This Adobe Fillable form is intended to provide a list of information that is required for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request. The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

CLOSURE DOCUMENTS (the Department adds these items to the final GIS packet for posting on the Registry)

- Closure Letter**
- Maintenance Plan** (if activity is closed with a land use limitation or condition (land use control) under s. 292.12, Wis. Stats.)
- Continuing Obligation Cover Letter** (for property owners affected by residual contamination and/or continuing obligations)
- Conditional Closure Letter**
- Certificate of Completion (COC)** (for VPLE sites)

SOURCE LEGAL DOCUMENTS

- Deed:** The most recent deed as well as legal descriptions, for the **Source Property** (where the contamination originated). Deeds for other, off-source (off-site) properties are located in the **Notification** section.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Certified Survey Map:** A copy of the certified survey map or the relevant section of the recorded plat map for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map. (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).
Figure #: **Title:**
- Signed Statement:** A statement signed by the Responsible Party (RP), which states that he or she believes that the attached legal description accurately describes the correct contaminated property.

MAPS (meeting the visual aid requirements of s. NR 716.15(2)(h))

Maps must be no larger than 11 x 17 inches unless the map is submitted electronically.

- Location Map:** A map outlining all properties within the contaminated site boundaries on a U.S.G.S. topographic map or plat map in sufficient detail to permit easy location of all parcels. If groundwater standards are exceeded, include the location of all potable wells within 1200 feet of the site.
Note: Due to security reasons municipal wells are not identified on GIS Packet maps. However, the locations of these municipal wells must be identified on Case Closure Request maps.
Figure #: 1 **Title: Site Location Map**
- Detailed Site Map:** A map that shows all relevant features (buildings, roads, individual property boundaries, contaminant sources, utility lines, monitoring wells and potable wells) within the contaminated area. This map is to show the location of all contaminated public streets, and highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding a ch. NR 140 Enforcement Standard (ES), and/or in relation to the boundaries of soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Levels (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: **Title: Nekoosa Edwards Paper CO., Inc. LF #1364 / Site Features**
- Soil Contamination Contour Map:** For sites closing with residual soil contamination, this map is to show the location of all contaminated soil and a single contour showing the horizontal extent of each area of contiguous residual soil contamination that exceeds a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.

MAPS (continued)

Geologic Cross-Section Map: A map showing the source location and vertical extent of residual soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL). If groundwater contamination exceeds a ch. NR 140 Enforcement Standard (ES) when closure is requested, show the source location and vertical extent, water table and piezometric elevations, and locations and elevations of geologic units, bedrock and confining units, if any.

Figure #: Title:

Figure #: Title:

Groundwater Isoconcentration Map: For sites closing with residual groundwater contamination, this map shows the horizontal extent of all groundwater contamination exceeding a ch. NR140 Preventive Action Limit (PAL) and an Enforcement Standard (ES). Indicate the direction and date of groundwater flow, based on the most recent sampling data.

Note: This is intended to show the total area of contaminated groundwater.

Figure #: Title:

Groundwater Flow Direction Map: A map that represents groundwater movement at the site. If the flow direction varies by more than 20° over the history of the site, submit 2 groundwater flow maps showing the maximum variation in flow direction.

Figure #: Title:

TABLES (meeting the requirements of s. NR 716.15(2)(h)(3))

Tables must be no larger than 11 x 17 inches unless the table is submitted electronically. Tables must not contain shading and/or cross-hatching. The use of **BOLD** or *ITALICS* is acceptable.

Soil Analytical Table: A table showing remaining soil contamination with analytical results and collection dates.

Note: This is one table of results for the contaminants of concern. Contaminants of concern are those that were found during the site investigation, that remain after remediation. It may be necessary to create a new table to meet this requirement.

Table #: Title:

Groundwater Analytical Table: Table(s) that show the most recent analytical results and collection dates, for all monitoring wells and any potable wells for which samples have been collected.

Table #: Title:

Water Level Elevations: Table(s) that show the previous four (at minimum) water level elevation measurements/dates from all monitoring wells. If present, free product is to be noted on the table.

