This Adobe Fillable form is intended to provide a list of information that is required for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request. The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

CLOSURE DOCUMENTS (the Department adds these items to the final GIS packet for posting on the Registry)

- Closure Letter
- Maintenance Plan (if activity is closed with a land use limitation or condition (land use control) under s. 292.12, Wis. Stats.)
- Continuing Obligation Cover Letter (for property owners affected by residual contamination and/or continuing obligations)
- Conditional Closure Letter
- Certificate of Completion (COC) (for VPLE sites)

SOURCE LEGAL DOCUMENTS

- Deed:** The most recent deed as well as legal descriptions, for the **Source Property** (where the contamination originated). Deeds for other, off-source (off-site) properties are located in the **Notification** section.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Certified Survey Map:** A copy of the certified survey map or the relevant section of the recorded plat map for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map. (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).
Figure #: **Title:**
- Signed Statement:** A statement signed by the Responsible Party (RP), which states that he or she believes that the attached legal description accurately describes the correct contaminated property.

MAPS (meeting the visual aid requirements of s. NR 716.15(2)(h))

Maps must be no larger than 11 x 17 inches unless the map is submitted electronically.

- Location Map:** A map outlining all properties within the contaminated site boundaries on a U.S.G.S. topographic map or plat map in sufficient detail to permit easy location of all parcels. If groundwater standards are exceeded, include the location of all potable wells within 1200 feet of the site.
Note: Due to security reasons municipal wells are not identified on GIS Packet maps. However, the locations of these municipal wells must be identified on Case Closure Request maps.
Figure #: 1 **Title: Site Location Map**
- Detailed Site Map:** A map that shows all relevant features (buildings, roads, individual property boundaries, contaminant sources, utility lines, monitoring wells and potable wells) within the contaminated area. This map is to show the location of all contaminated public streets, and highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding a ch. NR 140 Enforcement Standard (ES), and/or in relation to the boundaries of soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Levels (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: 2 **Title: Sample Location Map**
- Soil Contamination Contour Map:** For sites closing with residual soil contamination, this map is to show the location of all contaminated soil and a single contour showing the horizontal extent of each area of contiguous residual soil contamination that exceeds a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.

MAPS (continued)

- Geologic Cross-Section Map:** A map showing the source location and vertical extent of residual soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL). If groundwater contamination exceeds a ch. NR 140 Enforcement Standard (ES) when closure is requested, show the source location and vertical extent, water table and piezometric elevations, and locations and elevations of geologic units, bedrock and confining units, if any.

Figure #: 3 Title: Site Map with Cross-Sections and Soil Boring Locations

Figure #: 4 / 5 Title: Geologic Cross-Section A - A' / Geologic Cross-Section B - B'

- Groundwater Isoconcentration Map:** For sites closing with residual groundwater contamination, this map shows the horizontal extent of all groundwater contamination exceeding a ch. NR140 Preventive Action Limit (PAL) and an Enforcement Standard (ES). Indicate the direction and date of groundwater flow, based on the most recent sampling data.

Note: This is intended to show the total area of contaminated groundwater.

Figure #: Title:

- Groundwater Flow Direction Map:** A map that represents groundwater movement at the site. If the flow direction varies by more than 20° over the history of the site, submit 2 groundwater flow maps showing the maximum variation in flow direction.

Figure #: 6 Title: Groundwater Contour Map

TABLES (meeting the requirements of s. NR 716.15(2)(h)(3))

Tables must be no larger than 11 x 17 inches unless the table is submitted electronically. Tables must not contain shading and/or cross-hatching. The use of **BOLD** or *ITALICS* is acceptable.

- Soil Analytical Table:** A table showing remaining soil contamination with analytical results and collection dates.
Note: This is one table of results for the contaminants of concern. Contaminants of concern are those that were found during the site investigation, that remain after remediation. It may be necessary to create a new table to meet this requirement.

Table #: Title: multiple soil sampling results tables

- Groundwater Analytical Table:** Table(s) that show the most recent analytical results and collection dates, for all monitoring wells and any potable wells for which samples have been collected.

Table #: 2-1 Title: Groundwater Sampling Results Summary - Site Investigation

- Water Level Elevations:** Table(s) that show the previous four (at minimum) water level elevation measurements/dates from all monitoring wells. If present, free product is to be noted on the table.

Table #: Title:

IMPROPERLY ABANDONED MONITORING WELLS

For each monitoring well not properly abandoned according to requirements of s. NR 141.25 include the following documents.

Note: If the site is being listed on the GIS Registry for only an improperly abandoned monitoring well you will only need to submit the documents in this section for the GIS Registry Packet.

- Not Applicable**

- Site Location Map:** A map showing all surveyed monitoring wells with specific identification of the monitoring wells which have not been properly abandoned.

Note: If the applicable monitoring wells are distinctly identified on the Detailed Site Map this Site Location Map is not needed.

Figure #: Title:

- Well Construction Report:** Form 4440-113A for the applicable monitoring wells.

- Deed:** The most recent deed as well as legal descriptions for each property where a monitoring well was not properly abandoned.

- Notification Letter:** Copy of the notification letter to the affected property owner(s).

NOTIFICATIONS

Source Property

Not Applicable

- Letter To Current Source Property Owner:** If the source property is owned by someone other than the person who is applying for case closure, include a copy of the letter notifying the current owner of the source property that case closure has been requested.
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying current source property owner.

Off-Source Property

Group the following information per individual property and label each group according to alphabetic listing on the "Impacted Off-Source Property" attachment.

