct additional groundwater monitoring using existing or additional monitoring wells and may choose to perform additional investigation and cleanup of the remaining contamination in order to qualify for unconditional

July 16, 2001  
Mr. Dwayne Saunders - Village of Necedah  
Page 2

BRRTS #03-29-001116

closure. However, you should note that additional investigation or cleanup work may not be eligible for reimbursement from the Petroleum Environmental Cleanup Fund Award (PECFA) Program. You should contact the Department of Commerce to determine if the additional work will be eligible for reimbursement.

If you choose to pursue closure with a groundwater use restriction, you will need to submit a draft groundwater use restriction to me before the document is signed and recorded. You may find attached a model groundwater use restriction for your use or visit our web site at [www.dnr.state.wi.us/org/tr](http://www.dnr.state.wi.us/org/tr) for a copy of the model format and language. To assist us in the review of your draft groundwater use restriction document, you should submit a copy of the property deed or deeds to me along with the draft document. Once Department of Natural Resources has checked your draft document for completeness, you should sign it if you own the property, or have the appropriate property owner sign it, and have it recorded at the Juneau County Register of Deeds Office, and then submit a copy of the recorded document, with the recording information stamped on it, to me. Please be aware that if a groundwater use restriction is recorded for the wrong property because of an inaccurate legal description that you have provided, you will be responsible for recording corrected documents at the Register of Deeds Office to correct the problem.

When the above conditions have been satisfied, please submit a letter to let me know that applicable conditions have been met, and your case will be closed.

In addition, please note that the contaminated material may remain at the watertable, as indicated in the information submitted to the Department of Natural Resources. This material may represent solid waste should it be excavated in the future, the material may represent a direct contact hazard to workers should they be exposed to the material, and if future excavation exposes impacted material, proper steps should be taken to address the potential risks to workers and make sure the material is properly disposed of as solid waste.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at 715/421-7850.

Sincerely,

Tom Hvizdak

**SUBJECT: Final Case Closure By Closure Committee With Conditions Met,  
Necedah Airport Site, 410 West Street, Necedah, WI**

Dear Saunders:

On July 12, 2001, your site as described above was reviewed for closure by the Wisconsin Department of Natural Resources Westcentral Region Closure Committee. This committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On July 16, 2001, you were notified that the Closure Committee had granted conditional closure to this case.

On August 14 and October 22, 2001, the Department received correspondence indicating that you have complied with the conditions of closure, which included abandonment of the monitoring wells and that a groundwater use restriction be recorded with Juneau County Register of Deeds. Based on the correspondence and data provided, it appears that your site has been remediated to Department standards in accordance with s. NR726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation, remediation or other action is required at this time.

State Statute 101.143 requires that owners seeking reimbursement of interest costs from the PECFA Program submit a final reimbursement claim within 120 days after they receive a closure letter on their site. If you are eligible for the PECFA Program, and anticipate filing a PECFA reimbursement claim that includes interest costs, you must file a final reimbursement claim to the Department of Commerce within 120 days from receipt of this letter. If you fail to file a claim within that 120-day period, subsequent interest costs will not be eligible for reimbursement by PECFA.

Please be aware that this case may be reopened pursuant to s. NR726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.