Table #: Title:

IMPROPERLY ABANDONED MONITORING WELLS

For each monitoring well not properly abandoned according to requirements of s. NR 141.25 include the following documents.

Note: If the site is being listed on the GIS Registry for only an improperly abandoned monitoring well you will only need to submit the documents in this section for the GIS Registry Packet.

Not Applicable

Site Location Map: A map showing all surveyed monitoring wells with specific identification of the monitoring wells which have not been properly abandoned.

Note: If the applicable monitoring wells are distinctly identified on the Detailed Site Map this Site Location Map is not needed.

Figure #: Title:

Well Construction Report: Form 4440-113A for the applicable monitoring wells.

Deed: The most recent deed as well as legal descriptions for each property where a monitoring well was not properly abandoned.

Notification Letter: Copy of the notification letter to the affected property owner(s).

NOTIFICATIONS

Source Property

Not Applicable

- Letter To Current Source Property Owner:** If the source property is owned by someone other than the person who is applying for case closure, include a copy of the letter notifying the current owner of the source property that case closure has been requested.
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying current source property owner.

Off-Source Property

Group the following information per individual property and label each group according to alphabetic listing on the "Impacted Off-Source Property" attachment.

Not Applicable

- Letter To "Off-Source" Property Owners:** Copies of all letters sent by the Responsible Party (RP) to owners of properties with groundwater exceeding an Enforcement Standard (ES), and to owners of properties that will be affected by a land use control under s. 292.12, Wis. Stats.
Note: Letters sent to off-source properties regarding residual contamination must contain standard provisions in Appendix A of ch. NR 726.

Number of "Off-Source" Letters:

- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying any off-source property owner.
- Deed of "Off-Source" Property:** The most recent deed(s) as well as legal descriptions, for all affected deeded **off-source property(ies)**. This does not apply to right-of-ways.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Certified Survey Map:** A copy of the certified survey map or the relevant section of the recorded plat map for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map. (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).

Figure #: **Title:**

- Letter To "Governmental Unit/Right-Of-Way" Owners:** Copies of all letters sent by the Responsible Party (RP) to a city, village, municipality, state agency or any other entity responsible for maintenance of a public street, highway, or railroad right-of-way, within or partially within the contaminated area, for contamination exceeding a groundwater Enforcement Standard (ES) and/or soil exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL).

SUBJECT: Final Case Closure with Continuing Obligations
Nekoosa Edwards Paper Co., Inc. Non-Combustible Landfill (License #1364)
Domtar Port Edwards Facility, Port Edwards, Wisconsin

Dear Mr. Marcoux:

The purpose of this letter is unique and is intended to serve both as a Responsible Party (RP) letter and case closeout letter. The first section entitled "Legal Responsibilities" is the RP portion of the letter and the second section entitled "Case Closure under Chapter 292, Wisconsin Statutes" is the case closeout portion of the letter.

During a recent Phase I site investigation of the Domtar Port Edwards facility it was determined that the above-referenced site is an inactive licensed solid waste facility historically used for the disposal of wood bark, saw dust, and some coal ash, from 1969 to 1973. The landfill had a licensed acreage of 5.3 acres and was operated by Nekoosa Edwards Paper Co., Inc. It is believed that the wood chip and bark landfill is located on the 89.51-acre parcel described as Parcel #32, Tax Parcel Identification #27-00060. File records indicate that a soil cap was placed over the fill material in late 1974, and a recent field inspection of the soil cap found it to be in good condition.

The Wisconsin Department of Natural Resources (WDNR) believes you are responsible for the long-term care requirements of the landfill based on acquiring rights of ownership and in accordance with s. 289.46, Wis. Stats.

Legal Responsibilities:

Your legal responsibilities are defined both in statute and in administrative codes. The transference of responsibility law, Section 289.46, Wisconsin Statutes, states:

- **TRANSFERENCE OF RESPONSIBILITY.** Any person acquiring rights of ownership, possession or operation in a licensed solid waste or hazardous waste facility at any time after the facility begins to accept waste is subject to all requirements of the license approved for the facility including any requirements relating to long-term care of the facility and is subject to any negotiated agreement or arbitration award related to the facility under s. 289.33, Wis. Stats.