Not Applicable

- Letter To "Off-Source" Property Owners:** Copies of all letters sent by the Responsible Party (RP) to owners of properties with groundwater exceeding an Enforcement Standard (ES), and to owners of properties that will be affected by a land use control under s. 292.12, Wis. Stats.
Note: Letters sent to off-source properties regarding residual contamination must contain standard provisions in Appendix A of ch. NR 726.
- Number of "Off-Source" Letters:**
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying any off-source property owner.
- Deed of "Off-Source" Property:** The most recent deed(s) as well as legal descriptions, for all affected deeded **off-source property(ies)**. This does not apply to right-of-ways.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.

- Certified Survey Map:** A copy of the certified survey map or the relevant section of the recorded plat map *for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map.* (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).

SUBJECT: Final Case Closure with Continuing Obligations
Former Domtar Port Edwards Mill Production Area
Port Edwards, Wisconsin

Dear Mr. Marcoux:

The Department of Natural Resources (Department) considers the former Domtar Port Edwards Mill Production Area site closed, with continuing obligations. No further investigation or remediation is required related to past releases in this area. However, you and future property owners must comply with the continuing obligations as explained in the conditions of closure in this letter. Please read over this letter closely to ensure that you comply with all conditions and other on-going requirements. Provide this letter and the attached maintenance plan to anyone who purchases this property from Domtar A.W., LLC.

This final closure decision is based on the correspondence and data provided, and is issued under ch. NR 726, Wisconsin Administrative Code. The Wisconsin Department of Natural Resources West Central Region Closure Committee reviewed the request for closure on March 18, 2011. The Closure Committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. A conditional closure letter was issued by the Department on March 24, 2011, and documentation that the conditions in that letter were met was received on December 30, 2011, and approved on January 17, 2012.

The Former Domtar Port Edwards Mill Production Area site includes areas in and around the Main Plant Acid Plant, Chemical Delivery, and paved areas between the Main Plant and the Wisconsin River. The conditions of closure and continuing obligations required are based on the property being used for industrial purposes.

Continuing Obligations

The continuing obligations for this site are summarized below. Further details on actions required are found in the section entitled Closure Conditions.

- Groundwater contamination is present above ch. NR 140, Wis. Adm. Code, enforcement standards.
- Residual soil contamination exists that must be properly managed should it be excavated or removed.
- Pavement, buildings or an engineered cover must be maintained over contaminated soil and the Department must approve any changes to this barrier.
- Before the land use may be changed from industrial to non-industrial, additional environmental work may be required.

GIS Registry

This site will be listed on the Remediation and Redevelopment Program's internet accessible Geographic Information System (GIS) Registry, to provide notice of residual contamination and of any continuing obligations. Department approval prior to well construction or reconstruction is required for all sites shown on the GIS Registry, in accordance with s. NR 812.09(4) (w), Wis. Adm. Code. To obtain approval, complete and submit Form 3300-254 to the Department's Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line at <http://dnr.wi.gov/org/water/dwg/3300254.pdf> or at the web address listed below for the GIS Registry.

All site information is also on file at the Department's Wisconsin Rapids Service Center at 473 West Griffith Avenue, Wisconsin Rapids, Wisconsin. This letter and information that was submitted with your closure request application, including the maintenance plan, will be included on the GIS Registry in a PDF attachment. To review the site on the GIS Registry web page, visit the RR Sites Map page at <http://dnr.wi.gov/org/aw/rr/gis/index.htm>.

Prohibited Activities

Certain activities are prohibited at closed sites because maintenance of a barrier is intended to prevent contact with any remaining contamination. When a barrier is required, the condition of closure requires notification of the Department before making a change, in order to determine if further action is needed to maintain the protectiveness of the remedy employed. The following activities are prohibited on any portion of the property where pavement, a building, an engineered cover or other barrier is required, as shown on the attached map, unless prior written approval has been obtained from the Department:

- removal of the existing barrier;
- replacement with another barrier;
- excavating or grading of the land surface;
- filling on covered or paved areas;
- plowing for agricultural cultivation;
- construction or placement of a building or other structure;
- changing the use or occupancy of the property to a residential exposure setting, which may include certain uses, such as single or multiple family residences, a school, day care, senior center, hospital, or similar residential exposure settings;

Closure Conditions

Compliance with the requirements of this letter is a responsibility to which you and any subsequent property owners must adhere. Department staff will conduct periodic prearranged inspections to ensure that the conditions included in this letter and the attached maintenance plans are met. If these requirements are not followed, the Department may take enforcement action under s. 292.11, Wisconsin Statutes, to ensure compliance with the specified requirements, limitations or other conditions related to the property.

Residual Groundwater Contamination (ch. NR 140, 812, Wis. Adm. Code)

Groundwater contamination greater than enforcement standards is present on this contaminated property. If anyone intends to construct a new well, or reconstruct an existing well, they will need prior Department approval.

Residual Soil Contamination (ch. NR 718, chs. 500 to 536, Wis. Adm. Code, or ch. 289, Wis. Stats.)

Soil contamination remains at this site. If soil is excavated in the future, the property owner at the time of excavation must sample and analyze the excavated soil to determine if contamination remains. If sampling confirms that contamination is present, the property owner at the time of excavation will need to determine whether the material is considered solid or hazardous waste and ensure that any storage, treatment or disposal is in compliance with applicable standards and rules. In addition, all current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard and as a result special precautions may need to be taken to prevent a direct contact health threat to humans.

Cover or Barrier (s. 292.12 (2) (a), Wis. Stats.)

The pavement and buildings that exists in the specific location shown on the attached map shall be maintained in compliance with the attached maintenance plan in order to minimize the infiltration of water and prevent additional groundwater contamination that would violate the groundwater quality standards in ch. NR 140, Wis. Adm. Code, and to prevent direct contact with residual soil contamination that might otherwise pose a threat to human health.

