**Locational COORDINATES (meters in WTM91 projection):** X= \_\_\_\_\_ Y= \_\_\_\_\_

**CONTAMINATION IN RIGHT OF WAY:**  Yes  No

**DOCUMENTS NEEDED:**

- Closure Letter, and any conditional closure letter or denial letter issued X
- Copy of most recent deed, including legal description, for all affected properties X
- Certified survey map or relevant portion of the recorded plat map (if referenced in the legal description) for all affected properties X
- County Parcel ID number, if used for county, for all affected properties X
- Location Map which outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy). If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site. X
- Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy) This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs. X
- Tables of Latest Groundwater Analytical Results (no shading or cross-hatching) X
- Tables of Latest Soil Analytical Results (no shading or cross-hatching) X
- Isoconcentration map(s), if required for site investigation (SI) (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of groundwater contamination defined. If not available, include the latest extent of contaminant plume map. X
- GW: Table of water level elevations, with sampling dates, and free product noted if present X
- GW: Latest groundwater flow direction/monitoring well location map (should be 2 maps if maximum variation in flow direction is greater than 20 degrees) X
- SOIL: Latest horizontal extent of contamination exceeding generic or SSRCLs, with one contour NA
- Geologic cross-sections, if required for SI. (8.5x14' if paper copy) NA
- RP certified statement that legal descriptions are complete and accurate X
- Copies of off-source notification letters (if applicable) NA
- Letter informing ROW owner of residual contamination (if applicable)(public, highway or railroad ROW) NA
- Copy of (soil or land use) deed restriction(s) or deed notice if any required as a condition of closure NA
- Copy of any maintenance plan referenced in the deed restriction. NA

Sparta, WI 54656

Subject: Final Closure  
Aschwander Residence Site, 14841 Gentry Road, Sparta, Wisconsin  
WDNR BRRTS Activity # 03-42-000460

Dear Ms. Aschwander:

On November 10, 2005, the WDNR West Central Region Closure Committee reviewed the above referenced case for closure. This committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On November 11, 2005, you were notified that the Closure Committee had granted conditional closure to this case.

The Department has since received correspondence indicating that you have complied with the requirements of closure. METCO provided documentation that the monitoring wells were abandoned and there was not remaining investigative waste. Based on the correspondence and data provided, it appears that your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation, remediation or other action is required at this time.

Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the GIS Registry. To review the sites on the GIS Registry web page, visit <http://dnr.wi.gov/org/aw/tr/gis/index.htm>. If your property is listed on the GIS Registry and you intend to construct or reconstruct a well, you will need Department approval. Department approval is required before construction or reconstruction of a well on a property listed on the GIS Registry, in accordance with s. NR 812.09(4)(w). To obtain approval, Form 3300-254 needs to be completed and submitted to the DNR Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line <http://www.dnr.state.wi.us/org/water/dwg/3300254.pdf> or at the web address listed above for the GIS Registry.

Please be aware that this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at 715 839 1604.

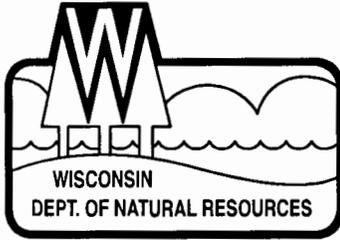

Sincerely,

Tom Kendzierski  
Hydrogeologist  
Bureau for Remediation & Redevelopment.

Subject: Conditional Closure Decision with Requirements to Achieve Final Closure  
Aschwander Residence Site, 14841 Gentry Road, Sparta, Wisconsin  
WDNR BRRTS Activity # 03-42-000460

Dear Ms. Aschwander:

On November 10, 2005, the Department of Natural Resources' West Central Region Closure Committee reviewed your request for closure of the case described above. The Department of Natural Resources' West Central Region Closure Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of the closure request, the Closure Committee has determined that the petroleum contamination on the site from the Fuel Oil Tank appears to have been investigated and remediated to the extent practicable under site conditions. Your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code and will be closed if the following conditions are satisfied:

**MONITORING WELL ABANDONMENT**

The monitoring wells at the site must be properly abandoned in compliance with ch. NR 141, Wis. Adm. Code. Documentation of well abandonment must be submitted to Tom Kendzierski in Eau Claire on Form 3300-5B found at [www.dnr.state.wi.us/org/water/dwg/gw/](http://www.dnr.state.wi.us/org/water/dwg/gw/) or provided by the Department of Natural Resources.

**PURGE WATER, WASTE AND SOIL PILE REMOVAL**

Any remaining purge water, waste absorbent socks, recovered oil and/or soil piles generated as part of site investigation or remediation activities must be removed from the site and disposed of or treated in accordance with Department of Natural Resources' rules. Please send a letter advising me that any remaining purge water, waste and/or soil piles have been removed and properly disposed of once that work is completed.

When the above conditions have been satisfied, please submit a letter to let me know that applicable conditions have been met, and your case will be closed. Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the GIS Registry. To review the site on the GIS Registry web page, visit <http://maps.dnr.state.wi.us/brrts>.

If this is a PECFA site, section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at 715 839-1604.

Sincerely,

Tom Kendzierski

FROM CWE SITE ASSESSMENT REPORT  
12/13/1989  
ASCHWANDER RESIDENCE

Approximately 69 cubic yards of soil were removed from the excavation. Approximately three quarters of this quantity was determined to be sufficiently contaminated to require disposal at a licensed landfill. The material was disposed of at the Jackson County Landfill south of Black River Falls, WI.

When the backhoe had dug to its deepest capacity, a sample was collected approximately a foot below this depth. This soil sample was taken to Enviroscan Environmental and Analytical Services for analysis. Soil samples were also taken of the walls of the excavation.

The results of the sample from the bottom of the excavation confirm the preliminary field data gathered by Mr. Chip Krohn of the La Crosse office of the Wisconsin Department of Natural Resources. Mr. Krohn was on site at the time the tank was removed. Auger borings at that time indicated that soils in the vicinity of the leak were contaminated to a depth of approximately 14 feet.

A diesel analysis of the soil sample conducted by the Enviroscan Environmental & Analytical Services Laboratory indicated that the soils at the 15 foot depth were still contaminated. The concentration expressed in parts per million (ppm) on a dry weight basis was 16,300 ppm. The samples from the excavation walls were free of contaminant (see Appendix A).