Chapter 289, Wisconsin Statutes, establish standards for solid waste management, long-term care, financial responsibility, operation, waivers, exemptions, and closure of solid waste facilities. Chapter 292, Wisconsin Statutes, establish standards for conducting environmental investigations and remedial actions.

Wisconsin Administrative Code chapters NR 500 through NR 555 provides definitions, submittal requirements, exemptions and other general information relating to solid waste facilities. Wisconsin Administrative Code chapters NR 700 through NR 749 establish requirements for emergency and interim actions, public information, site investigations, design and operation of remedial action systems, and case closure. Wisconsin Administrative Code chapter NR 140 establishes groundwater standards for contaminants that reach groundwater.

Sites under Chapter 292, Wisconsin Statutes, are entered into the Bureau for Remediation and Redevelopment Tracking System ("BRRTS"), a version of which appears on the WDNR's internet site. You may view the information related to your site at any time (<http://dnr.wi.gov/botw/SetUpBasicSearchForm.do>) and use the feedback system to alert us to any errors in the data.

Case Closure under Chapter 292, Wisconsin Statutes

The Wisconsin Department of Natural Resources (WDNR) considers the Nekoosa Edwards Paper Co., Inc. Non-Combustible Landfill (License #1364) closed, with continuing obligations. No further investigation or remediation is required at this time. However, you and future property owners must comply with the continuing obligations as explained in the conditions of closure in this letter. Please read over this letter closely to ensure that you comply with all conditions and other on-going requirements. Provide this letter and any attached maintenance plan to anyone who purchases this property from you.

The Wisconsin Department of Natural Resources West Central Region Closure Committee reviewed the information regarding this site. This final closure decision is based on the correspondence and data provided, as well as field observations by WDNR personnel, and is issued under ch. NR 726, Wisconsin Administrative Code. The Closure Committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases.

Based on the type of material that was disposed at this site and the current condition of the soil cap, it appears that your case meets the requirements of ch. NR 726, Wisconsin Administrative Code, providing that the soil cap is properly maintained as a continuing obligation at this site. The conditions of closure and continuing obligations required were based on the property being used for residential use.

Continuing Obligations

The continuing obligations for this site are summarized below. Further details on actions required are found in the section

- A soil barrier must be maintained over the fill material and the WDNR must approve any changes to this barrier.

GIS Registry

This site will be listed on the Remediation and Redevelopment Program's internet accessible Geographic Information System (GIS) Registry, to provide notice of residual contamination and of any continuing obligations. WDNR approval prior to well construction or reconstruction is required for all sites shown on the GIS Registry, in accordance with s. NR 812.09(4) (w), Wis. Adm. Code. To obtain approval, complete and submit Form 3300-254 to the WDNR Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line at <http://dnr.wi.gov/org/water/dwg/3300254.pdf> or at the web address listed below for the GIS Registry.

All site information is also on file at the Wisconsin Department of Natural Resources Wisconsin Rapids Service Center located at 473 Griffith Avenue, Wisconsin Rapids, Wisconsin. This letter and information that was submitted with your closure request application, including the maintenance plan, will be included on the GIS Registry in a PDF attachment. To review the site on the GIS Registry web page, visit the RR Sites Map page at <http://dnr.wi.gov/org/aw/rr/gis/index.htm>.