A cover or barrier for industrial land uses, or certain types of commercial land uses may not be protective if use of the property were to change such that a residential exposure would apply. This may include, but is not limited to single or multiple family residences, a school, day care, senior center, hospital or similar settings. Before using the property for such purposes, you must notify the Department to determine if additional response actions are warranted.

A request may be made to modify or replace a cover or barrier. The replacement or modified cover or barrier must be protective of the revised use of the property, and must be approved in writing by the Department prior to implementation.

The attached maintenance plan and inspection log are to be kept up-to-date and on-site. Submit the inspection log to the Department only upon request.

Industrial Soil Standards (s. NR 726.05 (8) (b) 1., Wis. Adm. Code)

Soil contamination remains at this site. Samples contained arsenic and chromium in concentrations which exceeded non-industrial (residential) soil standards.

This property may not be used or developed for a residential, commercial, agricultural or other non-industrial use, unless prior written approval has been obtained from the Department. An investigation and remedial action to meet applicable soil cleanup standards may be required at that time.

Dewatering Permits

The Department's Watershed Management Program regulates point source discharges of contaminated water, including discharges to surface waters, storm sewers, pits or to the ground surface. This includes discharges from construction related dewatering activities, including utility and building construction.

BRRTS #02-72-554728
BRRTS#:06-72-553631

Based on the concentrations of contaminants remaining in groundwater at this location, it appears likely that dewatering activities would require a permit from the Department's Watershed Management Program. If you or any other person plan to conduct such activities, you or that person must contact that program, and if necessary, apply for the necessary discharge permit. Additional information regarding discharge permits is available at <http://www.dnr.state.wi.us/org/water/wm/www/>.

The following Department fact sheet, "Continuing Obligations for Environmental Protection", RR-819, was included with this letter, to help explain a property owner's responsibility for continuing obligations on their property. If the fact sheet is lost, you may obtain a copy at <http://dnr.wi.gov/org/aw/rr/archives/pubs/RR819.pdf>.

Please send written notifications in accordance with the above requirements to the Wisconsin Department of Natural Resources West Central Region office, to the attention of the Remediation and Redevelopment Program Assistant.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

Upon issuance of a Certificate of Completion (COC) under the Voluntary Party Liability Exemption (VPLE) Program, the voluntary party and any "successors or assigns" are exempt from provisions of the Hazardous Substance Spills Law (s. 292.11, Wis. Stats.), as this law relates to past releases of hazardous substances, and cannot be held responsible for further environmental investigation and cleanup of these past releases contingent upon compliance with the conditions of case closure and the exemption.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this closure decision or anything outlined in this letter, please contact Tom Hvizdak at (715) 421-7850.

Sincerely,

William Evans, Team Supervisor
West Central Region Remediation & Redevelopment Program

**ENGINEERING CONTROL MAINTENANCE PLAN
SITE PAVING
BRRTS #02-72-#554728
January 2012**

1.0 Introduction

The property is located in Wood County, Wisconsin. The street address of the site is 100 Wisconsin River Drive in Port Edwards, Wisconsin. The site is bordered to the south and east by the Wisconsin River in Port Edwards, about 0.25 miles south of Highways 54 and 73.

This document is the Maintenance Plan for an impervious cover over the process area located along the Wisconsin River at the property described above in accordance with the requirements of s. NR 724.13(2), Wisconsin Administrative Code. The maintenance activities relating to the existing buildings and concrete and asphalt pavement areas occupying the process area are shown on Figure 1.

Soils in the area consist of sand with gravel and fill material over fine to coarse sand. The sample with the elevated PID reading (L1-012) was at a depth of 12 to 14 feet and was stained with a petroleum type odor with glass and other debris. The soils above this sample did not exhibit any odors or discoloration. Depth-to-water ranged from 8 to 14 feet. Analytical results of the soil and groundwater samples are summarized below.

- All process area samples detected arsenic concentrations. However, all samples with the exception of L1-001 were within the typical background concentrations observed in Wisconsin (5 to 10 mg/kg). L1-001 had a concentration of 41.2 ppm along with elevated levels of chromium and lead (217 ppm and 113 ppm, respectively). This boring was advanced southeast of the maintenance shop and may indicate fill material used in that area as the source of the contamination. Elevated chromium levels were also identified in L1-002 (71.8 ppm), L1-003 (35.3 ppm), and L5-001 (14.1 ppm). These elevated chromium levels could be the result of fill materials in these locations as well. The only other soil detections above standards were for benzo(a)pyrene in L1-004 (0.457 ppm), L1-005 (0.486 ppm), L1-010 (0.817 ppm), and L1-014 (0.508 ppm). No other metals, VOCs, or PAHs were detected above soil standards in the process area borings.
- Concentrations above NR 140 groundwater enforcement standard (ES) or preventive action limit (PAL) included the following: L5-001 had a detection of chrysene at 0.27 ppb, which is marginally above the ES of 0.2 ppb. L1-009, located near the acid plant, had a detection of methylene chloride (a common laboratory contaminant) at 0.94 ppb, which is below the NR 140 ES of 5 ppb. The sulfate level in L1-013 (672 ppm) was above the NR 140 ES (250 ppm) for public welfare.
- No soil or groundwater samples were collected beneath any of the buildings in the process area.

More site-specific information about this property may be found in:

- the case file in the WDNR West Central regional office;
- BRRTS on the Web (WDNR's internet based data base of contaminated sites): <http://dnr.wi.gov/botw/SetUpBasicSearchForm.do>;
- GIS Registry PDF file for further information on the nature and extent of contamination: <http://dnrmaps.wisconsin.gov/imf/imf.jsp?site=brrts2>; and
- the WDNR Remediation & Redevelopment Program Project Manager for Wood County.