Prohibited Activities

Certain activities are prohibited at closed sites because maintenance of a barrier is intended to prevent contact with any remaining contamination. When a barrier is required, the condition of closure requires notification of the WDNR before making a change, in order to determine if further action is needed to maintain the protectiveness of the remedy employed. The following activities are prohibited on any portion of the property where the soil cap over the fill material is required, as shown on the attached map, unless prior written approval has been obtained from WDNR:

- removal of the existing barrier;
- replacement with another barrier;
- excavating or grading of the land surface;
- filling on the existing barrier;
- plowing for agricultural cultivation;
- construction or placement of a building or other structure;

Closure Conditions

Compliance with the requirements of this letter is a responsibility to which you, and any subsequent property owners must adhere. WDNR staff will conduct periodic prearranged inspections to ensure that the conditions included in this letter and the attached maintenance plans are met. If these requirements are not followed, the WDNR may take enforcement action under s. 292.11, Wisconsin Statutes to ensure compliance with the specified requirements, limitations or other conditions related to the property.

Solid waste remains as fill material at the site as indicated on the attached map. After receiving written approval from the WDNR, if the soil cap and/or the fill material in the area described above is excavated in the future, the property owner at the time of excavation must properly manage the fill

material as a solid waste and ensure that any storage, treatment or disposal is in compliance with applicable standards and rules. In addition, all current and future owners and occupants of the property need to be aware that excavation of the solid waste may pose a direct contact hazard and as a result special precautions may need to be taken to prevent a direct contact health threat to humans.

Cover or Barrier (s. 292.12 (2) (a), Wis. Stats.)

The soil cap that exists over the solid waste as shown on the attached map shall be maintained in compliance with the attached maintenance plan in order to minimize exposure to the buried solid waste, and to prevent direct contact with the solid waste that might otherwise pose a threat to human health.

A request may be made to modify or replace a cover or barrier. The replacement or modified cover or barrier must be protective of the revised use of the property, and must be approved in writing by the WDNR prior to implementation.

The attached maintenance plan and inspection log are to be kept up-to-date and on-site. Submit the inspection log to WDNR only upon request.

Any future redevelopment of this property must take into account consideration of the presence of waste materials and will require the issuance of an exemption from the WDNR to build on an abandoned landfill prior to the start of any construction. Please refer to the following Building on Abandoned Landfill Guidances for further information. They can be found on the internet at:

<http://dnr.wi.gov/org/aw/rr/archives/pubs/RR685.pdf>
<http://dnr.wi.gov/org/aw/rr/archives/pubs/RR684.pdf>
<http://dnr.wi.gov/org/aw/rr/archives/pubs/RR683.pdf>

The following WDNR fact sheet, "Continuing Obligations for Environmental Protection", RR-819, was included with this letter, to help explain a property owner's responsibility for continuing obligations on their property. If the fact sheet is lost, you may obtain a copy at <http://dnr.wi.gov/org/aw/rr/archives/pubs/RR819.pdf>.

Please send written notifications in accordance with the above requirements to the Wisconsin Department of Natural Resources West Central Regional Office, to the attention of the Environmental Program Assistant.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment. Upon issuance of a Certificate of Completion (COC) under the Voluntary Party Liability Exemption (VPLE) Program, the voluntary party and any "successors or assigns" are exempt from provisions of the Hazardous Substance Spills Law (s. 292.11, Wis. Stats.), as this law relates to past releases of hazardous substances, and cannot be held responsible for further environmental investigation and cleanup of these past releases contingent upon compliance with the conditions of case closure and the exemption.

CAP MAINTENANCE PLAN

March 6, 2012

Property Located at: 100 Wisconsin River Drive – Port Edwards, WI

Nekoosa Edwards Paper Co., Inc. Non-Combustible Landfill (5.3 acres)

FID No. 772010580, WDNR Solid Waste No. 1364

Introduction

This document is the Cap Maintenance Plan for a cap at the above-referenced property in accordance with the requirements of s. NR 724.13(2) Wisconsin Administrative Code. The maintenance activities relate to the existing cap occupying the area over the soil on site.

More site-specific information about this property may be found in:

- in the case file in the DNR West Central Region;
- in WDNR Historic Registry of Waste Disposal Sites; and
- from the WDNR Project Manager (T. Hvizdak).

Description of Contamination

Wood waste, bark, and small amounts of coal cinders. The property boundary is shown on the attached Figure LF-1.

Description of the Cap to be Maintained

The cap consists of soil cover and vegetation.

Cover and Building Purpose

The cap over the waste material serves as a barrier to prevent environmental exposure to residual wood waste. Based on the current and future use of the property, the barrier should function as intended unless disturbed.

Annual Inspection

The cover overlying the area depicted in Figure 1 will be inspected once a year, normally in the spring after all snow and ice are gone, for deterioration, cracks, and other potential problems that can cause exposure to underlying soils. The inspections will be performed by the property owner or their designated representative. The inspections will be performed to evaluate damage due to settling, exposure to the weather, wear from traffic, increasing age, and other factors. Any area where waste material have become or are likely to become exposed will be documented. A log of the inspections and any repairs will be maintained by the property owner and is included as Exhibit B, Cap Inspection Log. The log will include recommendations for necessary repair of any areas where underlying waste material are exposed. Once repairs are completed, they will be documented in the inspection log. A copy of the inspection log will be kept at the address of the property owner and available for submittal or inspection by WDNR representatives upon their request.

Maintenance Activities

If problems are noted during the annual inspections or at any other time during the year, repairs will be scheduled as soon as practical. Repairs can include placement of additional soil cover. In the event that necessary maintenance activities expose the underlying waste material, the owner must inform the maintenance workers that if unusual conditions are observed they should evaluate the situation to determine if direct contact can require appropriate personal protection equipment. The waste material must be treated, stored, and disposed of by the owner in accordance with applicable local, state, and federal laws.

The property owner, in order to maintain the integrity of the cover/cap, will maintain a copy of this Cap Maintenance Plan on site and make it available to all interested parties (i.e., on-site employees, contractors, future property owners, etc.) for viewing.

Prohibition of Activities and Notification of WDNR Prior to Actions Affecting a Cover or Cap

The following activities are prohibited on the area shown on Figure LF-1, unless prior written approval has been obtained from the WDNR: 1) removal of the existing barrier; 2) replacement with another barrier (unless the replacement barrier is equally protective) ; 3) excavating or grading of the land surface; 4) filling on capped or paved areas; 5) plowing for agricultural cultivation; or 6) construction or placement of a building or other structure.

Amendment or Withdrawal of Cap Maintenance Plan

This Cap Maintenance Plan can be amended or withdrawn by the property owner and its successors with the written approval of the WDNR.

Subject: A Certificate of Completion under the Voluntary Party Liability Exemption Program for the Environmental Investigation and Cleanup of the Domtar – Port Edwards Mill (II) Site, 100 Wisconsin River Drive, Village of Port Edwards, Wood County, Wisconsin

Dear Mr. Marcoux:

The Wisconsin Department of Natural Resources (“the Department”) has reviewed your request for issuance of a *Certificate of Completion* under the Voluntary Party Liability Exemption (“VPLE”) Program for the environmental investigation and cleanup of property owned by the Domtar Wisconsin Dam Corporation and known as the Domtar – Port Edwards Mill (II) site located at 100 Wisconsin River Drive, Village of Port Edwards, Wisconsin. You have requested that the Department determine whether Domtar A.W., LLC has met the environmental investigation and remediation requirements under s. 292.15(2), Wis. Stats., for issuance of a *Certificate of Completion*.

The site consists of 6 parcels of real property described on two deeds (Special Warranty Deed Document #889434 and Quit Claim Deed Document #2012R04913) located in parts of the South ½ of the Southwest ¼ and South ½ of the Southeast ¼ of Section 35, Township 22 North, Range 05 East, and North ½ of the Northeast ¼ and Northeast ¼ of the Northwest ¼ of Section 2 and North ½ of the Northwest ¼ of Section 1, Township 21 North, Range 05 East, Village of Port Edwards, Wood County, Wisconsin, hereinafter referred to as “the Property”. The Property is further described in the aforementioned deeds in Attachment A of the *Certificate of Completion*.