The entire area is covered with concrete and asphalt paving, or the existing mill building. This Engineering Control Maintenance Plan identifies pavement maintenance activities and the associated schedule to ensure that the pavement remains intact to limit volatilization of organics and direct contact and thus protect the potential receptor populations. Section 2 identifies the activities and schedule requirements of this maintenance plan. A figure depicting the extent of impact relative to other site features is contained as Figure 1.

2.0 Maintenance Requirements

This Engineering Control Maintenance Plan has been developed to ensure that the barrier to the underlying soil by the presence of the buildings and the concrete/asphalt paving in the process area will be properly maintained. Requirements will be met by both current and future property owners. The following procedures will be followed to ensure that the potential for exposure to residual contamination is minimized.

Inspections

The floors on the lowest level of the buildings and the concrete/asphalt exterior areas of the process area as shown in Figure 1 will be inspected on an annual basis. The inspection will include evaluating the surface for cracks or deterioration that can cause additional infiltration into/or exposure to underlying soils. The inspections will be performed by the property owner or their designated representative. The inspections will be performed to evaluate damage due to settling, exposure to the weather, wear from traffic, increasing age, and other factors. Any area where soils have become or are likely to become exposed (and where infiltration from the surface will not be effectively minimized) will be documented. A log of the inspections and any repairs will be maintained by the property owner. The log will include recommendations for necessary repair of any areas where underlying soils are exposed and where infiltration from the surface will not be effectively minimized. Once repairs are completed, they will be documented in the inspection log. A copy of the inspection log will be kept at the address of the property owner and available for submittal or inspection by the Wisconsin Department of Natural Resources (WDNR).

Maintenance Activities

If problems are noted during the annual inspections or at any other time during the year, repairs will be scheduled as soon as practical. Repairs can include patching and filling or larger resurfacing or construction operations. In the event that necessary maintenance activities expose the underlying soil, the owner must inform maintenance workers of the direct contact exposure hazard and provide them with appropriate personal protection equipment (PPE).

The owner must also sample any soil that is excavated from the site prior to disposal to ascertain if contamination remains. The soil must be treated, stored, and disposed of by the owner in accordance with applicable local, state, and federal laws. In the event the concrete/asphalt pavement or building structure in the process area are removed or replaced, the replacement barrier must be equally impervious. Any replacement barrier will be subject to the same maintenance and inspection guidelines as outlined in this Maintenance Plan unless indicated otherwise by the WDNR or its successor.

The property owner, in order to maintain the integrity of the concrete and building structure, will maintain a copy of this Maintenance Plan on-site and make it available to all interested parties for viewing.

Prohibition of Activities and Notification of WDNR Prior to Actions Affecting the Cover

The following activities require WDNR approval prior to commencement.

1. removal or replacement of the existing barrier;
2. excavating or grading of the land surface;
3. filling on capped or paved areas; and
4. construction or placement of a building or other structure.