Determination

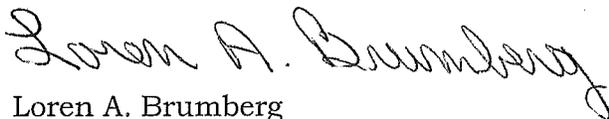

As you are aware, s. 292.15, Wis. Stats., authorizes the Department to issue a *Certificate of Completion* to a voluntary party that conducts an approved environmental investigation of a property and restores the environment to the extent practicable and minimizes the harmful effects with respect to hazardous substance discharges on or originating from the Property. Based on the information received by the Department, the Department has determined that the investigation and cleanup of the Property is complete and that all conditions in s. 292.15(2), Wis. Stats., have been met. Attached is the *Certificate of Completion* for this Property.

The Property has been entered onto the WDNR's Geographical Information System ("GIS") Registry due to the presence of contaminants in soils that exceeds site-specific and/or generic residual contaminant levels ("RCLs") under ch NR 720, Wis. Adm. Code, and solid waste contained in a licensed, non-approved landfill. The purpose of maintaining this database is to make this information available to the public and to notify future property owners of any requirements, limitations, or conditions imposed by the Department. Continuing obligations and cap maintenance plans imposed by the Department for the Property are described in one (1) case closure letter and one (1) closure letter for the licensed landfill as attachments to the *Certificate of Completion*. Particular attention should be paid to these continuing obligations because failure to maintain and monitor the property as required in case closure letters can result in the loss of your liability protections.

Conclusions

The Department appreciates the work conducted by the Domtar Wisconsin Dam Corporation to investigate and restore the environment to the extent practicable at the Property. The exemptions provided by this *Certificate of Completion* apply to any successor or assignee of Domtar Wisconsin Dam Corporation, dependent upon the successor or assignee complying with the conditions of s. 292.15, Wis. Stats. If you have any questions or concerns regarding the *Certificate of Completion* and its exemptions or responsibilities, please call me at 715-839-3770 or Attorney Lacy Cochart at 608-267-0846.

**CERTIFICATE OF COMPLETION
OF RESPONSE ACTIONS
UNDER SECTION 292.15(2)(ae), WIS. STATS.**

Whereas, **Domtar Wisconsin Dam Corporation** has applied for an exemption from liability under s. 292.15, Wis. Stats., for property located at 100 Wisconsin River Drive, Village of Port Edwards, Wisconsin, which is referred to as the Domtar - Port Edwards Mill (II) site, further described in the legal description found on Attachment A, and hereinafter referred to as “the Property”;

Whereas, an environmental investigation of the Property has been conducted and the Wisconsin Department of Natural Resources (“the WDNR”) has determined that contamination exists at the Property;

Whereas, **Domtar Wisconsin Dam Corporation** has submitted to the WDNR certain investigation reports and remedial action plans for the Property which comply with the requirements set forth in chs. NR 700-754, Wis. Adm. Code, consisting of documents and reports listed in Attachment B;

Whereas, in accordance with s. 292.15(2)(ae)1., Wis. Stats., the WDNR has determined that an environmental investigation has been conducted which adequately identified and evaluated the nature and extent of the hazardous substance discharges on the Property. The WDNR West Central Regional Closeout Committee approved of the environmental investigation on **September 6, 2012**;

Whereas, the Property contains soil contamination that exceeds site-specific and/or generic residual contaminant levels (“RCLs”) under ch. NR 720, Wis. Adm. Code, and solid waste contained in a licensed, non-approved landfill. Therefore, the Property will be included on the WDNR Geographical Information System database

("the GIS Registry") pursuant to s. 292.12(3), Wis. Stats. **Domtar Wisconsin Dam Corporation** has submitted to the WDNR all the information necessary to be included on the GIS Registry, pursuant to s. NR 726.05(2), Wis. Adm. Code;

Whereas, on October 23, 2012, the WDNR issued a summary case closure letter for the Property (Attachment C). The owner of this Property shall adhere to, abide by, and maintain the continuing obligations and other requirements that are specified in the attached final case closure letters and cap maintenance plans. This site will be listed on the WDNR's GIS Registry of Sites with Residual Contamination and Continuing Obligations. The case closure letters include the following requirements:

- Residual soil contamination exists that must be properly managed should the soil be excavated or removed;
- Before the land use may be changed from industrial to non-industrial notification of the WDNR is required at a minimum and existing covers would need to be re-evaluated to determine if the covers are protective of human health based on future land uses;
- Pavement, an engineered cover, structures, or soil barriers must be maintained over contaminated soil and the WDNR must approve any changes to the barriers in accordance with the approved cap maintenance plans;
- Soil barrier or cap must be maintained over the Nekoosa Edwards Paper Co., Inc. Landfill (License #1364) in accordance with the approved cap maintenance plan.
- Activities that would alter, remove, or displace the pavement, engineered cover, structures, or soil barrier are prohibited unless prior written approval has been obtained from the WDNR;
- A written exemption issued by the WDNR under the Building on Abandoned Landfills process (under s. 506.085, Wis. Adm. Code) shall be obtained prior to any construction activities impacting the landfill soil barrier or cap.

Whereas, the WDNR determination that the response action is complete and was based on the Property being used as an industrial facility. In the event that the covers or barriers that currently exist are removed, the replacement barrier must be equally protective. Because of the residual contamination and certain continuing obligations for this site, before use of this site can be changed to residential use, or use by certain sensitive populations, such as a day care center, school, a senior center, hospital, or a similar use, notification of the WDNR is required at a minimum. In the event there is a proposed land use classification change at the Property, the existing cover would need to be re-evaluated to determine if it is protective of human health based on future land uses and, depending on the land use change and the site specific conditions, a new Certificate of Completion may need to be issued;

Whereas, if the requirements of this Certificate, the closure letters, or the maintenance plans are not followed, or if the land use changes, the WDNR may take actions under ss. 292.11 or 292.12, Wis. Stats., to ensure compliance with the specified requirements and the person who owns or controls the Property may no longer qualify for the liability protections under s. 292.15, Wis. Stats.; and

Whereas, on **September 6, 2012**, the WDNR determined that response actions necessary to restore the environment to the extent practicable were completed.

Therefore, based upon the information that has been submitted, the WDNR hereby certifies that the response actions set forth in the WDNR-approved remedial action plan for the Property and any other necessary response actions have been completed.

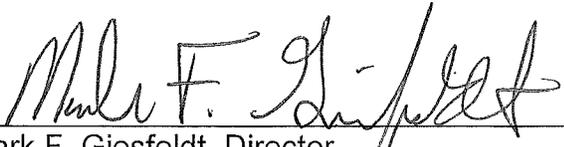

Upon issuance of this *Certificate of Completion*, **Domtar Wisconsin Dam Corporation** and persons qualified for protection under s. 292.15(3), Wis. Stats., are exempt from the provisions of ss. 289.05(1), (2), (3) and (4), 289.42(1), 289.67, 291.25(1) to (5), 291.29, 291.37, 292.11(3), (4), and (7)(b) and (c) and 292.31(8), Wis. Stats., with respect to the existence of hazardous substances on or originating from the Property, the release of which occurred prior to the date the WDNR approved the environmental investigation required under s. 292.15(2)(ae)1., Wis. Stats.

However, the person who owns or controls the Property would no longer qualify for this liability exemption if that person fails to maintain or monitor the Property as required by the conditions in this *Certificate of Completion*, the final case closure letter (Attachment C), s. 292.12, Wis. Stats., and administrative rules promulgated by the WDNR. Any discharges of a hazardous substance to or from the Property that occur after the date that the environmental investigation was approved will be the responsibility of the current Property owner and any other person who possesses or controls that discharge and any person who caused the discharge.

The protection from liability provided under s. 292.15(2), Wis. Stats., does not apply to any person who has obtained a *Certificate of Completion* by fraud or misrepresentation, or by the knowing failure to disclose material information or under circumstances in which **Domtar Wisconsin Dam Corporation** knew or should have known about more discharges of hazardous substances than was revealed by the investigation approved by the WDNR.