Amendment or Withdrawal of Maintenance Plan

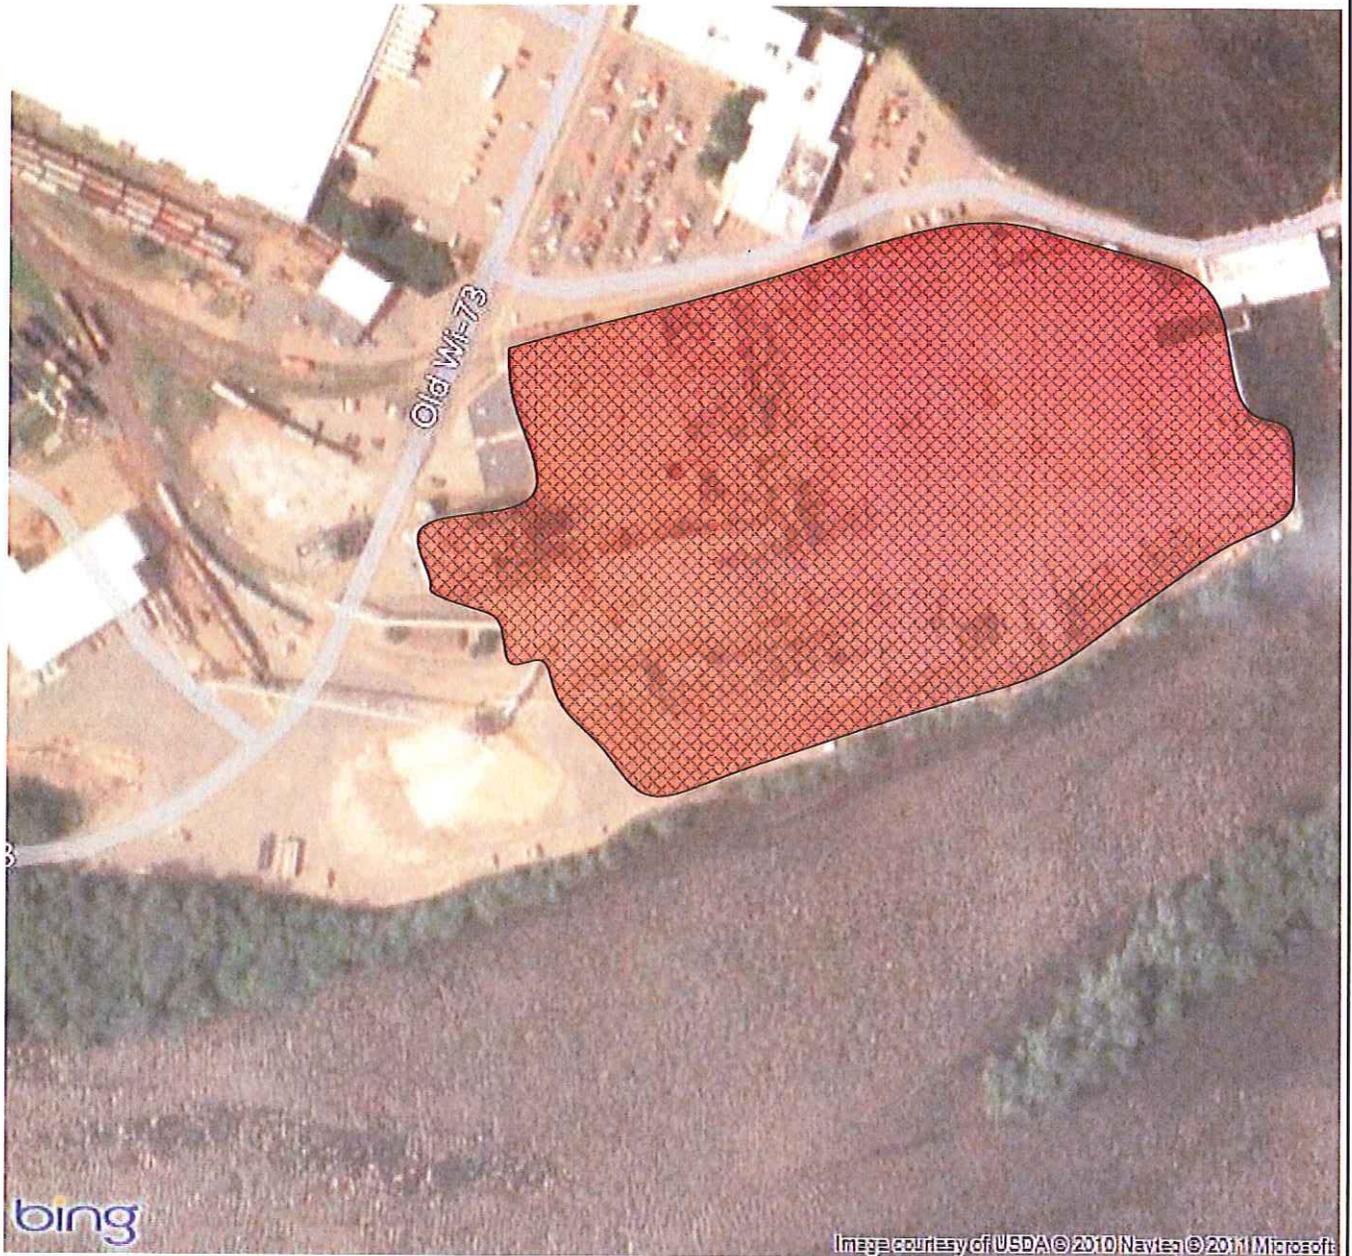

This Maintenance Plan can be amended or withdrawn by the property owner and its successors with the written approval of the WDNR.

Subject: Conditional Closure Decision with Requirements to Achieve Final Closure,
Former Domtar Port Edwards Production Mill Area,
Port Edwards, Wisconsin

Dear Mr. Marcoux:

On March 18, 2011, the Wisconsin Department of Natural Resources (DNR) Westcentral Region Closure Committee reviewed your request for closure of the case described above. The Westcentral Region Closure Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of the closure request, the Westcentral Region Closure Committee has determined that the contamination from various spills and releases that have historically occurred throughout the Domtar Port Edwards Production Mill area appears to have been investigated and remediated to the extent practicable under current site conditions. Your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code and will be closed if the following conditions are satisfied:

- Any remaining purge water, waste and/or soil piles generated as part of site investigation or remediation activities must be removed from the site and disposed of or treated in accordance with Department of Natural Resources' rules. Once that work is completed, please send appropriate documentation regarding the treatment or disposal of the remaining purge water, waste and/or soil piles.
- Submittal of a soil and groundwater GIS packet for this site. Instructions and forms regarding GIS packets are found at: <http://dnr.wi.gov/org/aw/rr/archives/pubs/4400-245.pdf>.
- The main production area buildings (excluding the Chip Plant), the paved areas between these buildings, and the paved area between these buildings and the Wisconsin River must be maintained as a cap/barrier to prevent infiltration and direct contact of the underlying soil. As part of this requirement you must conduct a certified survey of the cap area and submit a draft maintenance plan for the cap area for review and approval by DNR prior to final closure of the site. Instructions and forms regarding cap maintenance plans are found at: <http://dnr.wi.gov/org/aw/rr/archives/pubs/RR606.pdf>.

When the above conditions have been satisfied, please submit the appropriate documentation (for example, disposal receipts, copies of correspondence, etc.) to verify that applicable conditions have been met, and your case will be closed. Your site will be listed on the DNR's Remediation and Redevelopment GIS Registry. Information that was submitted with your GIS packet will be included

Also, as part of the approval of the closure of this case, you will be responsible for maintaining industrial zoning and maintenance of the impervious cap as continuing obligations of the property. In the final closure approval, you will also be required to conduct annual inspections. Documentation of the annual inspections will be required to be kept on site.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at (715) 421-7850.

Subject: A Certificate of Completion under the Voluntary Party Liability Exemption Program for the Environmental Investigation and Cleanup of the Domtar – Port Edwards Mill (I) Site, 100 Wisconsin River Drive, Village of Port Edwards, Wood County, Wisconsin

Dear Mr. Marcoux:

The Wisconsin Department of Natural Resources (“the Department”) has reviewed your request for issuance of a *Certificate of Completion* under the Voluntary Party Liability Exemption (“VPLE”) Program for the environmental investigation and cleanup of property owned by Domtar A.W., LLC and known as the Domtar – Port Edwards Mill (I) site located at 100 Wisconsin River Drive, Village of Port Edwards, Wisconsin. You have requested that the Department determine whether Domtar A.W., LLC has met the environmental investigation and remediation requirements under s. 292.15(2), Wis. Stats., for issuance of a *Certificate of Completion*.