Nothing in this *Certificate of Completion* or in s. 292.15, Wis. Stats., affects the authority of the WDNR to exercise any powers or duties under applicable laws other than ss. 289.05(1), (2), (3) and (4), 289.42(1), 289.67, 291.25(1) to (5), 291.29, 291.37, 292.11(3), (4), and (7)(b) and (c) and 292.31(8), Wis. Stats., with respect to any release or threatened release of contaminants at the Property, or the right of the WDNR to seek relief available against any person who is not entitled to protection from liability under s. 292.15, Wis. Stats., with respect to such release or threatened release.

SIGNED AND CERTIFIED this 12th day of November, 2012.

SUBJECT: Summary of Continuing Obligations to maintain Voluntary Party Liability Exemption (VPLE)
Domtar Port Edwards Mill (II) Site
100 Wisconsin River Drive, Port Edwards, Wisconsin

Dear Mr. Marcoux:

The purpose of this letter is to identify all known source areas of contamination within the Domtar Port Edwards Mill II site, (referred to in this letter as the "Property") and to summarize any continuing obligations required at the Property due to contamination remaining at some of the source areas on the Property. Each source area is listed on the Wisconsin Department of Natural Resources Bureau of Remediation and Redevelopment Tracking System (BRRTS).

The continuing obligations are part of the cleanup and case closure approved for the some of the source areas within the Property. Information on continuing obligations on properties is shown on the Internet at <http://dnrmmaps.wi.gov/imf/imf.jsp?site=brrts2>. How to find further information about the closure and residual contamination for this site can be located at <http://dnr.wi.gov/topic/Brownfields/clean.html>.

The following are the known contaminated sites with continuing obligations; their BRRTS Number and their locations are listed in the following table:

Site Name	BRRTS #	WTM Coordinates
Nekoosa Edwards Non-Combustible LF #1364	02-72-558435	530403, 429509
Domtar Coal Pile Area	02-72-558274	529800, 429553

Continuing Obligations

The continuing obligations for each site are summarized below. Further details on actions required at each site are found in their respective closure letter attached to this letter:

- Pavement, an engineered cover or a soil barrier must be maintained over waste materials and the DNR must approve any changes to this barrier.

Domtar Coal Pile Area

- Groundwater contamination is present above ch. NR 140, Wis. Adm. Code enforcement standards.
- Residual soil contamination exists that must be properly managed should it be excavated or removed.
- A soil barrier, and railroad tracks and ballast, must be maintained over the contaminated soil and the DNR must approve any changes to this barrier.
- Before the land use may be changed from industrial to non-industrial, additional environmental work must be completed.
- Current land or property use must be maintained to be protective. If changes to the current property use or land use are planned, an assessment must be made of whether the closure is still protective.

Property Owner Responsibilities

The owner (you and any subsequent property owner) of this Property is responsible for compliance with these continuing obligations, pursuant to s. 292.12, Wis. Stats. You are strongly encouraged to pass on the information about these continuing obligations to anyone who purchases this property from you (i.e. pass on this letter). For residential property transactions, you are required to make disclosures under s. 709.02, Wis. Stats. You may have additional obligations to notify buyers of the condition of the Property and the continuing obligations set out in this letter and the closure letter.

Please be aware that failure to comply with the continuing obligations may result in enforcement action by the Department **and nullification of the liability exemption for these impacted areas**. The Department intends to conduct inspections in the future to ensure that the conditions included in this letter, including compliance with referenced maintenance plans, are met.

When maintenance of a continuing obligation is required, the Property owner is responsible for inspections, repairs, or replacements as needed. Such actions should be documented by the Property owner and the records kept accessible for the Department to review for as long as the Department directs.

You and any subsequent Property owners are responsible for notifying the Department, and obtaining approval, before making any changes to the property that would affect the obligations applied to the Property. Send all written notifications in accordance with the above requirements to Wisconsin Department of Natural Resources West Central Region Headquarters at 1300 West Clairemont Avenue, Eau Claire, Wisconsin 54701, to the attention of the Remediation and Redevelopment Program Assistant.