The site consists of 28 parcels of real property described on four deeds (Special Warranty Deed Document #883553, Warranty Deed Document #887363, Warranty Deed Document #2004R08090, and Quit Claim Deed Document #2012R04914) located in parts of the Southeast ¼ of Section 35 and Southwest ¼ of Section 36, Township 22 North, Range 05 East, and Northwest ¼ of Section 1, Township 21 North, Range 05 East, Village of Port Edwards, Wood County, Wisconsin, hereinafter referred to as “the Property”. The Property is further described in the aforementioned deeds in Attachment A of the *Certificate of Completion*.

Determination

As you are aware, s. 292.15, Wis. Stats., authorizes the Department to issue a *Certificate of Completion* to a voluntary party that conducts an approved environmental investigation of a property and restores the environment to the extent practicable and minimizes the harmful effects with respect to hazardous substance discharges on or originating from the Property. Based on the information received by the Department, the Department has determined that the investigation and cleanup of the Property is complete and that all conditions in s. 292.15(2), Wis. Stats., have been met. Attached is the *Certificate of Completion* for this Property.

The Property has been entered onto the WDNR's Geographical Information System ("GIS") Registry due to the presence of contaminants in soils that exceeds site-specific and/or generic residual contaminant levels ("RCLs") under ch NR 720, Wis. Adm. Code, and groundwater contamination that exceeds groundwater quality enforcement standards under ch. NR 140, Wis. Adm. Code, and solid waste contained in a licensed, non-approved landfill. The purpose of maintaining this database is to make this information available to the public and to notify future property owners of any requirements, limitations, or conditions imposed by the Department. Continuing obligations and cap maintenance plans imposed by the Department for the Property are described in seven (7) case closure letters, and one (1) closure letter for the licensed landfill, as attachments to the *Certificate of Completion*. Particular attention should be paid to these continuing obligations because failure to maintain and monitor the property as required in case closure letters can result in the loss of your liability protections.

Conclusions

The Department appreciates the work conducted by Domtar A.W., LLC to investigate and restore the environment to the extent practicable at the Property. The exemptions provided by this *Certificate of Completion* apply to any successor or assignee of Domtar A.W., LLC, dependent upon the successor or assignee complying with the conditions of s. 292.15, Wis. Stats. If you have any questions or concerns regarding the *Certificate of Completion* and its exemptions or responsibilities, please call me at 715-839-3770 or Attorney Kristin Hess at 608-266-9454.

**CERTIFICATE OF COMPLETION
OF RESPONSE ACTIONS
UNDER SECTION 292.15(2)(ae), WIS. STATS.**

Whereas, **Domtar A.W., LLC** has applied for an exemption from liability under s. 292.15, Wis. Stats., for property located at 100 Wisconsin River Drive, Village of Port Edwards, Wisconsin, which is commonly referred to as the Domtar - Port Edwards Mill (I) site, further described in the legal description found on Attachment A, and hereinafter referred to as "the Property";

Whereas, an environmental investigation of the Property has been conducted and the Wisconsin Department of Natural Resources ("WDNR") has determined that contamination exists at the Property;

Whereas, **Domtar A.W., LLC** has submitted to the WDNR certain investigation reports and remedial action plans for the Property which comply with the requirements set forth in chs. NR 700-754, Wis. Adm. Code, consisting of documents and reports listed in Attachment B;

Whereas, in accordance with s. 292.15(2)(ae)1., Wis. Stats., the WDNR has determined that an environmental investigation has been conducted which adequately identified and evaluated the nature and extent of the hazardous substance discharges on the Property. The WDNR approved of the environmental investigation on **March 18, 2011**;

Whereas, the Property contains soil contamination that exceeds site-specific and/or generic residual contaminant levels ("RCLs") under ch. NR 720, Wis. Adm. Code; groundwater contamination that exceeds groundwater quality enforcement standards under ch. NR 140, Wis. Adm. Code; and solid waste contained in a licensed, non-approved landfill. Therefore, the Property will be included on the WDNR Geographical Information System database ("the GIS Registry") pursuant to s. 292.12(3), Wis. Stats. **Domtar A.W., LLC** has submitted to the WDNR all the information necessary to be included on the GIS Registry, pursuant to s. NR 726.05(2), Wis. Adm. Code;

Whereas, on June 1, 2012, the WDNR issued a summary case closure letter for the Property (Attachment C). In addition, several other older closure letters are also applicable for this Property. The owner of this Property shall adhere to, abide by, and maintain the continuing obligations and other requirements that are specified in the attached final case closure letter and cap maintenance plans. This site will be listed on the WDNR's GIS Registry of Sites with Residual Contamination and Continuing Obligations. The case closure letters include the following requirements:

- Residual soil contamination exists that must be properly managed should the soil be excavated or removed;
- Before the land use may be changed from industrial to non-industrial, a notification to the WDNR is required, at a minimum, and existing covers would need to be re-evaluated to determine if the covers are protective of human health based on future land uses;
- Pavement, an engineered cover, structures, or soil barriers must be maintained over contaminated soil, and the WDNR must approve any changes to the barriers in accordance with the approved cap maintenance plans and land use;
- Soil barrier or cap must be maintained over the Village of Port Edwards Non-Combustible Landfill (License #1255) in accordance with the approved cap maintenance plan.
- Activities that would alter, remove, or displace the pavement, engineered cover, structures, or soil barrier are prohibited unless prior written approval has been obtained from the WDNR;
- A written exemption issued by the WDNR under the Building on Abandoned Landfills process shall be obtained prior to any construction activities impacting the landfill soil barrier or cap.
- Multiple monitoring wells were not located. These must be properly abandoned, if found.

Whereas, the WDNR determination that the response action is complete and was based on the Property being used as an industrial facility. In the event that the covers or barriers that currently exist are removed, the replacement barrier must be equally protective. Because of the residual contamination and certain continuing obligations for this site, before use of this site can be changed to residential use, or use by certain sensitive populations, such as a day care center, school, a senior center, hospital, or a similar use, notification of the WDNR is required at a minimum. Additional sampling and/or cleanup may be required to ensure that the residual contamination levels, existing remedial action and land use is protective;

Whereas, if the requirements of this Certificate, the closure letter, or the maintenance plans are not followed, or if the land use changes, the WDNR may take actions under ss. 292.11 or 292.12, Wis. Stats., to ensure compliance with the specified requirements, and the person who owns or controls the Property may no longer qualify for the liability protections under s. 292.15, Wis. Stats.;

Whereas, **Domtar A.W., LLC** has paid to the WDNR the appropriate insurance fee and has submitted a complete insurance application form to obtain coverage for the Property under Wisconsin's master insurance contract in accordance with s. 292.15(2)(a)3m., Wis. Stats., and ch. NR 754, Wis. Adm. Code, based on their desire to use natural attenuation to remediate groundwater contamination that exceeds ch. NR 140, Wis. Adm. Code, groundwater quality enforcement standards;

Whereas, on **March 18, 2011**, the WDNR determined that response actions necessary to restore the environment to the extent practicable were completed, except with respect to groundwater contaminated with chrysene above the ch. NR 140, Wis. Adm. Code, groundwater quality enforcement standards. The WDNR has determined that groundwater contamination can be brought into compliance through natural attenuation in accordance with administrative rules promulgated by the WDNR.

Therefore, based upon the information that has been submitted, the WDNR hereby certifies that the response actions set forth in the WDNR-approved remedial action plan for the Property and any other necessary response actions have been completed, except with respect to groundwater contaminated with chrysene above the ch. NR 140, Wis. Adm. Code, groundwater quality enforcement standard. The WDNR has determined that groundwater contamination can be brought into compliance through natural attenuation in accordance with administrative rules promulgated by the WDNR.

Upon issuance of this *Certificate of Completion*, **Domtar A.W., LLC** and persons qualified for protection under s. 292.15(3), Wis. Stats., are exempt from the provisions of ss. 289.05(1), (2), (3) and (4), 289.42(1), 289.67, 291.25(1) to (5), 291.29, 291.37, 292.11(3), (4), and (7)(b) and (c) and 292.31(8), Wis. Stats., with respect to the existence of hazardous substances on or originating from the Property, the release of which occurred prior to the date the WDNR approved the environmental investigation required under s. 292.15(2)(a)1., Wis. Stats.

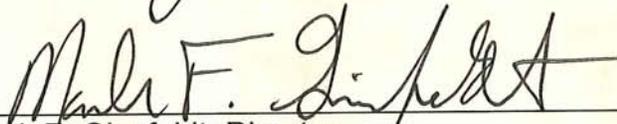

However, the person who owns or controls the Property would no longer qualify for this liability exemption if that person fails to maintain or monitor the Property as required by the conditions in this *Certificate of Completion*, the June 1, 2012, final case closure letter (Attachment C), s. 292.12, Wis. Stats., and administrative rules promulgated by the WDNR. Any releases of a hazardous substance to or from the Property that occur after the date that the environmental investigation was approved will be the responsibility of the current Property owner and any other person who possesses or controls that discharge and any person who caused the discharge.

If natural attenuation of contaminated groundwater fails, the insurance coverage under s. 292.15(2)(ae)3m., Wis. Stats., may be used by the State to cover the costs of complying with s. 292.11(2), Wis. Stats., with respect to groundwater quality.

The protection from liability provided under s. 292.15(2), Wis. Stats., does not apply to any person who has obtained a *Certificate of Completion* by fraud or misrepresentation, or by the knowing failure to disclose material information or under circumstances in which **Domtar A.W., LLC** knew or should have known about more discharges of hazardous substances than was revealed by the investigation approved by the WDNR.

Nothing in this *Certificate of Completion* or in s. 292.15, Wis. Stats., affects the authority of the WDNR to exercise any powers or duties under applicable laws other than ss. 289.05(1), (2), (3) and (4), 289.42(1), 289.67, 291.25(1) to (5), 291.29, 291.37, 292.11(3), (4), and (7)(b) and (c) and 292.31(8), Wis. Stats., with respect to any release or threatened release of contaminants at the Property, or the right of the WDNR to seek relief available against any person who is not entitled to protection from liability under s. 292.15, Wis. Stats., with respect to such release or threatened release.

SIGNED AND CERTIFIED this 7th day of June, 2012.

Bureau for Remediation and Redevelopment

SUBJECT: Revised Summary of Continuing Obligations to maintain Voluntary Party Liability
Exemption (VPLE)
Domtar Port Edwards Mill (I) Site
100 Wisconsin River Drive, Port Edwards, Wisconsin

Dear Mr. Marcoux:

The purpose of this letter is to identify all known source areas of contamination within the Domtar Port Edwards Mill I site, (referred to in this letter as the "Property") and to summarize any continuing obligations required at the Property due to contamination remaining at some of the source areas on the Property. Each source area is listed on the Wisconsin Department of Natural Resources Bureau of Remediation and Redevelopment Tracking System (BRRTS).

The continuing obligations are part of the cleanup and case closure approved for the some of the source areas within the Property. Information on continuing obligations on properties is shown on the Internet at http://dnrm.wisconsin.gov/imf/imf.jsp?site=brrts2. How to find further information about the closure and residual contamination for this site can be located at http://dnr.wisconsin.gov/topic/Brownfields/clean.html.

The following are the known contaminated sites with continuing obligations; their BRRTS Number and their locations are listed in the following table:

Table with 3 columns: Site Name, BRRTS #, and WTM Coordinates. It lists various sites such as Georgia Pacific Truck Repair, Nekoosa Edwards Non-Combustible LF #1255, and Domtar Port Edwards Mill Production Area.

Continuing Obligations

The continuing obligations for each site are summarized below. Further details on actions required at each site are found in their respective closure letter attached to this letter:

Georgia Pacific Truck Repair

- Residual soil contamination exists that must be properly managed should it be excavated or removed.

Nekoosa Edwards Non-Combustible LF #1255

- Pavement, an engineered cover or a soil barrier must be maintained over waste materials and the DNR must approve any changes to this barrier.

Sam's Citgo

- Groundwater contamination is present above ch. NR 140, Wis. Adm. Code enforcement standards.
- Residual soil contamination exists that must be properly managed should it be excavated or removed.
- One or more monitoring wells were not located and must be properly filled and sealed if found.
- Pavement, an engineered cover or a soil barrier must be maintained over contaminated soil and the DNR must approve any changes to this barrier.

Georgia Pacific Old Fire Station

- Groundwater contamination is present above ch. NR 140, Wis. Adm. Code enforcement standards.
- Residual soil contamination exists that must be properly managed should it be excavated or removed.
- One or more monitoring wells were not located and must be properly filled and sealed if found.
- Pavement, an engineered cover or a soil barrier must be maintained over contaminated soil and the DNR must approve any changes to this barrier.

Domtar Port Edwards Roundhouse

- Groundwater contamination is present above ch. NR 140, Wis. Adm. Code enforcement standards.
- Residual soil contamination exists that must be properly managed should it be excavated or removed.
- Before the land use may be changed from industrial to non-industrial, DNR must approve the change in use.

Georgia Pacific #6 Fuel Oil AST

- Groundwater contamination is present above ch. NR 140, Wis. Adm. Code enforcement standards.

- Residual soil contamination exists that must be properly managed should it be excavated or removed.
- One or more monitoring wells were not located and must be properly filled and sealed if found.

Domtar Port Edwards Mill Production Area

- Groundwater contamination is present above ch. NR 140, Wis. Adm. Code enforcement standards.
- Residual soil contamination exists that must be properly managed should it be excavated or removed.
- Pavement, buildings, or an engineered cover must be maintained over contaminated soil and the DNR must approve any changes to this barrier.
- Before the land use may be changed from industrial to non-industrial, additional environmental work must be completed.

Domtar Port Edwards UST PE Warehouse

- Groundwater contamination is present above ch. NR 140, Wis. Adm. Code enforcement standards.
- Residual soil contamination exists that must be properly managed should it be excavated or removed.
- Pavement, an engineered cover or a soil barrier must be maintained over contaminated soil and the DNR must approve any changes to this barrier.

Property Owner Responsibilities

The owner (you and any subsequent property owner) of this Property is responsible for compliance with these continuing obligations, pursuant to s. 292.12, Wis. Stats. You are strongly encouraged to pass on the information about these continuing obligations to anyone who purchases this property from you (i.e. pass on this letter). For residential property transactions, you are required to make disclosures under Wis. Stats. s. 709.02. You may have additional obligations to notify buyers of the condition of the property and the continuing obligations set out in this letter and the closure letter.

Please be aware that failure to comply with the continuing obligations may result in enforcement action by the Department **and nullification of the liability exemption for these impacted areas**. The Department intends to conduct inspections in the future to ensure that the conditions included in this letter, including compliance with referenced maintenance plans, are met.

When maintenance of a continuing obligation is required, the Property owner is responsible for inspections, repairs, or replacements as needed. Such actions should be documented by the Property owner and the records kept accessible for the Department to review for as long as the Department directs.

You and any subsequent Property owners are responsible for notifying the Department, and obtaining approval, before making any changes to the property that would affect the obligations applied to the Property. Send all written notifications in accordance with the above requirements to Wisconsin Department of Natural Resources West Central Region Headquarters at 1300 West Clairmont Avenue, Eau Claire, Wisconsin 54701, to the attention of the Remediation and Redevelopment Program Assistant.

The following DNR fact sheet, RR-819, "Continuing Obligations for Environmental Protection" has been included with this letter, to help explain a property owner's responsibility for continuing obligations on their property. If the fact sheet is lost, you may obtain a copy at <http://dnr.wi.gov/files/PDF/pubs/rr/RR819.pdf>.

The Department appreciates your efforts. If you have any questions regarding this closure decision or anything outlined in this letter, please contact Loren Brumberg at (715) 839-3770 or Tom Hvizdak at (715) 421-7850.

Sincerely,

Notes:

VOCs = Volatile Organic Compounds analyzed using EPA Method 8260

ug/l = micrograms per liter (ppb)

mg/l = milligrams per liter (ppm)

NR 140 ES = Wisconsin Administrative Code Chapter NR 140 Enforcement Standard

NR 140 PAL = Wisconsin Administrative Code Chapter NR 140 Preventive Action Limit

Enforcement Standard Exceedances are bolded

J - result is reported between Method Detection Limit and Limit of Quantitation (LOQ) and are therefore less certain than results detected at or above the LOQ

B - Analyte detected in the method blank
